The APA is offering the Cultural Formulation Interview (including the Informant Version) and the Supplementary Modules to the Core Cultural Formulation Interview for further research and clinical evaluation. They should be used in research and clinical settings as potentially useful tools to enhance clinical understanding and decision-making and not as the sole basis for making a clinical diagnosis. Additional information can be found in DSM-5 in the Section III chapter "Cultural Formulation." The APA requests that clinicians and researchers provide further data on the usefulness of these cultural formulation interviews at <a href="http://www.dsm5.org/Pages/Feedback-Form.aspx">http://www.dsm5.org/Pages/Feedback-Form.aspx</a>.

Measure: Cultural Formulation Interview (CFI)—Informant Version Rights granted: This material can be reproduced without permission by researchers and by clinicians for use with their patients. ## Cultural Formulation Interview (CFI)—Informant Version

GUIDE TO INTERVIEWER	INSTRUCTIONS TO THE INTERVIEWER ARE ITALICIZED.		
The following questions aim to clarify key aspects of the presenting clinical problem from the informant's point of view. This includes the problem's meaning, potential sources of help, and expectations for services.	INTRODUCTION FOR THE INFORMANT: I would like to understand the problems that bring your family member/friend here so that I can help you and him/her more ef- fectively. I want to know about <b>your</b> experience and ideas. I will ask some questions about what is going on and how you and your family member/friend are dealing with it. There are no right or wrong answers.		
RELATIONSHIP WITH THE PATIENT			
Clarify the informant's relationship with the individual and/or the individual's family.	<ol> <li>How would you describe your relationship to [INDIVIDUAL OR TO FAMILY]?</li> <li>PROBE IF NOT CLEAR: How often do you see [INDIVIDUAL]?</li> </ol>		
CULTURAL DEFINITION OF THE PROBLEM			
<ul> <li>Elicit the informant's view of core problems and key concerns.</li> <li>Focus on the informant's way of understanding the individual's problem.</li> <li>Use the term, expression, or brief description elicited in question 1 to identify the problem in subsequent questions (e.g., "her conflict with her son").</li> </ul>	2. What brings your family member/friend here today? IF INFORMANT GIVES FEW DETAILS OR ONLY MENTIONS SYMPTOMS OR A MEDICAL DIAGNOSIS, PROBE: People often understand problems in their own way, which may be similar or different from how doctors describe the problem. How would <b>you</b> describe [INDIVIDUAL'S] problem?		
Ask how informant frames the problem for members of the social network.	<ol> <li>Sometimes people have different ways of describing the problem to family, friends, or others in their community. How would <i>you</i> describe [INDIVIDUAL'S] problem to them?</li> </ol>		
Focus on the aspects of the problem that matter most to the informant.	4. What troubles you most about [INDIVIDUAL'S] problem?		
CULTURAL PERCEPTIONS OF CAUSE, CONTEXT, AND SUPPORT			
	Causes		
This question indicates the meaning of the condition for the informant, which may be relevant for clinical care. Note that informants may identify multiple causes de-	5. Why do you think this is happening to [INDIVIDUAL]? What do you think are the causes of his/her [PROBLEM]? PROMPT FURTHER IF REQUIRED:		

pending on the facet of the problem they are consid-

[PROBLEM]?

spiritual reason, or many other causes.

STRESSORS AND SUPPORTS				
Elicit information on the individual's life context, focusing on resources, social supports, and resilience. May also probe other supports (e.g., from co-workers, from participation in religion or spirituality).	7.	Are there any kinds of supports that make his/her [PROBLEM] better, such as from family, friends, or others?		
Focus on stressful aspects of the individual's environment. Can also probe, e.g., relationship problems, difficulties at work or school, or discrimination.	8.	Are there any kinds of stresses that make his/her [PROBLEM] worse, such as difficulties with money, or family problems?		
ROLE OF CULTURAL IDENTITY				
		Sometimes, aspects of people's background or identity can make the [PROBLEM] better or worse. By <i>background</i> or <i>identity</i> , I mean, for example, the communities you belong to, the languages you speak, where you or your family are from, your race or ethnic background, your gender or sexual orientation, and your faith or religion.		
Ask the informant to reflect on the most salient elements of the individual's cultural identity. Use this information to tailor questions 10–11 as needed.	9.	For you, what are the most important aspects of [INDIVIDUAL'S] background or identity?		
Elicit aspects of identity that make the problem better or worse.	10	Are there any aspects of [INDIVIDUAL'S] background or identity that make a difference to his/her [PROBLEM]?		
Probe as needed (e.g., clinical worsening as a result of discrimination due to migration status, race/ethnicity, or sexual orientation).				
Probe as needed (e.g., migration-related problems; conflict across generations or due to gender roles).	11.	Are there any aspects of [INDIVIDUAL'S] background or identity that are causing other concerns or difficulties for him/her?		

S	ELF-COPING	
Clarify individual's self-coping for the -problem.	12. Sometimes people have various ways of dealing with problems like [PROBLEM]. What has [INDIVIDUAL] done on his/her own to cope with his/her [-PROBLEM]?	
PAST HELP SEEKING		
Elicit various sources of help (e.g., medical care, mental health treatment, support groups, work-based coun- seling, folk healing, religious or spiritual counseling, other alternative healing).	13. Often, people also look for help from many different sources, including different kinds of doctors, helpers, or healers. In the past, what kinds of treatment, help, advice, or healing has [IN- DIVIDUAL] sought for his/her [PROBLEM]?	
Probe as needed (e.g., "What other sources of help has he/she used?").	PROBE IF DOES NOT DESCRIBE USEFULNESS OF HELP RECEIVED:	
Clarify the individual's experience and regard for pre- vious help.	What types of help or treatment were most useful? Not useful?	

## CULTURAL FACTORS AFFECTING SELF-COPING AND PAST HELP SEEKING

BARRIERS		
Clarify the role of social barriers to help-seeking, access to care, and problems engaging in previous treatment.	14. Has anything prevented [INDIVIDUAL] from getting the help he/she needs?	
Probe details as needed (e.g., "What got in the way?").	PROBE AS NEEDED: For example, money, work or family commitments, stigma or discrimination, or lack of services that understand his/her lan- guage or background?	

Preferences		
Clarify individual's current perceived needs and ex- pectations of help, broadly defined, from the point of view of the informant. Probe if informant lists only one source of help (e.g.,	Now let's talk about the help [INDIVIDUAL] needs. 15. What kinds of help would be most useful to him/her at this time for his/her [PROBLEM]?	
"What other kinds of help would be useful to [INDI- VIDUAL] at this time?").		
Focus on the views of the social network regarding help seeking.	16. Are there other kinds of help that [INDIVIDUAL'S] family, friends, or other people have suggested would be helpful for him/her now?	
CLINICIAN-PATIENT RELATIONSHIP		
Elicit possible concerns about the clinic or the clini- cian-patient relationship, including perceived racism, language barriers, or cultural differences that may undermine goodwill, communication, or care delivery.	Sometimes doctors and patients misunderstand each other because they come from different backgrounds or have different expectations. 17. Have you been concerned about this, and is there anything that	
Probe details as needed (e.g., "In what way?").	we can do to provide [INDIVIDUAL] with the care he/she needs?	
Address possible barriers to care or concerns about the clinic and the clinician-patient relationship raised pre- viously.		

## CULTURAL FACTORS AFFECTING CURRENT HELP SEEKING
