**GUIDE TO THIS BOOK**

**PROGRAM BOOK, NEW RESEARCH BOOK, EXHIBITS GUIDE**

This book contains the Program Book, New Research Program Book and Exhibits Guide. Located within the Program Book you will find a topic index in addition to program tracks (color-coded) that will assist you in finding scientific sessions of interest. The individual program for each day of the meeting is also color-coded so that you can easily find the day(s) of the meeting that interest you. The program is listed by start time with the formats listed alphabetically under those times. To make it even easier to plan your day a separate Days-at-a-Glance has been included with your registration materials. The New Research Program Book lists the titles of the Posters that will be presented at this meeting, organized numerically by session/day. There is a topic index for the Posters only at the end of the New Research Program Book. The Exhibits Guide contains a list of the exhibitors and a floor plan of the exhibit hall, along with information about the Product Theaters.

If you have any questions about this book or the scientific program, please feel free to stop by the Scientific Programs Office, Room 206, East Mezzanine, Moscone Convention Center and an APA staff person will be happy to assist you. All central office APA staff will be wearing green badges. The information provided and views expressed by presenters on this program are not necessarily those of the American Psychiatric Association, nor does the American Psychiatric Association warrant the accuracy of any information reported.

Welcome to San Francisco, and the 166th Annual Meeting of the American Psychiatric Association. This beautiful and unique city, with its vibrancy, cultural diversity, and excitement, provides a perfect setting for the scientific presentations.

Please note a few of the many exciting sessions featuring thought-provoking, stellar and engaging presenters from around the U.S. and the World! In a special Keynote Presentation, President Bill Clinton is one of the most highly anticipated presenters. The Program also includes Nobel Laureates Elizabeth H. Blackburn, Ph.D., Stanley B. Prusiner, M.D., and Andrew Schally, Ph.D., M.D. Acclaimed researchers-clinicians include Robert H. Lenox, M.D., Maria Oquendo, M.D., Irvin Yalom, M.D., Stephen Stahl, M.D., Nora Volkow, M.D., Gary S. Small, M.D., and Eric Nestler, M.D. Their lectures will explore topics ranging from genetics and cognition to new drug discovery to suicide.

Saturday evening’s Opening Session features a conversation between Dr.Jeste and noted academician and USC Gould School of Law Professor Elyn Saks, J.D., Ph.D., exploring her struggles and successes with schizophrenia and acute psychosis. Monday’s highlights include the premiere of award-winning filmmaker Delaney Ruston, M.D.’s new documentary on global mental healthcare and stigma “Hidden Pictures” as well as the Convocation Address by internationally respected neuroscientist Baroness Susan Greenfield of Oxford University. The Baroness also will lecture on Tuesday on the timely subject of digital technology and the developing young mind.

Always popular Media Workshops, Symposia, Poster Sessions, brief Scientific and Clinical Reports, Advances in, Small Interactive Sessions and more are scheduled throughout the meeting—over 400 sessions covering the range of topics possible in current psychiatric practice with the full diversity of patient populations. Seven tracks highlight psychiatry’s subspecialty areas as well as the DSM-5 and NIDA-sponsored sessions. In addition to the educational mission of the Annual Meeting, the extensive program endeavors to stimulate self-reflection, inspiration and affirmation about the state of our profession and ourselves as clinicians and professionals.

The APA Office of Scientific Programs, the Meetings and Conventions Department, along with the Scientific Program Committee, have endeavored to produce the best Annual Meeting ever for the benefit of the greatest asset the APA has: you, the General Member! We hope you are as excited as we are about the next 5 days. Thank you for your continued support of the APA mission for advocacy, education and research on behalf of our patients.

Sincerely,

Josepha A. Cheong, M.D.
Dear Colleagues and Guests:

Welcome to the 166th Annual Meeting of the American Psychiatric Association in San Francisco, “The City by the Bay.” “Pursuing Wellness across the Lifespan,” is the theme of this year’s meeting, which offers hundreds of sessions to learn the latest science, clinical advances, and promising practices from among the best in the field, as well as numerous networking and social opportunities.

The Opening Session will be on Saturday, May 18 from 4:30 – 5:30 p.m. and will be immediately followed by a special conversation between APA President Dilip Jeste, M.D., and Elyn Saks, J.D., Ph.D. Dr. Saks, who has schizophrenia, is an inspirational example of resilience in the face of a serious mental illness. She is the Orrin B. Evans Professor of Law, Psychology, and Psychiatry and Behavioral Sciences at the University of Southern California, a MacArthur Foundation Fellow, and author of the award-winning best-seller The Center Cannot Hold: My Journey Through Madness.

The annual American Psychiatric Foundation Benefit will be on Saturday from 7:00 – 10:00 p.m. (ticket required) at the City Club of San Francisco.

A special keynote address will be presented by President Bill Clinton on Sunday, May 19 from 5:30 – 6:30 p.m. The Convocation will be held on Monday from 5:30 – 6:30 p.m.

We are privileged to have among our presenters three Nobel Laureates: Elizabeth H. Blackburn, Ph.D., Nobel Prize winner in Physiology or Medicine (2009); Stanley B. Prusiner, M.D., Nobel Prize winner in Physiology or Medicine (1997); and Andrew V. Schally, Ph.D., M.D.H.C., Nobel Prize winner in Physiology or Medicine (1977).

We are delighted to partner once again with the National Institute on Drug Abuse (NIDA) to feature a series of sessions highlighting advances in research and treatment of substance use disorders. Other topical tracks featured at the meeting include: addiction, child and adolescent psychiatry, forensic psychiatry, geriatric psychiatry, psychosomatic medicine, integrated care, and military mental health.

The much-anticipated DSM-5, the latest revision of the Diagnostic and Statistical Manual of Mental Disorders, will be released at the meeting. An extensive series of sessions will help attendees understand key changes in the DSM-5 and their implications for practice, focusing on topics such as substance use disorders, autism, major depression, military mental health, and the cultural considerations. In addition, a full-day Master Course: DSM-5: What You Need To Know, will be presented by DSM-5 Task Force Chair David J. Kupfer, M.D., and Vice-Chair Darrel A. Regier, M.D., M.P.H. and members of the work groups on Saturday, May 18.

Meeting attendees can purchase the DSM-5 before it goes on sale to the public at the American Psychiatric Publishing (APP) bookstore in the Exhibit Hall. Attendees are also invited to meet the DSM-5 Task Force leaders at a special event at the APP bookstore on Saturday, May 18 from 4:00 to 5:00 p.m.

The always popular MindGames, APA’s national Jeopardy-like competition for residents, will take place on Tuesday at 6:00.

Many thanks go out to the Scientific Program Committee for its outstanding work under the leadership of chair Josepha Cheong, M.D. and to the APA staff members who have worked to develop an outstanding program for the 2013 Annual Meeting. Of course, we hope you’ll enjoy some of what San Francisco has to offer with its well-known landmarks and attractions such as Fisherman’s Wharf, the Golden Gate Bridge, and cable cars, along with a multitude of cultural and culinary delights.

Outstanding educational and networking opportunities await you at our 166th Annual APA meeting. On behalf of APA and the Scientific Program Committee, welcome to the meeting and enjoy an informative, enlightening week!

Sincerely,

Dilip V. Jeste, M.D.

Cable cars are still a popular mode of transportation.

Continuing Medical Education

Educational Objectives
At the conclusion of this meeting the participant will be able to:
1. Review new research findings in the fields of psychiatry and neuroscience and address gaps in knowledge;
2. Acquire new knowledge and skills in clinical psychiatry, which can be utilized to improve patient care;
3. Identify and remove barriers to the transfer of new knowledge for your practice, including provision of culturally competent care for diverse populations;
4. Assess a variety of treatment choices, including psychotherapeutic and pharmacological options; and
5. Recognize mental health service delivery issues, including barriers to care.

The APA is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. The APA designates this live activity for a maximum of 50 AMA PRA Category 1 Credits”. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Please note: Formats on the scientific program, as outlined below, have been approved for CME credit.
The scientific sessions on the official Annual Meeting program, with some exceptions, meet the criteria for AMA PRA Category 1 Credit”. Sessions in the following program formats are designated as category 1: Advances in... Series; Case Conferences; CME Courses; Focus Live; Forums; Lectures; Master Courses; Presidential Symposia; Scientific and Clinical Reports; Seminars; Small Interactive Sessions; Symposia; and Workshops.

New Research Poster Sessions are NOT designated for AMA PRA Category 1 Credit”. Located in Exhibit Hall A–C, Moscone Convention Center.

Scientific sessions are open to all Annual Meeting registrants with the exception of Case Conferences, which are open to APA members only. CME Courses and Master Courses require an additional fee.

To document CME credit earned at the Annual Meeting, participants should maintain a list of sessions they attended. Credit is earned on an hour-for-hour basis. A daily attendance log is provided in this book for listing your sessions and credits.

Course Enrollment
Ticket Purchase Is Required For All Courses. Located in Exhibit Halls A–C, Exhibit Level, Moscone Convention Center. The days and hours of operation are the same as registration. Course tickets not sold in advance will be available on-site at the Course Enrollment Area beginning at 12 noon on Friday. You must be registered for the meeting before you can enroll in courses.

Daily Bulletin
Located in Room 264 West Mezzanine, Moscone Convention Center, the Daily Bulletin accepts written requests from APA members for publicity of component, committee, and allied group events as space allows. Four issues are published. The issue for Saturday/Sunday is printed in advance. Scientific Session Capacity Guidelines
If overcrowding occurs in a scientific session we ask your assistance so that all in attendance can benefit. Please abide by the following guidelines if you are in a crowded room.
1. Take a seat as close to the front of the room as possible;
2. Move to the center of the room and fill all seats, so that chairs are available on the aisles for additional attendees;
3. Don’t stand or sit in the aisles or lean against walls. Overcrowding of meeting rooms may subject the session to shut down by the fire marshall; therefore, please either find a seat or attend another session; and
4. If there are no seats available, a DVD of the session might be available. Please check the DVD order form that is included with your registration materials.
Shuttle Bus Service
A 2013 Meeting badge is required to ride on the courtesy shuttle bus. Shuttle bus service will begin on Saturday, at approximately 7:00 a.m., and will operate daily throughout the meeting commensurate with the scientific program schedule and will conclude on Wednesday, at 5:30 p.m. The Moscone Convention Center will serve as the “hub” for all shuttle bus routes. The Shuttle Bus Desk is located in the South Lobby, Street Level, Moscone Convention Center. A detailed shuttle bus schedule will be available on site and will be posted in the lobbies of participating hotels.

Smoking Policy
No smoking is allowed anywhere in the Moscone Convention Center.

Tape Recording and Visual Reproduction Policies
Case Conferences and the Keynote Address may not be recorded. For other sessions, unless prohibited by the presenters, audio recording is permitted for personal use only. Attendees may use their own small, portable devices to audio record. Attendees are not permitted to photograph (including with cell phone cameras) or video any session because the intrusive nature of the recording may disrupt the session. Larger, professional recorders are not permitted except for use by registered members of the working press in accordance with APA Press Policies. APA has authorized a professional firm to record sessions. Badges of personnel representing this firm will clearly identify them.

The American Psychiatric Association requires disclosure by all program planners and presenters at CME activities of any financial or other affiliation with commercial organization(s) that may have a direct or indirect interest in the subject matter of the educational activity. A “financial interest” may include, but is not limited to: being an employee and/or being a shareholder in the organization; being on retainer with the organization; or having research or honoraria paid by the organization. An “affiliation” may include holding a position on an advisory committee, speakers’ bureau or some other role or benefit to a supporting organization.

In compliance with the ACCME’s Standards for Commercial Support, the APA has a management of conflict (MCI) process for all CME activities. This process ensures that all conflicts of interest are identified, managed and resolved prior to the educational activity. Additionally, the prospective audience must be informed of the presenters’ or program planners’ affiliations with every commercial interest by an acknowledgement in the printed program and verbal or visual disclosure to participants at the session (disclosure by slide or overhead is required if audiovisual equipment is used for the presentation). Disclosing to learners the relevant financial relationships that were present and resolved assists learners in assessing the potential for bias in the information that is presented. The APA also requires verbal disclosure of discussion of unlabeled uses of a commercial product or investigational use of a product not yet approved for this purpose.

The presenters and planners on the following pages indicated that either they or an immediate family member have a financial interest or other affiliation with a commercial entity producing, marketing, re-selling, or distributing health care goods or services consumed by or used on patients; the company name and affiliation is also listed. Providers of clinical service directly to patients are not considered to be commercial interests. The second group of presenters and planners indicated neither they nor an immediate family member has any significant relationship to disclose. All presenters and planners must complete a disclosure in order to participate in an APA CME activity. This disclosure listing includes the presenters of the Scientific Program and New Research Poster Sessions.

Advances In ... Series
These sessions are intended to highlight important new advances occurring in the field of psychiatry involving selected disorders or treatments. Some of these sessions are chaired by editors of recent textbooks published by the American Psychiatric Publishing, Inc. (APPI) and feature selected chapter authors from these texts. The books discussed at these sessions may be purchased at the APPI bookstore or online.
During the Advances in Research session presented on Monday, leading clinical researchers present the latest developments in research.
Another type of advances session, Advances in Medicine, includes sessions designed to provide psychiatrists with the latest in clinical developments in other areas of medicine. The intent is to give participants an update from a physician in a particular specialty. These sessions will help participants keep pace with the rapidly expanding knowledge base and technology in various branches of medicine.

Courses
Courses are designed to emphasize learning experiences that actively involve participants and include the opportunity for informal exchange with the faculty. Offered in four-hour (half-day), six-hour (full-day), and eight-hour (full-day) sessions, courses either review basic concepts in a special subject area or present advanced material on a circumscribed topic. Participants must purchase tickets to attend.

Debates
Experts in the field, including psychiatrists and non-psychiatrists, will debate a controversial topic in psychiatry. The debate format allows for members to hear both pro and con views about important, interesting and timely concerns for our members. Someone who has expertise in the topic area moderates the debate. A portion of the time is allocated for questions from the audience to the presenters with active participation by participants.

Focus Live
These 90-minute sessions allow participants to test their knowledge using an interactive Audience Response System (ARS), offering a new and entertaining way to learn. ARS sessions can make a group of 300 feel like they are having a small group consultation with an expert clinician. Experts, who served as guest editors of FOCUS, will lead lively multiple choice question-based discussions, and the audience will enter their answers with hand-held devices. Results are instantly tallied and projected on the screen.

Case Conferences
During these 90-minute sessions, clinical material is presented by videotape or the treating therapist. One or more experts then discuss the case.

The sessions are open to APA members only. A blue registration badge or an APA membership card are required for admittance.

Scientific and Clinical Report Sessions
Scientific and Clinical Reports are oral presentations of papers prepared for submission before publication. In this 90-minute format, reports are grouped by topic, with floor discussion from the audience following the presentation of each paper. There is no formal discussant.

Seminars
A format allowing for in-depth teaching and learning related to “niche” topics or covering issues which represent a service to the profession (e.g., impaired physician programs, patient suicide, etc.). It is also a venue for testing the feasibility of new course by offering the content free for the first year.

Small Interactive Sessions
(Includes sessions formerly known as discussion groups, roundtable discussion groups, research consultations, and master educator consultations.)
This 90-minute format allows small groups to meet informally with either selected experts in psychiatry to discuss topics chosen by the expert; to obtain consultations around problems in research from senior researchers; or utilize clinical material offered by the participants and hear, clinically-based seminars presented by outstanding educators. Some of these are reserved for residents only. These sessions are limited to 50 participants or less on a first-come, first-served basis.

Symposia
Symposia are three-hour sessions consisting of four to six presentations that are thematically linked and focus on a specific topic relevant to clinical psychiatry. They are designed to provide comprehensive treatment of a topic or discussion of the topic from several points of view by the participants and stimulate discussion with the audience.

Workshops
Workshops are 90-minute sessions, which typically involve brief presentations from individual panel members, followed by the opportunity for lively and informative discussion. This format provides for substantial audience participation and should be highly interactive.
Media Workshops are three-hour sessions held Saturday - Wednesday, in which a feature-length film is shown and discussed. Some of these sessions may be scheduled in the evening during the meeting (Saturday – Tuesday).
DAILY LOG FOR ATTENDANCE AT CME SESSIONS

166TH ANNUAL MEETING OF THE AMERICAN PSYCHIATRIC ASSOCIATION
MAY 18-22, 2013 • SAN FRANCISCO, CA

This form is for your records and not for submission. Use this page to keep track of your attendance. Reporting is on an honor basis, claim one credit for each hour of participation.

All scientific sessions listed in the Annual Meeting Program Book are designated for AMA PRA Category 1 Credits™, except for New Research Poster Sessions.

Total
Huda Akil, Ph.D., is the Gardner Quarton Distinguished University Professor of Neuroscience and Psychiatry and the co-Director of the Molecular and Behavioral Neuroscience Institute at the University of Michigan. Dr. Akil has made seminal contributions to the understanding of the brain biology of emotions, including pain, anxiety, depression, and substance abuse. Her current research investigates the genetic, molecular, and neural mechanisms underlying stress, addiction, and mood disorders. She is the author of more than 500 original scientific papers and has received numerous honors and awards, most recently the Sarnat International Prize in Mental Health from the Institute of Medicine (with S.J. Watson) (2012). In 2011 she was elected to the National Academy of Sciences and has served on the Council of the Institute of Medicine of the NAS.

Irvin Yalom, M.D., received his M.D. degree from Boston University School of Medicine and is Emeritus Professor of Psychiatry at Stanford University, where he was appointed to the faculty in 1963 and where he made some of his most lasting contributions on group and existential psychotherapy. Dr. Yalom’s classic, *The Theory and Practice of Group Psychotherapy* (currently in its 5th edition), has been the standard textbook for over four decades. In addition, Dr. Yalom is a critically-acclaimed author whose books include *Existential Psychotherapy, Staring at the Sun: Overcoming the Terror of Death, and The Gift of Therapy: An Open Letter to a New Generation of Therapists and Their Patients*, as well as the best-selling novels *The Spinoza Problem, The Schopenhauer Cure, When Nietzsche Wept,* and *Lying on the Couch.*

Sy Atezaz Saeed, M.D., M.S., is Chair of Psychiatric Medicine at East Carolina University and Chief of Psychiatry at Vidant Medical Center. SUNDAY
MAY 19
After leaving the White House, President Clinton established the William J. Clinton Foundation with the mission to improve global health, strengthen economies, promote healthier childhoods, and protect the environment by fostering partnerships among governments, businesses, nongovernmental organizations (NGOs), and private citizens to turn good intentions into measurable results. Today the Foundation has staff and volunteers around the world working to improve lives through several initiatives, including the Clinton Health Access Initiative, which is helping 4.5 million people living with HIV/AIDS access lifesaving drugs. The Clinton Climate Initiative, the Clinton Development Initiative, and the Clinton Giustra Sustainable Growth Initiative—are applying a business-oriented approach to fight climate change worldwide and to promote sustainable economic growth in Africa and Latin America. In the U.S., the Foundation is working to combat the alarming rise in childhood obesity through the Alliance for a Healthier Generation, and is helping individuals and families succeed and to increase small business growth in underserved communities through the Clinton Economic Opportunity Initiative. Established in 2005, the Clinton Global Initiative brings together global leaders to devise and implement innovative solutions to some of the world’s most pressing issues. So far, more than 2,100 Clinton Global Initiative commitments have improved the lives of 400 million people in 180 nations.
Andrew V. Schally, Ph.D., M.D.H.C., received his Ph.D. degree in endocrinology/biochemistry from McGill University. He joined the faculty of the Department of Pathology at the University of Miami Miller School of Medicine in 2006 and is currently Distinguished Leonard M. Miller Professor of Pathology and Director of the Endocrine, Polypeptide, and Cancer Institute. He is also a Distinguished Medical Research Scientist of the Department of Veterans Affairs. For his research on hypothalamic hormones, he received many honors and awards including the Nobel Prize in Physiology and Medicine in 1977. Dr. Schally has authored or co-authored more than 2,300 scientific publications in the field of endocrinology and oncology. He is continuing his work on the development of new therapies for cancer using various peptide analogs.

Ben Rush Lecture
Anne Harrington, Ph.D.
Sunday, 8:00 a.m.–9:30 a.m.

Anne Harrington, Ph.D., is Acting Chair, professor, and Director of Undergraduate Studies for the History of Science department, specializing in the history of psychiatry and neuroscience. She received her Ph.D. from Oxford University and has held postdoctoral fellowships at the Wellcome Institute for the History of Medicine (London) and the University of Freiburg (Germany). Currently, she serves on the Board of the Mind and Life Institute, an organization dedicated to cross-cultural dialogue between Buddhism and the brain sciences. She is co-editor of Biosocieties and the author of three books, Medicine, Mind and the Double Brain (1987), Reenchanted Science (1997), and The Care Within (2007). She has also published many articles and produced a range of edited collections including The Placebo Effect (1997). Research interests include the history of the neurological case history and the “inner world” of brain disorder.

APA Frontiers of Science Lecture
Andrew V. Schally, Ph.D., M.D.H.C.
Sunday, 8:00 a.m.–9:30 a.m.

Marc Galanter, M.D.

Marc Galanter, M.D., is a Professor of Psychiatry at New York University and was Founding Director of its Division of Alcoholism and Drug Abuse. He is senior editor of Substance Abuse and co-editor of the American Psychiatric Association’s Textbook of Substance Abuse Treatment. He has written three books—Cults: Faith, Healing, and Coercion, Network Therapy for Alcohol and Drug Abuse, and Spirituality and the Healthy Mind—and has published more than 200 peer-reviewed articles. His research has addressed network therapy for substance abuse, pharmacologic treatment for addiction, the psychology of Twelve-Step recovery, and spirituality in healthcare. Among his awards are APA’s Gold Achievement Award for innovation in clinical care and the Seymour Vestermark Award for Psychiatric Education, New York State’s Award for Psychiatric Research, and the Brinkley Smithers Award for Research from the American Society of Addiction Medicine.

Oskar Pfister Award Lecture
Marc Galanter, M.D.
Sunday, 10:00 a.m.–11:30 a.m.

Jan-Ake Gustafsson, M.D., Ph.D.

Jan-Ake Gustafsson, M.D., Ph.D., has been the Robert A. Welch Professor at the University of Houston and Director of the new Center of Nuclear Receptors and Cell Signaling since January 2009. Before that, he was professor of Medical Nutrition and Chairman of the Department of Biosciences and Nutrition at the Karolinska Institutet in Stockholm. Dr. Gustafsson’s early focus on the biochemistry of steroid receptors led to his discovery of the three-domain structure of the glucocorticoid receptor, its specific DNA binding, and its cloning. Dr. Gustafsson determined the first structure of the DNA-binding domain of a steroid receptor and discovered two novel receptors, liver X receptor beta (LXRβ) and the second estrogen receptor ERβ. Both ERβ and LXRβ have important functions in the central nervous system.

Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5)

American Psychiatric Association

This new edition of Diagnostic and Statistical Manual of Mental Disorders (DSM-5™), used by clinicians and researchers to diagnose and classify mental disorders, is the product of more than 10 years of effort by hundreds of international experts in all aspects of mental health. Their dedication and hard work have yielded an authoritative volume that defines and classifies mental disorders in order to improve diagnoses, treatment, and research.

The criteria are concise and explicit, intended to facilitate an objective assessment of symptom presentations in a variety of clinical settings—inpatient, outpatient, partial hospital, consultation-liaison, clinical, private practice, and primary care.

New features and enhancements make DSM-5™ easier to use across all settings:

• The latest findings in neuroimaging and genetics have been integrated into each disorder along with gender and cultural considerations.

• The revised organizational structure recognizes symptoms that span multiple diagnostic categories, providing new clinical insight in diagnosis.

• Specific criteria have been streamlined, consolidated, or clarified to be consistent with clinical practice.

• Dimensional assessments for research and validation of clinical results have been provided.

• Both ICD-9-CM and ICD-10-CM codes are included for each disorder.

The Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition, is the most comprehensive, current, and critical resource for clinical practice available to today’s mental health professionals.

**Elizabeth Blackburn, Ph.D.**

Elizabeth Blackburn, Ph.D., is the recipient of the 2009 Nobel Prize in Physiology or Medicine for her discoveries in telomere biology. She has been recognized for her contributions to the field with numerous prizes, awards, and honorary degrees, including the 2006 Albert Lasker Award for Basic Medical Research and election to the American Association for the Advancement of Science and the Institute of Medicine. In 2007, *Time* magazine named her one of the “100 Most Influential People in the World;” and in 2008, she was the North American Laureate for L’Oréal-UNESCO for Women in Science.

Dr. Blackburn is currently the Morris Herzstein Endowed Chair in Biology and Physiology in the Department of Biochemistry and Biophysics at the University of California, San Francisco, where she is working with human cells with the goal of understanding telomerase and telomere biology.

**APSA Award for Research in Psychiatry**

**Stephen R. Marder, M.D., Donald C. Goff, M.D., Daniel C. Javitt, M.D., Ph.D., Robert W. Buchanan, M.D.**

Monday, 9:00 a.m.–11:00 a.m.

Stephen R. Marder, M.D., received his degree from the State University of New York at Buffalo and subsequently joined the staff at the Brentwood VA Medical Center and the faculty at UCLA. His research has focused on the treatment of schizophrenia and the pharmacology of antipsychotic drugs. He is currently the Director of VISN 22 Mental Illness Research for the VA and Director of the Section on Psychosis at the UCLA Semel Institute for Neuroscience and Human Behavior. Dr. Marder is a member of the National VA Committee on the Seriously Mentally Ill. Among his numerous awards are the Exemplary Psychiatrist Award from the National Alliance for the Mentally Ill and the Wayne Fenton Award for Outstanding Clinical Care from the *Schizophrenia Bulletin*. He is listed in “The Best Doctors in America” and “America’s Top Doctors.”

Donald C. Goff, M.D., earned his medical degree at the University of California School of Medicine, Los Angeles. He established and was Director of the Schizophrenia Clinical and Research Program at Massachusetts General Hospital, which integrated pharmacology, cognitive behavioral therapy, neuroimaging, and genetics to enhance the understanding of the pathophysiology of schizophrenia and to develop new treatments. He relocated to NYU Medical Center in February 2012, is now Director of the Nathan Kline Institute and Vice Chair of Psychiatry, and is continuing his research on developing novel treatments for schizophrenia. Dr. Goff is the recipient of the Kempf Award for Mentorship in Biological Psychiatry from the American Psychiatric Association and the Stanley Dean Award for Research in Schizophrenia from the American College of Psychiatrists. Dr. Goff has published more than 200 articles concerning schizophrenia and related topics.

Daniel C. Javitt, M.D., Ph.D., earned his degrees from Albert Einstein College of Medicine and is currently Professor of Psychiatry and Neuroscience at Columbia University College of Physicians and Surgeons, where he directs the Division of Experimental Therapeutics as well as the Columbia Conte Center for Schizophrenia Research. His research focuses on mechanisms underlying negative symptoms and cognitive deficits in schizophrenia and other serious mental disorders. He has received numerous awards, most recently the Stanley Dean Award for Schizophrenia Research from the American College of Psychiatrists (2012). He holds patents for the use of glycine, D-serine, and glycine transport inhibitors in schizophrenia. Dr. Javitt currently serves on the editorial board of several prestigious journals and has published more than 250 articles on issues related to normal brain function, NMDA receptors, and schizophrenia.

Robert W. Buchanan, M.D. is Professor in the Department of Psychiatry, University of Maryland School of Medicine, Deputy Director of the Maryland Psychiatric Research Center, and Chief of the MPRC Outpatient Research Program. Major research interests include schizophrenia phenomenology and the development of novel pharmacological approaches for side effects of antipsychotic treatment. He has been involved in multiple aspects of the Measurement and Treatment Research to Improve Cognition in Schizophrenia project, including the identification of potential pharmacological targets for the treatment of cognitive impairments and the development of guidelines for conducting clinical trials of cognitive-enhancing drugs. He currently serves as an investigator in the Treatment and Evaluation Network for Experimental Targets in Schizophrenia. He has had an ongoing role in the development and update of the Schizophrenia Patient Outcomes Research Team psychopharmacological treatment recommendations.
tigate the toxic effects of drugs and their engineered use of brain imaging to investigate the role of neuroinflammation in Alzheimer’s disease and in those at risk of mild cognitive impairment.

Romina Mizrahi, M.D., Ph.D. is currently involved in research to develop a better understanding of the pathophysiology of schizophrenia and its treatment by using phenomenology and brain imaging techniques. That research aims to investigate the relationship between stress and psychosis by using positron emission tomography and experience sampling to examine the neurotransmitter dopamine in the brain and tap into daily experiences of stress and attenuated psychotic symptoms in persons at risk for psychosis, in those who misuse cannabis and experience psychotic symptoms, and in patients with schizophrenia; to understand the relation between neuroinflammation and brain function and structure; and to investigate the role of neuroinflammation in Alzheimer’s disease and in those at risk of mild cognitive impairment.

Jules Malcolm Ranz, M.D. has been director of the Columbia University Public Psychiatry Fellowship at New York State Psychiatric Institute, a nationally acclaimed model for public and community psychiatry fellowships, for the past 21 years. In 2011, Dr. Ranz created the University’s Program for Psychiatric Education to work with program directors in four NYC psychiatric residency training programs who have expressed interest in using his Four-Factor Model to augment the systems-based practices training they provide to their residents. Dr. Ranz supports fellowship alumni by nurturing the development of the joint NY Regional Chapters of the American Association of Community Psychiatrists and the American Association of Psychiatric Administrators. In the past four years, he has served on the selection committees of both the GAP and APA Public Psychiatry Fellowships (as Chair from 2010 to 2012.)

The William C. Menninger Memorial Convocation Lecture
Baroness Susan Greenfield, C.B.E., D.Phil.

Susan Greenfield is a neuro-scientist at the University of Oxford and has been awarded 30 Honorary Degrees from British and foreign universities. She heads a multi-disciplinary research group exploring novel brain mechanisms linked to neurodegenerative diseases. In addition, she has published a neuro-scientific theory of consciousness: *The Private Life of the Brain* (2003) and developed an interest in the impact of 21st Century technologies on how young people think and feel, as discussed in her book *ID: The Quest for Identity in the 21st Century* (2008). She further explores the neurobiological approach to identity in her latest book *You and Me: The Neuroscience of Identity*, (2011).

In 1998 Susan received the Michael Faraday Medal from the Royal Society. She was awarded a CBE in the Millennium New Year’s Honours List, and a non-political Life Peerage in 2001. Susan recently served as the Chancellor of Heriot Watt University (2005-2012). In 2000 she was elected to an Honorary Fellowship of the Royal College of Physicians and in 2007 to an Honorary Fellowship of the Royal Society of Edinburgh. Further recognition of her work includes L’Ordre National de la Légion d’Honneur and the American Academy of Achievement Golden Plate Award, both received in 2003, as well as the Australian Medical Research Society Medal, awarded in 2010. In 2011 she joined the Advisory Board of the Kusuma School of Biological Sciences at the Indian Institute for Technology, Delhi and in 2012 she became a Governor of The Florey Institute for Neuroscience and Mental Health.

Adolf Meyer Award Lecture
William T. Carpenter, Jr., M.D.
Tuesday, 9:00 a.m.–10:30 a.m.

William T. Carpenter, Jr., M.D., is a professor at the University of Maryland School of Medicine and Director of the Maryland Psychiatric Research Center. He obtained his medical degree from the Wake Forest University School of Medicine. Dr. Carpenter is Editor-in-Chief of Schizophrenia Bulletin and has authored more than 400 publications. His major professional interest is severe mental illness, especially schizophrenia. He provided expert testimony in the case of the United States v. John Hinckley, Jr. and was a member of the State Department delegation to inspect the political use of psychiatry in the Soviet Union. He chairs the work group on psychotic disorders in preparation of DSM-5. He has been the recipient of numerous awards and was elected to the Institute of Medicine of the National Academy of Sciences in 1998.

John Fryer Award Lecture
Caitlin Ryan, Ph.D., A.C.S.W.
Tuesday, 9:00 a.m.–10:30 a.m.

Caitlin Ryan, Ph.D., A.C.S.W. is a clinical social worker who has worked on lesbian, gay, bisexual, and transgender (LGBT) health and mental health for nearly 40 years. She is a graduate of Smith College School for Social Work. Her work has been recognized by the National Association of Social Workers, the National Association of People with AIDS, the Gay & Lesbian Medical Association, and the American Psychological Association, which gave her the Distinguished Scientific Contribution Award for groundbreaking research on LGBT youth and families. As Director of the Family Acceptance Project at San Francisco State University, Dr. Ryan and her team are developing an evidence-based family intervention model to strengthen and help ethnically and religiously diverse families support their LGBT children, maintain LGBT youth in their homes, decrease family rejection and health risks, and promote family acceptance and well-being.

Judd Marmor Award Lecture
David Braff, M.D.
Tuesday, 11:00 a.m.–12:30 p.m.

David Braff, M.D., is Professor of Psychiatry and Director of the Schizophrenia Program at the University of California, San Diego, School of Medicine. His research interests involve identifying inhibitory information processing deficits in psychiatric disorders and using translational and genetic research to identify the genetic architecture of neuropsychiatric disorders. He has treated many patients with schizophrenia and other serious mental disorders. Dr. Braff has published widely, sits on the editorial boards of the Archives of General Psychiatry and five other journals, and serves on many national and international committees and societies. He is currently the Executive Secretary of the Society of Biological Psychiatry. He has received numerous grants, awards, and prizes and has been selected as one of the “Best Doctors” in the United States and in San Diego.

APA Distinguished Psychiatrist Lecture
Maria A. Oquendo, M.D.
Tuesday, 11:00 a.m.–12:30 p.m.

Maria A. Oquendo, M.D., is Professor of Clinical Psychiatry and Vice Chair for Education in Psychiatry at Columbia University and the New York State Psychiatric Institute. Her expertise is in diagnosis, pharmacologic treatment, and neurobiology of bipolar disorder and major depression with an emphasis on suicidal behavior. She has received many awards including the Simon Bolivar Award from the APA (2010) and has twice received the Exemplary Psychiatrist Award from the National Alliance for the Mentally Ill. She was named Honorary Professor, Universidad Peruana Cayetano Heredia, Lima, Peru (2011). Dr. Oquendo is principal investigator on a study of suicidal behavior in affective disorders. She was recently awarded a T32 grant to implement a research fellowship program in Global Mental Health. She has authored or co-authored more than 220 peer-reviewed articles.

International Guest Lecture
Baroness Susan Greenfield, C.B.E., D.Phil.
Tuesday, 11:00 a.m.–12:30 p.m.

Susan Greenfield, C.B.E., D.Phil., is a neuroscientist at the University of Oxford. She has received over 30 honorary degrees and heads a multi-disciplinary research group exploring novel brain mechanisms linked to neurodegenerative diseases such as Alzheimer’s and Parkinson’s. She is an Honorary Fellow of the Royal College of Physicians and the Royal Society of...
Edinburgh. She was awarded the Michael Faraday Medal from the Royal Society, the L’Ordre National de la Légion d’Honneur, the Australian Medical Research Society Medal, a CBE in the Millennium New Year’s Honours List, and granted a non-political Life Peerage in 2001. Another interest is the impact of 21st century technologies on how young people think and feel, as discussed in her books *ID: The Quest for Identity in the 21st Century* and *You and Me: The Neuroscience of Identity* (2011).

**APA Frontiers of Science Lecture**

**Eric J. Nestler, M.D., Ph.D.**

**Tuesday, 1:30 p.m.–3:00 p.m.**

Eric J. Nestler, M.D., Ph.D., is Professor of Neuroscience at the Mount Sinai School of Medicine, where he serves as Chair of the Department of Neuroscience and Director of the Friedman Brain Institute. He received his advanced degrees from Yale University and served on the Yale faculty from 1987 to 2000 as Professor of Psychiatry and Neurobiology and Director of the Division of Molecular Psychiatry. He served as Distinguished Professor and Chair of the Department of Psychiatry at The University of Texas Southwestern Medical Center until moving to New York in 2008. Dr. Nestler’s research focuses on understanding the molecular mechanisms of addiction and depression in animal models and using this information to develop improved treatments for these disorders. Dr. Nestler is a member of the Institute of Medicine and a Fellow of the American Academy of Arts and Sciences.

**APA Guest Lecture**

**Robert K. Moyzis, Ph.D.**

**Tuesday, 3:30 p.m.–5:00 p.m.**

Robert K. Moyzis, Ph.D., is Professor of Biological Chemistry at the Institute of Genomics and Bioinformatics, University of California, Irvine, and is internationally known for his pioneering work on human genome organization and complex genetic disorders, including his discovery and molecular cloning of the human telomere. As Director of the Center for Human Genome Studies at Los Alamos National Laboratory, he helped initiate the worldwide Human Genome Project. His laboratory conducted some of the first genome-wide computational searches for recent Darwinian selection in humans. At UCI, his research focused on development and use of HGP technology to study complex disorders such as ADHD, autism, and Alzheimer’s disease.

**APA Distinguished Psychiatrist Lecture**

**Steve M. Stahl, M.D., Ph.D.**

**Tuesday, 3:30 p.m.–5:00 p.m.**

Stephen M. Stahl, M.D., Ph.D., is Adjunct Professor of Psychiatry, University of California San Diego and Chairman, Neuroscience Education Institute. APA JobCentral
Virtual Career Fair
June 18, 2013 • 12 pm-3 pm EST

The American Psychiatric Association would like to invite you to attend our first APA JobCentral Virtual Career Fair! APAJobCentral has been connecting employers and exceptional psychiatrists for over a year now. By creating this virtual event, we hope to start that initial conversation between your recruiting department and psychiatrists searching for that perfect career without anyone having to leave their home or office!

**Employer and Job Seeker Benefits**

As an employer, you are allowed up to four recruiters to showcase your open positions in your customized virtual booth. Your team will be able to engage in one-on-one online chats, view attendees’ resumes, work histories, and view optional profile pictures. A rating system is in place for you to score your interactions and record notes about each candidate! **Early-bird discounted booths and sponsorship packages available!**

As a job seeker, you will be able to interact live with recruiters and HR departments at each virtual booth. You are able to share your resume, experience, and schedule second-round interviews. By learning about all of the new opportunities available in one 3 hour time slot, you increase your job pool as you continue on the search for your first or next career opportunity! As with APA JobCentral, job seeker registration is **and always will be FREE.**

For detailed information on how you can register as an employer, contact Eamon Wood at ewood@pminy.com or 212-904-0363. If you are a job seeker, please visit APA JobCentral’s web page at jobs.psychiatry.org for more information.

The APA Exhibits Program is an integral component of the overall Annual Meeting and provides an excellent opportunity for meeting registrants to obtain the latest information on products and services related to the psychiatric profession.

Please allow adequate time in your daily schedule to visit the exhibits, which are located in Exhibit Hall A-C, Exhibit Level. At the exhibits you will have the opportunity to participate in interactive computer programs and speak with the representatives of companies who provide services and products related directly to psychiatrists’ professional and personal interests.

To assist in locating a particular company or product, a floor plan of the exhibit hall is included in the exhibits section of The Guide, along with a list of: 1) exhibitors with product/service description; 2) exhibitors by product/service listing; and 3) exhibitors listed alphabetically with booth numbers.

Hospitality Lounges
Two APA Cafés, serving complimentary coffee, are located throughout the exhibit hall. Please utilize these areas to relax and refresh during your time in the hall. The APA Cafés will also provide attendees with charging stations for cell phones and laptops, as well as free Wi-Fi.

Publishers’ Book Fair
Major publishers and book sellers, including the American Psychiatric Publishing, are located in this designated area. Participating companies are selling and taking orders for new and current professional books in the field of psychiatry.

Career Fair
Exhibitors in this area include: government agencies, hospitals, locum tenens, mental health clinics, psychiatric facilities, and recruiters seeking psychiatrists to fill open positions. Find the APA JobCentral, The Career Hub for Psychiatry, the ultimate recruitment tool for employers and job-seekers alike, located in the APA Member Center, next to the American Psychiatric Publishing Bookstore.

International Meeting Pavilion
The International Meeting Pavilion is an area in the exhibit hall comprised of international organizations and associations that will be holding international meetings outside of the U.S.

Endorsements
Products and services displayed in the exhibit hall occur by the contractual arrangement between the American Psychiatric Association and participating companies. This arrangement does not constitute or imply an endorsement by the American Psychiatric Association of these products or services.

Exhibit Hall Food Voucher
Save money and use your voucher (attached to meeting badge) redeemable for food/beverage at the concession areas inside the exhibit hall only (paid attendees only). Note: There is no cash value/cash back and vouchers are for one-time use only.
- Sunday, May 19 – Tuesday, May 21 during exhibit hall hours only.

Exhibit Hall Activities
Product Theaters will be held in the exhibit hall (Halls A-C, Exhibit Level). Check the schedule and plan to attend.
- APA Cafés with daily coffee service, along with free Wi-Fi and charging stations for cell phones and laptops.
- Food voucher ($10) provided to all paid attendees, good only in exhibit hall food courts during exhibit hall hours. Voucher is attached to badge (no replacements for lost vouchers and no cash value/cash back – one-time use).
