Dear APA Members and Guests:

Welcome to Philadelphia and the American Psychiatric Association’s 65th Institute on Psychiatric Services. This most-American of American cities, with its unique energy, cultural diversity and historic significance, provides an outstanding setting for this year’s scientific program. Over 120 sessions have been planned — featuring many and varied thought-provoking topics, the provision of the latest research, and presentations by expert speakers from across the U.S. and from around the world.

Registrants have, of course, numerous opportunities to attend the always popular workshops, symposia, and innovative programs, the OMNA on Tour sessions, as well as lectures by notable leaders in the field.

On Thursday, the Institute officially opens with keynote speaker, Estelle Richman, nationally-recognized expert on issues of behavioral health and children’s services and Senior Advisor to the Secretary for the U.S. Department of Housing and Urban Development. An afternoon highlight is “OC 87: The Obsessive Compulsive, Major Depression, Bipolar, Asperger’s Movie,” an inspirational film documenting one man’s realization of a life-long dream in spite of an on-going struggle with severe mental illness, hosted by filmmaker Bud Clayman and moderated by Lawrence Real, M.D.

On Friday, seminars in buprenorphine training and the psychiatric impact on HIV care and treatment are offered, as well as courses in psychopharmacology and CPT coding. In the afternoon, the popular Conversations format returns with special guest, former U.S. Congressman Patrick Kennedy, talking candidly about mental health issues with APA President Jeffrey Lieberman, M.D. In the evening, come enjoy food and drink with your colleagues at the American Association of Community Psychiatrist’s reception at the Philadelphia Hospital.

Saturday offers sessions on a variety of issues including veterans in crisis, bipolar disorder, integrated care, homelessness, racism/sexism, disaster response and a special course on DSM-5. And, in the afternoon, Dr. Jeffrey Lieberman hosts a forum that all residents and early career psychiatrists won’t want to miss.

Sunday’s highlights include a very special session, Five Decades of Community Mental Health, featuring a lively panel discussion with some of the well-known figures involved in the evolution of community mental healthcare and a special screening of the award-winning documentary film on global mental healthcare and stigma, “Hidden Pictures – The Underexposed World of Global Mental Health,” hosted by filmmaker Delaney Ruston, M.D.

The APA Office of Scientific Programs and the Meetings and Conventions Department, along with the Scientific Program Committee, have put together a terrific line-up of sessions which, I am certain, will be an outstanding educational and professional experience for you. Again, welcome and best wishes for an informative and enlightening meeting!

Sincerely,

Altha J. Stewart, M.D.
Scientific Program Chair

Scientific Session Capacity Guidelines
If overcrowding occurs in a scientific session we ask your assistance so that all in attendance can benefit. Please abide by the following guidelines if you are in a crowded room:
- Take a seat as close to the front of the room as possible;
- Move to the center of the row and fill all seats, so that chairs are available on the aisles for additional attendees;
- Don’t stand or sit in the aisles or lean against walls. Overcrowding of meeting rooms may subject the session to shut down by the Fire Marshall; therefore, please either find a seat or attend another session.

Smoking Policy
The Philadelphia Marriott Downtown has a smoke-free policy.

Tape Recording and Visual Reproduction Policies
Case Conferences and the Keynote Address may not be recorded. Unless prohibited by the presenters, audio recording is permitted for personal use only. Attendees may use their own small, portable devices to audio record. Attendees are not permitted to photograph (including with cell phone cameras) or video any session because the intrusive nature of the recording may disrupt the session. Larger, professional recorders are not permitted except for use by registered members of the working press in accordance with APA Press Policies. APA has authorized a professional firm to record sessions. Badges of personnel representing this firm will clearly identify them.

WiFi
Free WiFi can be found at the APA Café in the Exhibit Hall, as well as in the hotel lobby or public areas of the Marriott.
In the heart of the business district and in the heart of America’s historic quest for liberty, this grand hotel commands a towering presence. Walk to the finest restaurants, shopping, and entertainment Philadelphia offers. Convention Center via skybridge, and hallmark Marriott service awaiting you, your event is in outstanding hands.
Educational Objectives
The educational objectives are to:
1. Present the most current clinical information on severe mental illness – diagnosis and treatments;
2. Identify and improve mental health disparities in the community;
3. Demonstrate and apply new skills that will be useful in public psychiatry settings;
4. Examine how the current health care system affects patient care;
5. Learn about clinical innovations to improve patient care.

Target Audiences
Psychiatrists and Other Physicians, Administrators and Managers; Addiction Counselor, Advocates and Policymakers; Consumer and Family Members; Educators, Faculty, and Training Directors; Medical Students and Residents; Nurses; Planners, Researchers, and Evaluators; Psychologists; Rehabilitation Counselors; and Social Workers.

Continuing Medical Education for Physicians Accreditation/Designation
The American Psychiatric Association (APA) is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The APA designates this live activity for a maximum of 27 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

The American Psychiatric Association requires disclosure by all program planners and presenters at CME activities of any financial or other affiliation with commercial organization(s) that may have a direct or indirect interest in the subject matter of the educational activity. A “financial interest” may include, but is not limited to: being an employee and/or being a shareholder in the organization, being on retainer with the organization; or having research or honoraria paid by the organization. An “affiliation” may include holding a position on an advisory committee, speakers’ bureau or some other role or benefit to a supporting organization.

In compliance with the ACCME’s Standards for Commercial Support, the APA has a management of conflict (MCI) process for all CME activities. This process ensures that all conflicts of interest are identified, managed and resolved prior to the educational activity. Additionally, the prospective audience must be informed of the presenters’ or program planners’ affiliations with every commercial interest by an acknowledgement in the printed program and verbal or visual disclosure to participants at the session (disclosure by slide or overhead is required if audiovisual equipment is used for the presentation). Disclosing to learners the relevant financial relationships that were present and resolved assists learners in assessing the potential for bias in the information that is presented. The APA also requires verbal disclosure of discussion of unlabeled uses of a commercial product or investigational use of a product not yet approved for this purpose.

The presenters and planners on the following pages indicated that either they or a spouse/partner have a financial interest or other affiliation with a commercial entity producing, marketing, re-selling, or distributing health care goods or services consumed by or used on patients; the company name and affiliation is also listed. Providers of clinical service directly to patients are not considered to be commercial interests. The second group of presenters and planners indicated neither they nor a spouse/partner has any relationship to disclose.

All presenters and planners must complete a disclosure in order to participate in an APA CME activity. This disclosure listing includes the planners and presenters of the Scientific Program and Poster Sessions.

Program Format Descriptions

**Courses**  Courses are designed so that the attendee will be able to master new material in depth. The courses also offer practical learning experiences that actively involve attendees and include the opportunity for informal exchange with the faculty. Offered in four- or six-hour sessions, courses either review basic concepts in a specialized subject area or offer advanced material on a circumscribed topic. Courses require an additional fee.

**Forums**  This format provides attendees with an informal setting to share information, discuss concerns and develop possible solutions related to challenges faced in specific areas of mental health care.

**Innovative Programs**  These formal presentations will feature presenters who will describe creative, effective and provocative programs that work in their facilities. Each presenter is allotted 20 minutes to present a description of his/her work, followed by 10 minutes of discussion. This format is grouped, by topic, with two other proposals and presented at a 90-minute session conducted by a chairperson selected by the Scientific Program Committee.

**Lectures**  This format features a small number of distinguished speakers who will make formal presentations on scientific and cultural topics, which extend our understanding beyond the usual limits. Lecturers are invited by the Scientific Program Committee.

**Posters**  These informal presentations provide presenters the opportunity to post new results, research advances, new program features or model program information.

**Seminars**  Seminars are designed so that the attendee will be able to master new material in depth. The seminars also offer practical learning experiences that actively involve attendees and include the opportunity for informal exchange with the faculty. Offered in half- or full-day sessions, seminars either review basic concepts in a specialized subject area or offer advanced material on a circumscribed topic. Seminars do not require an attendance fee.

**Symposia**  These three-hour or 90-minute sessions are thematically linked and focus on a specific topic relevant to clinical psychiatry or systems of care. They are designed to provide a more formal, didactic approach to the topic and present it from several points of view to stimulate discussion.

**Workshops**  These sessions typically involve brief presentations from individual panel members, followed by the opportunity for lively and informative discussion. This format provides for substantial audience participation and should be highly interactive.

**ALL CHANGES TO THE PROGRAM ARE POSTED ON THE BULLETIN BOARD IN THE FOYER OUTSIDE OF FRANKLIN HALL, LEVEL 4.**
Raquel E. Gur, M.D., Ph.D., is Professor of Psychiatry, Neurology, and Radiology at the University of Pennsylvania Perelman School of Medicine where she directs the Neuropsychiatry Section and the Schizophrenia Research Center and is Vice Chair of Research Development in the Department of Psychiatry. Her combined training in Psychology, Neurology and Psychiatry has provided the tools to pursue an academic career working with basic and clinical neuroscientists to advance the understanding of schizophrenia. In directing these research endeavors, she has interacted with scientists of diverse backgrounds, conducted collaborative interdisciplinary research, mentored junior faculty and trainees, and has come to know many patients and their families. She is a member and has served in organizations including the Institute of Medicine of the National Academy of Sciences, the NIMH Council and the American Psychiatric Association task forces including the DSM-5 Psychosis work group. She is Past President of the Society of Biological Psychiatry and President Elect of the American College of Neuropsychopharmacology. NIMH has supported her research efforts and she has over 300 publications in peer-reviewed journals.

Fran Silvestri is Director of the International Initiative for Mental Health Leadership (IIMHL), which he founded in 2003. IIMHL is jointly funded by seven countries, including the United States, to build partnerships between mental health leaders in order to rapidly exchange knowledge of best and promising practices internationally. Before his work with IIMHL, Fran was CEO of Monadnock Family Services (MFS) in Keene, NH, for 10 years. In this role he looked internationally to identify, and then replicate, innovative services that promote recovery and social inclusion for long term consumers of mental health services. Such services have included the Wyman Way Cooperative, an independent, non-profit corporation managed and operated by long-term consumers of mental health services (based on an Italian model), and the Elm City Cooperative, where consumers own their own homes. Fran also led the development of Monadnock Partnership; a region-wide, integrated service linking health care, social services and economic development.

Howard H. Goldman, M.D., Ph.D., is Professor of Psychiatry at the University of Maryland School of Medicine. Dr. Goldman received joint M.D. - M.P.H. degrees from Harvard University in 1974 and a Ph.D. in social policy research from the Heller School at Brandeis University in 1978. He is the author or co-author of 300 publications in the professional literature. Dr. Goldman is the editor of Psychiatric Services, a mental health services research and policy journal published monthly by the American Psychiatric Association. He has been on the editorial boards of several other journals, including the American Journal of Psychiatry and the Journal of Mental Health Policy and Economics. Dr. Goldman directed the MacArthur Foundation Network on Mental Health Policy Research for a decade ending in 2009. He served as the Senior Scientific Editor of the Surgeon General’s Report on Mental Health from 1997-1999 for which he was awarded the Surgeon General’s Medallion. During 2002 and 2003 Dr. Goldman was a consultant to the President’s New Freedom Commission on Mental Health. In 1996 he was elected to membership in the National Academy of Social Insurance, and in 2002 he was elected to the Institute of Medicine.

Pamela Hyde, J.D. was nominated by President Barack Obama and confirmed by the U.S. Senate in November 2009 as Administrator of the Substance Abuse and Mental Health Services Administration (SAMHSA), a public health agency within the Department of Health and Human Services. Ms. Hyde is an attorney and comes to SAMHSA with more than 35 years experience in management and consulting for public healthcare and human services agencies. She has served as a state mental health director, state human services director, city housing and human services director, as well as CEO of a private non-profit managed behavioral healthcare firm. In 2003, she was appointed cabinet secretary of the New Mexico Human Services Department by Governor Bill Richardson, where she worked effectively to provide greater access to quality health services for everyone.
All education sessions are held in the Philadelphia Marriott Downtown.

Lisa Dixon, M.D., M.P.H., is Professor of Psychiatry at the Columbia College of Physicians and Surgeons, Columbia University and directs the Center for Practice Innovations (CPI) at the New York State Psychiatric Institute. As CPI director, she oversees key activities for New York State’s Office of Mental Health in implementing evidence based practices for persons diagnosed with serious mental illness. She is currently the Principal Investigator of the NIMH-funded Recovery After Initial Schizophrenia Episode Implementation and Evaluation Study (RAISE-IES) and New York State’s OnTrack-NY program designed to develop and implement early intervention services for individuals experiencing non-affective psychosis across the State. Dr. Dixon’s work has joined individuals engaged in self-help, outpatient psychiatric care, as well as clinicians and policy makers in collaborative research endeavors. In addition, Dr. Dixon is the current editor of a column in Psychiatric Services dedicated to Public-Academic partnerships. She practices psychiatry at a local community mental health center and has been a Vice Chair of the University of Maryland IRB for nine years.

Arthur C. Evans Jr, Ph.D. is the Commissioner of Philadelphia’s Department of Behavioral Health and Intellectual
disAbility Services (DBHIDS), a $1 billion healthcare agency. In this capacity, he is leading a major initiative to transform how behavioral health care and intellectual disability services are delivered in the city. Since Dr. Evans’ appointment in November 2004, Philadelphia has begun a transformation of its system to one that focuses on recovery for adults, resilience for children and self-determination for all people with intellectual disabilities. Dr. Evans is a clinical and community psychologist. He holds a faculty appointment at the University of Pennsylvania School of Medicine. He has also held faculty appointments at the Yale University School of Medicine and Quinnipiac University. Dr. Evans has extensive experience in transforming systems of care while serving in several national leadership roles. Dr. Evans is highly committed to serving people who are underserved and ensuring that all people have access to effective, quality services.

William R. McFarlane, M.D. is the Director of the Center for Psychiatric Research at Maine Medical Center in Portland, Maine. Dr. McFarlane is also Director of the Portland Identification and Early Referral Program and the Early Detection and Intervention for the Prevention of Psychosis Program. He is also a Professor at Tufts University School of Medicine. His areas of research and practice include Family Psychoeducation and other psychosocial interventions for severe psychiatric disorders, as well as pioneering efforts in the area of early detection and intervention of psychotic disorders in youth and young adults. Dr. McFarlane teaches family therapy and the psychobiology of mental illnesses to medical students and residents at Maine Medical Center in partnership with the Tufts University School of Medicine. Dr. McFarlane received his medical degree from Columbia University, College of Physicians and Surgeons and completed his residency and fellowship at Albert Einstein College of Medicine.

David A. Pollack, M.D., is Professor for Public Policy in the departments of Psychiatry and Public Health, Family Medicine, and Preventive Medicine and the Division of Management at Oregon Health and Science University (OHSU), Portland, Oregon. His activities include teaching, writing, and consulting on policy, systems, and medical leadership issues to various local, state, and national organizations. He also consults on services research projects. Dr. Pollack has worked as a community and public psychiatrist in Oregon for over 39 years. Since 2007, he has been a key participant in efforts to expand health reform in Oregon. In particular, he has worked on the implementation of Patient-Centered Primary Care Homes, integration of behavioral health with primary care, and the development of a competent and sufficient workforce to meet the needs of a reformed health system. He has been a member of the faculty at OHSU since 1987. He was Associate Director of the Public Psychiatry Training Program from 1987-2006. He continues to teach and mentor medical students, social work students, residents, and early career faculty for that program and others within OHSU. He has been a member of the American Association of Community Psychiatrists (AACP) since its inception, has been an active member of its board, and chair of the Program Committee, since 1990.

Ezra S. Susser, M.D., Dr.PH., focuses on two main areas. One is examining the role of early life experience in health and disease throughout the life course. He heads the Imprints Center for Genetic and Environmental Lifecourse Studies, which fosters collaborative research and intellectual exchange among investigators studying developmental origins in birth cohorts across the globe. The other is global mental health. He is a co-founder of the Global Mental Health Program at Columbia. Much of Dr. Susser’s early work focused on the course of schizophrenia and especially on social outcomes. In his early research career he was involved in follow-up studies of psychoses in the United States and across the globe, including the WHO International Study of Schizophrenia. He also conducted studies of homelessness and its prevention among patients with schizophrenia. This work included the development and testing of the initial version of Critical Time Intervention (CTI) for prevention of recurrent homelessness.

Mark Ragins, M.D. is the Medical Director at the MHA Village Integrated Service Agency in Long Beach, California, an award winning model of recovery based mental health care. He has

Jeremy A. Lazarus, M.D., a psychiatrist in private practice in Denver, was elected 167th president of the American Medical Association in June, 2012, and now serves in AMA leadership as Immediate Past-President. He was only the third psychiatrist elected AMA president, and the first since 1939. Dr. Lazarus graduated from Northwestern University and received his medical degree from the University of Illinois College of Medicine. A seeker of consensus, he has served as president of the Arapahoe County Medical Society, the Colorado Psychiatric Society, the Colorado Medical Society, the speaker of the American Psychiatric Association Assembly and vice-speaker and speaker of this AMA House of Delegates. Widely published on issues of ethics, economics and managed care, his most recent book is *Entering Private Practice: A Handbook for Psychiatrists*. A clinical professor of psychiatry at the University of Colorado Denver School of Medicine, Dr. Lazarus also teaches at the University of Miami Leonard M. Miller School of Medicine.

Benjamin Druss, M.D.

As the first Rosalynn Carter Chair in Mental Health at Emory University, Druss is working to build linkages between mental health, general medical health, and public health. He works closely with The Carter Center Mental Health Program, where he is a member of the Mental Health Task Force and Journalism Task Force. He has been a member of two Institute of Medicine committees and has served as an expert consultant to the Substance Abuse and Mental Health Services Administration, the Centers for Disease Control and Prevention, and the Assistant Secretary for Planning and Evaluation. Druss’s research focuses on improving physical health and health care among persons with serious mental disorders. He has published more than 100 peer-reviewed articles on this and related topics, including—in 2001—the first randomized trial of an intervention to improve medical care in this population. His research is funded by grants from the National Institute of Mental Health and the Agency for Healthcare Quality and Research, and he serves as a standing member of an NIMH study section. He has received a number of national awards for his work, including the American Psychiatric Association Early Career Health Services Research Award, the AcademyHealth Article-of-the-Year Award, and the AcademyHealth Alice S. Hersh New Investigator Award.

Jagannathan Srinivasaraghavan (Ashok Van), M.D., Distinguished Fellow of the American Psychiatric Association will receive the George Tarjan Award at the annual meeting of the Institute of Psychiatric Services in October 2013. The Tarjan Award is awarded by the APA to a member who has served at advancing the causes of International Medical Graduates in the field of psychiatry. George Tarjan had gained national distinction as one of the chief designers of research, training and service delivery programs for the National Institute of Child Health and Human Development. Dr. Tarjan, a researcher, educator and psychiatrist, dedicated his life to improving mental health of children and adolescents in the US. Dr Ashok Van a native of India is a past president of the Illinois Psychiatric Society. He has had a distinguished career in the United States, specifically oriented towards the forensic psychiatry area in which he is a subspecialist, his educational activities in different academic centers, and particularly his devoted work with international medical graduates. In effect, he has mentored numerous IMGs in education, research, publications, and general career advancement. He has taught courses related to acculturation on IMGs and has taught and trained IMGs. He has always deployed great joviality, warmth, and close dedication to his duties.
All education sessions are held in the Philadelphia Marriott Downtown.

Fred R. Volkmar, M.D., is the director of the Yale Child Study Center and the Irving B. Harris Professor of Child Psychiatry, Psychiatry, Pediatrics, and Psychology at Yale University. Four years after completing his residency at Stanford, Dr. Volkmar received a Fellowship in Child Psychiatry at the Yale University’s School of Medicine and has been there ever since. He has dedicated his career to understanding and treating children with developmental disorders and is a leader in the field of autism research. He has served as a teacher and mentor to others who are now leaders in the field. Dr. Volkmar’s grants and publications run just short of 100 pages in his CV. He is a gifted clinician and teacher and his contributions have greatly improved the lives of children suffering from developmental disorders and their families.

Elissa Benedek, M.D. is a past president of APA, and has spent her career studying and treating violent behavior in children, adolescents, and adults. She is a Clinical Professor of Psychiatry at Wayne State University and Michigan State University, and an Adjunct Clinical Professor of Psychiatry at the University of Michigan. Dr. Benedek is also the author of numerous books on the forensic evaluation of children and adolescents, as well as two books for children.

Michael R. Phillips, M.D., M.P.H., is a Canadian citizen who has been a permanent resident of China for 30 years. He received a BSc (psychology) from McGill University, an MD from McMaster University and an MA (anthropology) and MPH (epidemiology) from the University of Washington. He completed his psychiatric residency training at the University of Washington followed by a two-year Robert Wood Johnson Research Training Fellowship. He is currently Director of the Suicide Research and Prevention Center and the Research Methods Consultation Center of the Shanghai Mental Health Center at Shanghai Jiao Tong University School of Medicine, the Executive Director of the WHO Collaborating Center for Research and Training in Suicide Prevention at Beijing Hui Long Guan Hospital, Professor of Psychiatry and Global Health at Emory University (USA), Professor of Clinical Psychiatry and Clinical Epidemiology at Columbia University (USA), Visiting Professor at Peking Union Medical College (PUMC), advisor on mental health issues in China for the WHO, Treasurer of the International Association for Suicide Prevention, Co-Editor-in-Chief of the Shanghai Archives of Psychiatry, and editorial consultant for The Lancet. Dr. Phillips is currently PI on a number of multi-center collaborative projects on suicide, depression and schizophrenia.

Inpatient Child/Adolescent Psychiatrist

Child/Adolescent Psychiatrist needed to join an expanding clinical service at our Westport, CT campus. Responsibilities include inpatient care of adults and a small percentage of adolescents.

Minimal weekend and call requirements. Our 76-bed hospital has adult, geriatric, women’s, addiction, and child/adolescent services, and is affiliated with St. Vincent’s Medical Center in Bridgeport, CT and the University of Connecticut.

In addition to the inpatient services in Westport, the St. Vincent’s behavioral health service line includes a 16-bed psychiatric unit at the Medical Center in Bridgeport. The combined service offers 92 behavioral health inpatient beds for treating children, adolescent, and adults with mental health and substance abuse issues. This makes the inpatient behavioral health service line of St. Vincent’s one of the largest in Connecticut, serving approximately 2,350 individuals annually.

Job responsibilities may be tailored to suit specific skill areas or interests.

Outpatient Psychiatrist

St. Vincent’s Behavioral Health Services, Department of Psychiatry, is seeking a full time Outpatient Psychiatrist. This position will be responsible to assess, diagnose and treat psychiatric conditions on an outpatient basis. The applicant will also be responsible for some leadership duties including working with the outpatient administrator to help create innovative ideas for outpatient programming and supervision. Take advantage of the opportunity to creatively assist with growing this outpatient program.

This is a full time, 40 hour per week position, that offers excellent compensation and benefits.

Inpatient Adult Psychiatrist

St. Vincent’s Behavioral Health Services is seeking an Inpatient, Adult Psychiatrist for our Medical Center located in Bridgeport, CT. This position will provide diagnostic assessment and psychiatric treatment to a mostly adult population. Coverage will be on an inpatient basis to include the Emergency Department. Board Certification or Board Eligibility in Psychiatry is required, and geriatric experience is preferred. This is a full time, 40 hour per week, position scheduled Monday – Friday with minimal call coverage.
