May 3, 2008

Dear Colleagues and Guests:

Welcome to the 161st Annual Meeting of the American Psychiatric Association. Our Annual Meeting is the largest psychiatric meeting in the world, and we have planned a full and exciting week of educational, networking, and social opportunities for you.

Our theme this year is “Our Voice in Action: Advancing Science, Care, and the Profession,” and the meeting itself is organized around these areas. There are many outstanding scientific presentations, addressing the newest advances and their influence on patient care. Dr. Thomas Insel, Director of the National Institute of Mental Health and his staff have planned an extensive track of sessions integrating research and clinical care, scheduled throughout the meeting. World famous scientists will present their latest research, and there will be multiple opportunities for small group discussions with senior clinicians and educators. Additionally, sessions address subspecialties such as geriatric psychiatry, addictions, forensic psychiatry, and consultation-liaison psychiatry, as well as child and adolescent care. There are workshops and symposia on issues such as mental health care for returning military, college mental health, practical psychopharmacology, new directions in psychotherapy, electronic health records, and ethics, to list only a few. You can test yourselves at the “Focus: Live” sessions or watch “MindGames,” a Jeopardy-like contest for residents, and of course, find time to enjoy the many wonderful museums, sites, and restaurants of my home town, Washington, D.C.

Please join me at the Opening Session Sunday from 5:00 p.m. to 6:30 p.m., when we officially welcome world leaders and all attendees, and plan to attend the Convocation of Distinguished Fellows Monday at 5:30 p.m., when we will honor colleagues being inducted as Fellows, the APA award winners. The William C. Menninger Memorial lecture will be presented at the Convocation by Dr. Oliver Sacks, neurologist and acclaimed author of *Awakenings*, *The Man Who Mistook His Wife for a Hat*, and *Musicophilia*.

Producing such a rich and full meeting demands much work, and a strong collaboration between members and staff. I especially appreciate the efforts of Dr. David Baron and the members of the Scientific Program Committee, and the many APA staff who are dedicated to the success of this outstanding meeting.

Have a wonderful week!

Sincerely,

A handwritten signature in black ink that reads "Carolyn B. Robinowitz M.D." The signature is written in a cursive style.

May 3, 2008

Dear APA Members and Guests:

Welcome to Washington, D.C., and the 161st Annual Meeting of the American Psychiatric Association. I anticipate that this terrific city, and its fantastic weather, will provide a perfect setting for the scientific presentations we have planned. As you read through the *Program Book*, you will notice a number of sessions related to the theme "Our Voice in Action: Advancing Science, Care, and the Profession," chosen by our President, Dr. Carolyn B. Robinowitz. Let me draw your attention to just a few of the many exciting sessions presented this week, including several Presidential Symposia, which will be presented Monday-Wednesday, from 2:00 p.m.-5:00 p.m.

The Business Meeting and the Opening Session will be held at the Washington Convention Center on Sunday, May 4. The Convocation of Distinguished Fellows also will be held there, on Monday evening, May 5, 5:30 p.m. - 6:30 p.m. During the Convocation, Oliver Sacks, M.D. will present the William C. Menninger Memorial Lecture.

A great way to begin this year's meeting is to attend the "Advances in Series," which will focus on the latest advances in neuropsychiatry and clinical neurosciences, C-L psychiatry and psychosomatic medicine, geriatric psychiatry, and psychiatric disorders. We have also combined the Master Educator Consultations, Discussion Groups, and Research Consultations into Small Interactive Sessions, consisting of 15 clinically-based seminars with outstanding clinician educators. These sessions are held Monday through Wednesday.

This year, we have a special series of sessions that will be presented in collaboration with the National Institute of Mental Health. Outstanding leaders in psychiatry and neuroscience research will present across formats from lectures to symposia and workshops. The APA is extremely appreciative of their support of these sessions. For detailed information on the sessions, please consult the separate program on this series, which is included in your registration packet.

It is extremely important that you fill out and return the evaluation forms for this meeting. The members of the Scientific Program Committee are interested in your opinion regarding the quality of the content of the Annual Meeting. The information we obtain will be used to plan next year's Annual Meeting. Once again, welcome to Washington, D.C. I look forward to sharing a week of exciting and professionally rewarding activities with you.

Sincerely,

David Baron, Ms.Ed., D.O.

Visitors can also purchase or renew subscriptions to all APA/APPI journals at the booth. Complimentary copies of *Psychiatric News* will be available at stands located throughout the Washington Convention Center. Persons who wish to contact editors or reporters of *Psychiatric News* are asked to leave a message on the message board in the Annual Meetings Office located in Room 209A, Level Two. Written announcements, suggestions for articles, letters to the editor, or other material for the newspaper's consideration may be left with staff at the Periodicals Exhibit.

## CONTINUING MEDICAL EDUCATION

**Educational Objectives:** At the conclusion of this meeting, participants will be able to:

- Review new research findings in the fields of psychiatry and neuroscience and address gaps in knowledge.
- Acquire new knowledge and skills in clinical psychiatry, which can be utilized to improve patient care;
- Identify and remove barriers to the transfer of new knowledge for their practice, including provision of culturally competent care for diverse populations;
- Assess a variety of treatment choices, including psychotherapeutic and pharmacological options; and
- Recognize mental health service delivery issues, including barriers to care.

The APA is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The APA designates this educational activity for a maximum of 66 *AMA PRA Category 1 Credits*.™ Physicians should only claim credit commensurate with the extent of their participation in the activity.

**Please note: Most portions of the scientific program, as outlined below, have been approved for CME credit.** The scientific sessions on the official Annual Meeting program, with some exceptions, meet the criteria for *AMA PRA Category 1 Credit*.™ Sessions in the following program formats are designated as category 1:

Advances in... Series, Case Conferences, CME Courses, Focus Live, Forums, Industry-Supported Symposia, Lectures, Presidential Symposia, Scientific and Clinical Reports, Small Interactive Sessions, Symposia, and Workshops. Other scientific sessions not listed may be reported as category 2 (Debates and New Research Poster Sessions). Scientific sessions are open to all Annual Meeting registrants, except for the Case Conferences, which are open to APA members only.

**PLEASE NOTE: APA MEMBERS ARE REQUIRED TO MAINTAIN THEIR OWN RECORDS OF CME HOURS. REPORTING OF CME CREDIT IS ON AN HONOR BASIS.**

To document CME credit earned at the Annual Meeting, participants should maintain a list of sessions they attended. Credit is earned on an hour-for-hour basis. A page for listing your sessions and credits is provided in the syllabus.

The **Certificate of Attendance** (or copy) may be forwarded to other organizations requiring verification of participation in the APA Annual Meeting.

The APA requires members to participate in a total of 150 credits of CME activities within a three-year reporting period. At least 60 credits must be in *AMA PRA Category 1 Credit*.™ activities.

CME report forms may be obtained from the Department of CME at the APA or online at [www.psych.org](http://www.psych.org). A *CME Certificate of Compliance* is awarded to APA Members who complete the report. Staff will be available in the APA Member Center to answer any of your questions about CME.

## ANNUAL MEETING EVALUATION

The Annual Meeting Scientific Program Committee needs your recommendations and evaluations to plan next year's Annual Meeting. The **General Evaluation** is available online at the CME Certificate of Attendance Booth located in Hall B, Lower Level, Washington Convention Center.

By completing the **General Evaluation**, you will receive a **personalized Certificate of Attendance**. The certificate can be obtained either on-site by visiting the CME Certificate of Attendance Booth OR attendees may access the web-based evaluation from their own computer during or after the meeting by visiting [www.psych.org](http://www.psych.org) and browse the Lifelong Learning & CME section. **PLEASE NOTE: APA NO LONGER OFFERS PAPER GENERAL EVALUATION FORMS FOR THE ANNUAL MEETING.**

## SESSION CAPACITY

So that all in attendance may benefit, we ask your assistance when overcrowding occurs:

- Please find seating as far forward as possible.
- Move to the center of the row and fill all seats so that chairs are available on aisles for additional attendees.
- Overcrowding of meeting rooms may subject the session to shutdown by the Fire Marshal; therefore, we urge all attendees to locate seating rather than stand in aisles or against walls.
- If space does not permit you to attend a session, an audiotape of that session may be available. Please check the order form included in your registration packet.

## AUDIO RECORDINGS OF SESSIONS

Audiotapes and CDs of most sessions are available shortly after each session concludes and may be purchased at the Mobiltape Booth located in East Lobby, Level One, Washington Convention Center.

## SMOKING POLICY

There will be **NO SMOKING** in scientific sessions or in the exhibit hall. Smoking will only be permitted in **designated areas**.

## TAPE RECORDING AND VISUAL REPRODUCTION POLICIES

Audiotape recording is only permitted for personal use. Registrants are welcome to use their own small, portable audiotape recorders to record any session except Case Conferences, unless prohibited by the presenters. Larger, professional tape recorders are not permitted except for use by registered members of the working press in accordance with APA Press Policies. APA has authorized a professional taping firm to audiotape sessions. Badges of personnel representing this firm will clearly identify them. Registrants are not permitted to photograph (including with cell phone cameras) or videotape any session because the intrusive nature of the recording may disrupt the session.

# FORMAT DESCRIPTIONS

---

## ADVANCES IN.....SERIES

These three-hour and thirty-minute sessions are intended to highlight important new advances occurring in the field of psychiatry involving selected disorders or treatments. The sessions are chaired by editors of recent textbooks published by the American Psychiatric Publishing, Inc (APPI) and feature selected chapter authors from these texts. The books discussed at these sessions may be purchased at the APPI bookstore or online at [www.appi.org](http://www.appi.org)

## CASE CONFERENCES

During these 90-minute or three-hour sessions, clinical material is presented by videotape or the treating therapist. One or more experts then discuss the case. Some cases will review the progress of psychotherapy in two successive sessions. **THESE SESSIONS ARE OPEN TO APA MEMBERS ONLY. BLUE REGISTRATION BADGE OR APA MEMBERSHIP CARD REQUIRED FOR ADMITTANCE.**

## COURSES

Courses are designed to emphasize learning experiences that actively involve participants and include the opportunity for informal exchange with the faculty. Offered in four-hour (half-day), six-hour (full-day), and eight-hour (full-day) sessions, courses either review basic concepts in a special subject area or present advanced material on a circumscribed topic. Participants must purchase tickets to attend.

## DEBATES

Experts in the field, including psychiatrists and nonpsychiatrists will debate a controversial topic in psychiatry. The debate format allows for members to hear both pro and con views about important, interesting and timely concerns for our members. Someone who has expertise in the topic area moderates the debate. A portion of the time is allocated for questions from the audience to the presenters with active participation by participants.

## FOCUS LIVE

These 90-minute sessions allow participants to test their knowledge using an interactive Audience Response System (ARS), offering a new and entertaining way to learn. ARS sessions can make a group of 300 feel like they are having a small group consultation with an expert clinician. Experts, who served as guest editors of *FOCUS*, will lead lively multiple choice question-based discussions, and the audience will enter their answers with hand-held devices. Results are instantly tallied and projected on the screen.

## FORUMS

These are flexible presentations that afford an opportunity to highlight and select topics that are of timely interest to psychiatrists. Speakers and panel members are chosen for their expertise and leadership in the field.

## LECTURES

Lectures feature a small number of distinguished speakers discussing scientific and cultural topics, many of which will extend our understanding beyond the usual limits of clinical psychiatry. The Scientific Program Committee invites the lecturers.

## NEW RESEARCH

This format allows for presentation of the very recent findings. The three types of presentations include: Posters, which are visual, self-explanatory presentations; Young Investigators' Posters, with presentations from young investigators, residents, medical students, and research or clinical fellows; and Young Investigators' Oral/Slide which are fifteen-minute presentations with three minutes for discussion.

## SCIENTIFIC AND CLINICAL REPORT SESSIONS

Scientific and Clinical Reports are oral presentations of papers prepared for submission before publication. In this 90-minute format, reports are grouped by topic, with floor discussion from the audience following the presentation of each paper. There is no formal discussant.

## SMALL INTERACTIVE SESSIONS

This 90-minute format allows small groups to meet informally with either selected experts in psychiatry to: discuss topics chosen by the expert obtain consultations around problems in research from senior researchers; or hear clinically-based seminars presented by outstanding educators. Some of these are reserved for residents only. These sessions are limited to 25 participants on a first-come, first-served basis.

## SYMPOSIA

Symposia are three-hour sessions consisting of four to six presentations that are thematically linked and focus on a specific topic relevant to clinical psychiatry. They are designed to provide comprehensive treatment of a topic or discussion of the topic from several points of view by the participants and stimulate discussion with the audience. Some symposia are supported by industry and are designated as "Industry-Supported Symposia" in this *Program Book*.

## WORKSHOPS

Workshops are 90-minute sessions that typically involve brief presentations from individual panel members, followed by the opportunity to apply to home in small groups, practice new techniques to build skills, and for lively and informative discussion. This format provides for highly interactive audience participation. **Media Workshops** are three-hour sessions in which a feature-length film is shown and discussed.

## **AMERICAN PSYCHIATRIC ASSOCIATION CONTINUING MEDICAL EDUCATION POLICY ON FULL DISCLOSURE**

The American Psychiatric Association requires disclosure, by presenters at CME activities, of any significant financial or other affiliation with commercial organization(s) that may have a direct or indirect interest in the subject matter of the scientific program. A "financial interest" may include, but is not limited to, being a shareholder in the organization; being on retainer with the organization; or having research or honoraria paid by the organization. An "affiliation" may include holding a position on an advisory committee or some other role or benefit to a supporting organization.

Under the ACCME Standards for Commercial Support the existence of such relationships may constitute a conflict of interest; and the prospective audience must be informed of the presenter's affiliation with every commercial supporter by an acknowledgement in the printed program and verbal or visual disclosure to participants at the session (disclosure by slide or overhead is required if audiovisual equipment is used for the presentation). This policy is intended to openly identify any potential conflict(s) so that members of the audience in an educational activity are able to form their own judgments about the presentation. The APA also requires verbal disclosure of discussion of unlabeled uses of a commercial product or investigational use of a product not yet approved for this purpose.

The presenters on the following pages have indicated that either they or an immediate family member has a significant interest or other affiliation with a commercial supporter of this meeting and/or with the manufacturer(s) of a commercial product(s) and/or provider of commercial services(s). The presenter's name and the company's name are listed. The nature of the presenter's relationship with the disclosed company is indicated by the following: stock/other financial options, consultant, grant/research support, full-time employee, speaker's bureau, other financial interest or business relationships (specify). A full disclosure index of companies has been provided as a tool to indicate the abbreviated name and full name of the company.

The second group of presenters, beginning on page XLVII, have indicated neither they nor an immediate family member has any significant relationship to disclose. Voting members of the Board of Trustees, Assembly officers, and members of the Scientific Program Committee cannot receive honoraria or travel reimbursement for participating in Industry-Supported Symposia.

Dr. Mossman is Professor of Psychiatry at the Wright State University Boonshoft School of Medicine, and Administrative Director of the Glenn M. Weaver Institute of Law and Psychiatry at the University of Cincinnati College Of Law. He is a graduate of Oberlin College, the University of Michigan Medical School, and the University of Cincinnati General and Child Psychiatry residency training programs.

A frequent lecturer to medical and legal audiences, Dr. Mossman has authored more than 100 publications on ethical issues, medical decision making, violence prediction, statistics, and psychiatric treatment. His 1994 article, "Assessing Predictions of Violence: Being Accurate About Accuracy," was the first to examine violence predictions using ROC analysis, and has now been cited in more than 250 scientific and legal publications. His scholarship emphasizes using insights from other disciplines, especially mathematics and philosophy, to resolve diagnostic and decision-making problems commonly encountered by mental health clinicians. His recent scholarly projects investigate sex offender recidivism, competence to stand trial, and Bayesian reasoning. Dr. Mossman is a Distinguished Fellow of the American Psychiatric Association and a former councilor of the American Academy of Psychiatry and Law. His hobbies include music, religious studies, and investing.

# Join APA

at the Annual Meeting and Qualify for a Rebate!

## How do I qualify?

You may qualify if you:

1. Are a psychiatrist residing in the U.S. or Canada and,
2. Have paid the full-time registration fee for the Annual Meeting (\$825.00 Advance, \$905.00 on-site)

## How do I apply?

1. Stop by one of the APA Membership Booths either in the Registration area (near the Registrar) or in the APA Member Center (Exhibit Hall B, Lower Level) to fill out an APA Membership Application. The application must be submitted on-site during the meeting at one of these locations.
2. Additional documentation—proof of ACGME-AOA or RCPS(C)— approved psychiatry residency training and a current, valid medical license must be received by APA no later than June 30, 2008.

## How does the rebate work?

1. Your local psychiatric district branch must approve the application no later than September 30, 2008
2. The difference between the member and non-member rate will be applied towards your pro-rated 2008 national and local dues. The remaining balance of the rebate amount will be sent directly to you, or if you choose, we can apply the remaining balance to your 2009 dues.\* *It's up to you!*

## Why should I join?

Please stop by one of the APA Membership Booths to learn more about the many benefits of APA membership.

\* Outstanding dues from previous years may be deducted in some cases.

# 60th Institute on Psychiatric Services

## October 2-5, 2008

Save the date now to attend the American Psychiatric Association's **60th Institute on Psychiatric Services**, APA's leading educational conference on clinical issues and community mental health to meet the service needs of people with severe mental illness. Check out our website at [www.psych.org/IPS](http://www.psych.org/IPS).

# Chicago

## *From Patient to Partner: Transforming Systems of Care*

This four-day event will feature popular networking events, more than 100 exhibits that complement the educational program, and over 200 expertly-led educational sessions on topics including: Violence, Trauma, and Victimization; Social and Community Psychiatry; Psychopharmacology; Resident and Medical Student Concerns; Disorders; Cross-Cultural and Minority Issues; Psychiatric Administration and Services; Treatment Techniques and Outcome Studies; Cognitive Disorders; Health Service Research; Mood Disorders; Schizophrenia and Other Psychotic Disorders; and much more...

### Who Should Attend?

- All APA Members
- Psychiatrists and mental health professionals in community practice or the public sector including state and Veterans Affairs hospitals, community clinics, and jails and prisons
- Psychiatric Administrators
- Mental health professionals interested in social issues that have an impact on patients and their families
- Minority psychiatrists and International Medical Graduates
- Psychiatric Residents (only \$60 for advance registration)
- Nonmember Residents and Advocacy Group Members (only \$85 for advance registration)
- Medical Students (free registration)

### Why Should You Attend?

- This activity has been approved for 30 hours of CME credit and CEUs have been applied for.
- Receive a 40% discount on APA member registration fees

- Network with colleagues at receptions and other events
- Industry-supported lunch and dinner symposia
- Valuable exhibit hall prizes drawn each day

### How Will You Benefit?

- Utilize new knowledge and skills in clinical psychiatry that can be used to improve patient care;
- Examine how the current health care system affects patient care;
- Demonstrate and apply new skills useful in clinical and public psychiatry settings;
- Recognize and improve mental health disparities in the community; and
- Assess and evaluate all aspects of recovery; and
- Describe how to transform systems of care.

The Preliminary Program, which includes registration, housing, and travel information will be available in May at [www.psych.org/IPS](http://www.psych.org/IPS) or call 1-888-35-PSYCH and request a copy. Online registration will begin on June 2.

#### FOCUS LIVE! MAJOR DEPRESSIVE DISORDER

**Moderators:** Deborah J. Hales, M.D., Mark H. Rapaport, M.D.

**Presenter:** Charles Nemeroff, M.D.

Depression accounts for more disability than any other disorder worldwide. It is a significant risk factor for suicide, especially in adolescents, young adults, and the elderly. It is an important risk factor for poor treatment response in patients with cardiovascular disease. There has been a significant increase in our understanding of depression and the efficacy and tolerability of currently available treatments through results of recent studies such as the NIMH-sponsored clinical treatment trial, STAR-D. Combination or augmentation therapies, comprised of more than one antidepressant medication or an antidepressant and a second non-antidepressant, and combination pharmacotherapy/psychotherapy, appear to be associated with better therapeutic responses than monotherapy. Increased side effects often associated with co-prescribing two medications, and the increased cost of treatment with combination psychotherapy and pharmacotherapy or two medications, are major obstacles that prevent their wholesale clinical adoption. Many new findings and research directions have recently emerged that presage rapid changes in clinical practice - in diagnostics, choice of currently available treatments and novel treatment development itself. In FOCUS LIVE sessions expert clinicians lead multiple choice question-based discussions. Participants test their knowledge

with an interactive Audience Response System, which instantly presents the audience responses as a histogram on the screen. Questions in this session will cover major depressive disorder, including diagnosis, treatment, and new developments.

Gail E. Robinson, M.D.

What Women Want

Chp.: Melvin Green, M.D.

Dr. Gail Erlick Robinson is a Professor of Psychiatry and Ob/Gyn at the University of Toronto and Director of the Women's Mental Health Program at the University Health Network, Toronto, Canada. She was Founding Co-Director of the Women's Mental Health Program at the University of Toronto. In the American Psychiatric Association she is currently the Women's Caucus Representative and the Chair of the Committee on Family Violence and Abuse. She is a clinician and has designed curricula, taught, done research, published, and acted as an expert witness on issues pertaining to women's mental health including domestic violence, sexual assault, the adult consequences of child sexual abuse, sexual harassment, stalking and the abuse of patients by healthcare professionals and other authority figures. Her special areas of interest are in psychological aspects of women's reproductive life and violence against women. She was a co-founder of the Toronto Rape Crisis Centre and the Metropolitan Action Committee on Violence Against Women and Children. She is currently President of the Board of YWCA Toronto. She has received the YWCA Woman of Distinction Award and the Top 100 Most Powerful Women in Canada Award in the Championship category for her work in women's mental health.

### LECTURE 3

9:00 a.m.-10:30 a.m.  
Room 146A/B, Level One  
Washington Convention Center

Otto W. Steinfeldt-Foss, M.D.

Planning, Organization, and Evaluation of  
Mental Health Services – Ideals and Realities

Chp.: Pedro Ruiz, M.D.

Co-Chp.: Renato Alarcon, M.D.

A native of Oslo, Norway, Dr. Steinfeldt-Foss received his MD from the University of Bergen in 1958. His clinical and specialty

training led him to the position of Psychiatrist-in-Chief at Oslo City University Hospitals Ullevål and Dikemark. Following completion of his MPH at the Harvard School of Public Health, he served as the Director of Mental Health Services of Norway and periodically as the Director General of Public Health in the Ministry of Health & Social Affairs. He left this post in 1980 to assume his current position as Director and Physician in Chief of University Health Services of Oslo. Dr. Steinfeldt-Foss is a board-certified and practicing specialist in community medicine, general medicine and psychiatry, as well as a certified supervisor in general medicine and psychotherapy. He has been a consultant on mental health to the WHO since 1970 and has also served as a consultant to various national and municipal governments. He is a lecturer at the University of Oslo, President of the Norwegian Psychiatric Association, a WHO Fellow and an official council member on various committees. Dr. Steinfeldt-Foss's clinical, scientific and administrative experience, based on the bio-psycho-social holistic frame of reference, gives him a unique challenge and opportunities to continue his work for securing the dignity and human rights for the individual suffering patient as well as society. Practical experience from the wartime, on-site, in former Yugoslavia, the Soviet Union, including the Baltic States, Turkey, and most recently through the WPA-China Issue, has strengthened his belief and dialogue. Dr. Steinfeldt-Foss is the recipient of the 2005 Jean Delay Prize in Psychiatry, the most prestigious award of the International Association of Psychiatry.

Helen Mayberg, M.D.

Deep Brain Stimulation for  
Treatment Resistant Depression

*Collaborative Session with National Institute of Mental Health*

Chp.: Daniel Weinberger, M.D.

Co-Chp.: Robin Hurley, M.D.

Dr. Mayberg is Professor of Psychiatry and Neurology at the Emory University School of Medicine. Her studies over the past 20 years have systematically examined neural mechanisms mediating depression pathogenesis in both psychiatric and neurological patient subgroups, as well as antidepressant response to various treatments including pharmacotherapy, cognitive behavioral therapy and placebo with a goal towards identification of neurobiological markers predicting treatment response and optimized treatment selection. Her long-term interest in neural network models of mood regulation in health and disease led to the recent development of a new intervention for treatment resistant patients using deep brain stimulation, a study initiated at the University of Toronto and now continuing at Emory. Dr. Mayberg is a Board Certified Neurologist, trained

at Columbia's Neurological Institute in New York, with fellowship training in nuclear medicine at Johns Hopkins. She received a BA in Psychobiology from UCLA and an MD from University of Southern California. She has held previous academic appointments in Neurology, Psychiatry and Radiology at John Hopkins School of Medicine, The University of Texas Health Sciences Center in San Antonio and the University of Toronto, where she was also the first Sandra Rotman Chair in Neuropsychiatry. Dr. Mayberg is currently a member of the NINDS Advisory Council, the American Neurological Association Council and the Scientific Advisory Board for NARSAD. She has served on the Clinical Neuroscience and Biological Psychopathology and the Brain Disorders and Clinical Neuroscience Study Sections at NIH. She is active in the Society for Neuroscience, The American College of Neuropsychopharmacology, the Society of Biological Psychiatry, and the Organization for Human Brain Mapping. Her research program has ongoing funding from the NIMH, the Canadian Institute for Health Research, NARSAD, the Stanley Medical Research Institute, the Dana Foundation and the Woodruff Fund. She was the 2007 recipient of NARSAD's Falcone Prize for Depression Research.

Room 103A/B, Level One, Washington Convention Center

#### FOCUS LIVE! SCHIZOPHRENIA

**Moderator:** Deborah J. Hales, M.D., Mark H. Rapaport, M.D.

**Presenter:** Peter Buckley, M.D.

Schizophrenia is a chronic, debilitating illness affecting 1% of adults. The combination of onset in early adulthood and persistent dysfunction create enormous personal costs. Symptoms of the illness are variable from person to person, with positive symptoms of delusions, hallucinations, and thought disorganization and negative symptoms of blunted affect, social dysfunction, and lack of motivation, along with cognitive impairments, and mood disturbance. Treatment planning has the goals of reducing or eliminating symptoms, maximizing quality of life, and promoting recovery. The biological basis is known to include genetic, environmental, and developmental factors. In this FOCUS LIVE session multiple choice questions covering current issues in schizophrenia will be presented: assessment of symptoms and establishment of a diagnosis, treatment plan and treatment adherence, treating comorbid conditions, psychosocial treatments and antipsychotic medications, metabolic disturbances during antipsychotic therapy, complex switching and combining of medications, and side-effect management strategies to improve patient outcomes. In FOCUS LIVE sessions expert clinicians lead multiple choice question-based discussions. Participants test their knowledge with an interactive audience response system, which instantly presents the audience responses as a histogram on the screen. Questions cover existing knowledge and new developments in schizophrenia.

## APA'S BENJAMIN RUSH AWARD LECTURE

Mark S. Micale, M.D.

## Psychological Trauma and the Lessons of History

Chp.: Laura D. Hirshbein, M.D.

Mark S. Micale (Ph.D., Yale University, 1987) is professor of the history of science and medicine at the University of Illinois in Urbana-Champaign. He has published widely in psychiatric history, including *Approaching Hysteria: Disease and Its Interpretations* (1995), *Traumatic Pasts: History, Psychiatry, and Trauma in the Modern Age, 1870-1930* (2001), and (with Roy Porter) *Discovering the History of Psychiatry* (1994). His new book *The Male Malady: Masculine Nervous Illness from the Renaissance to Freud* is forthcoming with Harvard University Press. He is now researching a new project about "psychiatric globalization."

Solomon Snyder, M.D.

Neurotransmitters, Drugs and the Brain:  
Historical Perspectives

*Collaborative Session With the National Institute of Mental Health*

Chp.: Carolyn B. Robinowitz, M.D.

Co-Chp.: Anthony Rothschild, M.D.

Born in Washington, D.C. in December 1938, Dr. Snyder received his undergraduate and medical training at Georgetown University (MD 1962); Research Associate training with Julius Axelrod at the NIH (1963-1965); and psychiatric training at the Johns Hopkins Hospital (1965-1968). In 1966 he joined the faculty of the Johns Hopkins University School of Medicine (Asst Professor Pharmacology, 1966-1968; Associate Professor Pharmacology/Psychiatry (1968-1970); Professor (1970). In 1980 he established the Department of Neuroscience and served as Director (1980-2006). He is presently Distinguished Service Professor of Neuroscience, Pharmacology and Psychiatry. Dr. Snyder is the recipient of numerous professional honors, including the Albert Lasker Award for Basic Biomedical Research (1978), the National Medal of Science (2005), the Albany Medical Prize (2007), the Wolf Foundation Prize in Medicine (1983), the Dickson Prize of the University of Pittsburgh (1983), the Bower Award of the Franklin Institute

(1991), the Bristol-Myers Squibb Award for Distinguished Achievement in Neuroscience Research (1996) and the Gerard Prize of the Society for Neuroscience (2000). He is a member of the United States National Academy of Sciences and a Fellow of the American Academy of Arts and Sciences and the American Philosophical Society. He is the author of more than 1000 journal articles and several books including *Uses of Marijuana* (1971), *Madness and the Brain* (1974), *The Troubled Mind* (1976), *Biological Aspects of Abnormal Behavior* (1980), *Drugs and the Brain* (1986), and *Brainstorming* (1989). Many advances in molecular neuroscience have stemmed from Dr. Snyder's identification of receptors for neurotransmitters and drugs and elucidation of the actions of psychotropic agents. The application of Dr. Snyder's techniques has enhanced the development of new agents in the pharmaceutical industry by enabling rapid screening of large numbers of candidate drugs. He has established gases as a new class of neurotransmitters, beginning with his demonstrating the role of nitric oxide in mediating glutamate synaptic transmission and neurotoxicity. His isolation and molecular cloning of nitric oxide synthase led to major insights into the neurotransmitter functions of nitric oxide throughout the body.

## APA's PATIENT ADVOCACY AWARD LECTURE

Pete Earley

CRAZY: A Father's Search Through  
America's Mental Health Madness

Chp.: Carl Bell, M.D.

In a *Washingtonian Magazine* cover story entitled, *Top Journalists: Washington's Media Elite*, Pete Earley was described as one of a handful of journalists in America who "have the power to introduce new ideas and give them currency." A former reporter for *The Washington Post*, he is the author of nine nonfiction books and three novels. His first book, *Family of Spies: Inside the John Walker Spy Ring*, was a *New York Times* bestseller and was made into a five hour miniseries shown on CBS television. For his book, *The Hot House: Life Inside Leavenworth Prison*, Earley spent a full year as a reporter inside a maximum security prison. His book, *Circumstantial Evidence* helped lead to the release of a black man from death row after he had been wrongly convicted of murdering a white teenager in Alabama. His most recent book, *CRAZY: A Father's Search Through America's Mental Health Madness*, tells two stories. It describes his attempts to help his college age son, Mike, after he becomes ill with bipolar disorder and is arrested. It also describes a year that Earley spent at the Miami Dade County Jail where he followed persons with mental disorders, who had been in jail, out into the community to see

### FOCUS LIVE SESSION 3

2:00 p.m.-3:30 p.m.

Room 103A/B, Level One, Washington Convention Center

#### FOCUS LIVE! Obsessive-Compulsive Disorder

**Moderator:** Deborah J. Hales, M.D., Mark H. Rapaport, M.D.

**Presenters:** John Greist, M.D.

Obsessive-compulsive disorder (OCD) is often hidden by patients who have insight into the inappropriateness of their obsessional concerns and the excessive rituals they feel compelled to perform. Obsessions are unwanted, intrusive, repetitive ideas, images and impulses. Compulsions are urges to do something to lessen distress from obsessions. Rituals are repetitive purposeful behaviors, typically tied to obsessions and intended to diminish obsessions or the discomfort they cause. Contamination obsessions lead to washing and cleaning rituals; doubt produces checking; aggressive obsessions evoke avoidance of the objects of aggression; and worry about loss produces hoarding. Onset in childhood is common and many suffer lifelong with a few becoming incapacitated by incessant demands of their disorder. Once recognized, treatment with CBT and SRIs is often helpful, alone or in combination. This multiple choice question based presentation will provide participants with an opportunity to test their knowledge about diagnosis and treatment of this disorder. In FOCUS LIVE! sessions, expert clinicians lead lively multiple choice question-based discussions. Participants test their knowledge with an interactive audience response system, which instantly presents the audience responses as a histogram on the screen. Questions cover existing knowledge on a clinical topic important to practicing general psychiatrists, including diagnosis, treatment, and new developments.

Albert C. Gaw, M.D.

#### Should Psychiatry Embrace a Psycho-spiritual Approach to Patient Care?

**Chp.:** Sanjay Dube, M.D.

Albert Gaw, M.D., was born in the Philippines of Chinese parentage. Dr. Gaw obtained his MD from the University of the East Medical Center in the Philippines; interned at Rochester General Hospital, NY; completed a psychiatric residency at the University of Rochester, Strong Memorial Hospital and a fellowship in Community Psychiatry at Harvard Medical School. An APA Distinguished Life Fellow, Dr. Gaw is a Clinical Professor of Psychiatry at the University of California at San Francisco, Medical Director of San Francisco's Community Behavioral Health Services and was a Speaker of the APA Assembly. Dr. Gaw helped established health and mental program for the Greater Boston's Asian American Community. He has published on Cross-Cultural Psychiatry, including three books: *Cross-Cultural Psychiatry*; *Culture, Ethnicity and Mental Illness*; and *Concise Guide to Cross-Cultural Psychiatry*. At Bedford VA and  
(Continued next page)

in San Francisco, Dr Gaw provided innovative care for persons with serious mental illnesses. He fostered scientific exchanges between the APA and the Chinese Psychiatric Association. As Assembly Speaker, Dr. Gaw promoted relationship between the APA and the VA, psychiatric preparedness for disaster, and care for the seriously mentally ill persons. Dr. Gaw is married to Hsiao-feng (Tina) Chow. Their daughter, Julie, is a film maker. **THIS SESSION WILL BE AUDIOTAPED.**

**LECTURE 9**

**2:00 p.m.-3:30 p.m.  
Room 146 A/B, Level One,  
Washington Convention Center**

**C. Thomas Caskey, M.D.**

**Chp.:** Robert W. Guynn, M.D.

Dr. Caskey attended the University of South Carolina (1956-58) and Duke University Medical School (1958-63). After receiving his M.D. degree, Dr. Caskey remained at Duke as an intern and resident. Dr. Caskey then went to the National Institutes of Health (1965-71) where he was a Research Associate with Nobel Laureate Marshall Nirenberg. His research with Dr. Nirenberg proved the universality of the genetic code for living organisms on earth. Dr. Caskey then became Senior Investigator in the Laboratory of Biochemical Genetics (1967-70) and Head of the Section of Medical Genetics at NHLBI (1970-71). As an independent investigator he discovered the mechanism of code punctuation (stop) to be translated by proteins, not tRNA. Dr. Caskey joined Baylor College of Medicine in 1971 where he served as Chief of the Section of Medical Genetics (1971-85) and Professor of Medicine and Biochemistry (1971-94). He discovered 11 genetic disease genes during this period. From 1976 to 1994 Dr. Caskey was a Howard Hughes Medical Institute Investigator. Most importantly, he discovered the "triplet repeat" diseases (fragile X and myotonic dystrophy) and the molecular basis of "disease anticipation" (triplet expansion generation to generation). His patent for automation of forensic science use of repeat sequences enabled ABI to use the method worldwide. He served as the first Director of the NIH Genome Center at Baylor College of Medicine. He also served as Director of the Medical Scientist Training Program, Professor of Cell Biology, as the Henry and Emma Meyer Chair in Molecular Genetics, Professor of Molecular Genetics, and Chair of the Department of Molecular and Human Genetics, at Baylor. Dr. Caskey left academia in 1994 to assume the position of Senior Vice President for Research at Merck Research Laboratories, West Point, Pennsylvania, and Trustee and President of the Merck Genome Research Institute. The development of the adenoviral vector HIV vaccine was achieved by a research team under Dr. Caskey's direction. Dr. Caskey returned to Houston in 2000 and became Founding Director and Chief Executive Officer of Cogene Biotech Ventures and Cogene Ventures, venture capital funds designed to support early-stage biotechnology and life sciences companies using genome technology for drug discovery. In 2007 Dr. Caskey was named Director and Chief Executive Officer of the Brown Foundation Institute of Molecular Medicine and the George &

Cynthia Mitchell Distinguished Chair in the Neurosciences. He has served as Chair of the Board of Lexicon Genetics, a Woodlands, Texas biotechnology company, as the company transformed itself from a mouse discovery company to a Nasdaq-listed pharmaceutical corporation. Other recent past Board memberships include the Muscular Dystrophy Association, the Foundation for Biomedical Research, Motorola BioChips, Athersys, Kodiak Technologies, Vical, Xeotron, Etubics, BioHouston, MDS, and Argolyn. He served as Special Advisor to the World Health Organization Hereditary Diseases Program and a member of the World Health Organization's Expert Advisory Panel on Human Genetics. He was President of The Human Genome Organization (HUGO) between 1993-1996. Presently, Dr. Caskey serves as a member of the Science Review Panel for the US Food and Drug Administration. He is Editor of the Annual Review of Medicine. Dr. Caskey is a member of the Academy of Medicine, Engineering and Science of Texas (President of TAMEST 2004-05), a member of the National Academy of Sciences, and the Institute of Medicine. He is a Fellow of the American Academy of Microbiology, American Association for the Advancement of Science, American College of Medical Genetics, American College of Physicians, and the Royal Society of Medicine. He is a member of the American Society of Human Genetics (President 1990-1991), American Academy of Pharmaceutical Physicians, American Society for Biochemistry and Molecular Biology, American Society for Cell Biology, American Society for Clinical Investigation, American Society of Gene Therapy, American Society for Microbiology, American Medical Association, Association of American Physicians, and the Society for Inherited Metabolic Disorders. Dr. Caskey's most recent award (2007) was the Medical Statesman Award from the Health Access Foundation.

**WILLIAM C. MENNINGER  
 MEMORIAL LECTURE**

**Oliver Sacks, M.D.**

A thesis offered at APA's 2007 annual meeting by the brilliant mathematician who has suffered for decades from schizophrenia, John Nash, is echoed in the works of another man who has long challenged the one-dimensional assumption that mental or neurological disorders are abnormalities that must be "fixed" through treatment or lived with as a disability. It's not that simple, according to best-selling author and neurologist Oliver Sacks, M.D. "Defects, disorders, diseases," writes Sacks in *An Anthropologist on Mars*, "can play a paradoxical role, by bringing out latent powers, developments, evolutions, forms of life, that might never be seen, or even be imaginable, in their absence." Sacks will discuss his work and insights at the Convocation of Fellows at APA's 2008 annual meeting on Monday, May 5, at 5: 30 p.m. in Hall D, Level 1, at the Washington Convention Center. He is presenting the William C. Menninger Memorial Lecture. Sacks's most recent book, published last fall, is *Musicophilia: Tales of Music and the Brain*. A music lover himself, Sacks writes about the relationship of music and uncommon brain disorders and how that relationship is marked by power and mystery. He goes beyond the science of the brain as he unfolds the compelling tales of people with different neurological conditions for whom music is or has become a central part of their existence—sometimes to their detriment but most often in paradoxical, healing, or life-changing ways. Sacks, who is probably best known for his books *Awakenings*, *The Man Who Mistook His Wife for a Hat*, and *An Anthropologist on Mars*, was born in 1933 in London into a family of physicians and scientists—including his mother, a surgeon, and his father, a general practitioner. He earned his medical degree at Oxford University and did residencies and fellowship work in the United States. Since 1965 he has lived in New York and practiced neurology. He is now a professor of clinical neurology and clinical psychiatry at Columbia University Medical Center and was named the university's first Columbia Artist. A pivotal event in Sacks's career occurred in 1966. While consulting for a chronic-care hospital in the Bronx, Sacks encountered a group of patients who had spent decades frozen in a statue-like state. He recognized that these patients were survivors of a pandemic of "sleepy sickness" from 1916 to 1927. After treating them with a then-experimental drug, L-dopa, they came back to life. (They later developed tics and seizures as a result of the drug.) He wrote about this experience in his 1973 book *Awakenings*, later made into a play and movie. Many of the books that Sacks wrote after *Awakenings* described his experiences with people who had a variety of neurologically based conditions, including Tourette's syndrome, autism, parkinsonism, musical hallucinations, epilepsy, phantom limb syndrome, schizophrenia, and Alzheimer's disease. He has been a subject of three of his books: as a doctor in *Migraine*, as a patient in *A Leg to Stand On*, and as a youth growing up in a family of

gifted scientists in *Uncle Tungsten: Memories of a Chemical Boyhood*. The best-selling author has won numerous awards, including a Guggenheim Fellowship for his writings on the neuroanthropology of Tourette's syndrome and the Lewis Thomas Prize by Rockefeller University, which recognizes the scientist as poet. The Institute for Music and Neurologic Function of Beth Abraham Family of Health Services has honored him twice: in 2000, with its Music Has Power Award, and in 2006, in commemoration of his 40th year at Beth Abraham and for his dedication to his patients.

**FOCUS** is the best system for recertification, self-assessment, and lifelong learning in psychiatry. In one package **FOCUS** provides a comprehensive review of current clinical practice based on the content outlined by the ABPN recertification exam. Each issue offers Clinical Reviews, a Patient Management Exercise, Seminal Articles, and a CME quiz. Twenty *AMA PRA Category 1 Credits*<sup>™</sup> are available per year for the issue quizzes, and an additional 20 hours can be earned through completion of the end-of-year Self-Assessment Exam. All current and back issues are available online. You can earn CME credits by taking the exams from the current issue, or even the nonexpired exams from any past issue that was published during your subscription period.

The **FOCUS** Self-Assessment Exam is an annual 100-question, multiple-choice supplement written by practicing psychiatrists and academic experts that allows you to earn 20 *AMA PRA Category 1 Credits*<sup>™</sup> and the opportunity to anonymously compare your knowledge to that of your peers either online or on paper. Each question is similar to those used in board-type exams. The **FOCUS** Self-Assessment Exam is listed by the ABPN as an approved self-assessment activity that fulfills the requirement of psychiatrists applying for and taking the recertification examination.

**FOCUS** addresses the core content in psychiatry in 4-year cycles. Each issue briefs you on new developments and reviews the current state of practice in that topic area through

- A comprehensive review article summarizing current research
- A clinical synthesis article written by a leading expert in the field
- A patient management exercise and ask-the-expert column
- Recent influential works selected by experts in the field

I. Jon Russell, M.D.

**Chp.:** Deborah Spitz, M.D.

Dr. Russell is Associate Professor of Medicine at the University of Texas Health Science Center at San Antonio, and Director of the University Clinical Research Center. He is Editor of the Journal of Musculoskeletal Pain, Board Member, and Founding President of the International MYOPAIN Society. Since joining the faculty at the UTHSC at San Antonio in 1978, Dr. Russell has served as a council member for the Central Region American College of Rheumatology, as National Chairman for the American College of Rheumatology's Non-articular Rheumatism Study Group, and on the board of fibromyalgia organizations in the United States and France, on the Research Grants Committee for the Arthritis Foundation, on the Research and Development Committee for the Audie Murphy Veterans Administration Hospital, on the Chronic Pain Management Subcommittee for the University Health System, and on several site review committees for the National Institutes of Health. Dr. Russell has been honored by listings in editions of The Best Doctors in America. He was given the Humanitarian of the Year Award in 1994 by the South Central Texas Chapter of the Arthritis Foundation. Dr. Russell has conducted research studies in the immunology, pathogenesis, and management of rheumatic diseases and fibromyalgia syndrome. He is an author of over 85 original publications, over 30 invited chapters in medical textbooks, and his research is reported in numerous lay articles. He is an editorial board member for several medical publications in the United States, Canada, and France. He is a Senior Editor for the Haworth Press, and is Editor-in-Chief of The Journal of Musculoskeletal Pain. He is co-author of The Fibromyalgia Help Book, and producer of the video documentary "Fibromyalgia and You," two educational resources for people with fibromyalgia.

**CELLULAR PLASTICITY CASCADES: A WINDOW INTO MOOD DISORDERS**

**Husseini K. Manji, M.D.**

**Chp.:** Hagop Akiskal, M.D.

Husseini K. Manji, M.D. is Chief, Laboratory of Molecular Pathophysiology & Experimental Therapeutics, NIMH, and Director of the NIMH Mood and Anxiety Disorders Program, the largest program of its kind in the world. He is also a visiting professor in the Department of Psychiatry at Duke University. Dr. Manji received his B.S. (Biochemistry) and M.D. from the University of British Columbia. Following psychiatry residency training, he completed fellowship training in psychopharmacology at the NIMH and obtained extensive additional training in cellular and molecular biology at the NIDDK. The major focus of his ongoing research is the investigation of disease- and treatment-induced changes in gene and protein expression profiles that regulate synaptic and neural plasticity in mood disorders. His work has helped to conceptualize these illnesses as genetically-influenced disorders of synaptic plasticity, and has led to the investigation of novel therapeutics for refractory mood disorders. Dr. Manji is a previous recipient of numerous research awards, including the A. E. Bennett Award for Neuropsychiatric Research, the Ziskind-Somerfeld Award for Neuropsychiatric Research, the NARSAD Mood Disorders Prize (Falcone Prize), the Mogens Schou Distinguished Research Award, the American College of Neuropsychopharmacology (ACNP)'s Joel Elkes award for distinguished research, the Canadian Association of Professors in Psychiatry Award, the Henry and Page Laughlin Distinguished Teacher Award, the Brown University School of Medicine Distinguished Researcher Award, and the NIMH award for excellence in clinical care and research. In addition to his research endeavors, Dr. Manji is also actively involved in medical and neuroscience education endeavors, and has served as a member of the National Board of Medical Examiners (NMBE) Behavioral Science Test Committee, the Howard Hughes Medical Institute Research Scholars Program Selection and Advisory Committee, and numerous national curriculum committees. He has developed and co-directs the NIH Foundation for the Advanced Education in the Sciences Graduate Course in the Neurobiology of Mental Illness, and has received both the NIMH Mentor of the Year and NIMH Supervisor of the Year awards. He has published extensively on the molecular and cellular neurobiology of severe mood disorders and their treatments, is editor of *Neuropsychopharmacology Reviews: The Next Generation of Progress*, deputy editor of *Biological Psychiatry*, associate editor of the journal *Bipolar Disorders*, and sits on the editorial board of numerous journals. He is a Councilor of the ACNP, chairs the ACNP's Task Force on New Medication Development, and is president-elect of the Society of Biological Psychiatry.

Mario Maj is Full Professor of Psychiatry and Chairman of the Department of Psychiatry of the University of Naples. Since 1983, he has been collaborating with the World Health Organization (WHO), being active as a researcher and an educator in sub-Saharan Africa, South-East Asia, and Latin America. From 1989 to 1991, he has been responsible for the WHO Programme on the Neuropsychiatric Aspects of HIV Infection at WHO Headquarters in Geneva. He is President-Elect of the World Psychiatric Association. He has been President of the European Psychiatric Association (2003-2004) and of the Italian Psychiatric Association (2000-2002). He is member of the Italian High Council of Medicine. He has published papers in 51 different journals indexed in the Current Contents, including all the psychiatric journals indexed in the Current Contents-Life Sciences, and several major journals in the fields of neurosciences, basic sciences, and general medicine. According to the Institute for Scientific Information (ISI), he is the Italian psychiatrist with the highest number of citations in the period 1981-2005.

**RETHINKING MENTAL DISORDERS: HOW RESEARCH WILL CHANGE PRACTICE**

*Collaborative Session With the  
 National Institute of Mental Health*

**Chp.:** Christine Marx, M.D.

Thomas R. Insel, M.D., is Director of the National Institute of Mental Health (NIMH), the component of the National Institutes of Health charged with generating the knowledge needed to understand, treat, and prevent mental disorders. With a budget of over \$1.4 billion, the NIMH leads the nation's research on disorders that affect an estimated 44 million Americans, including one in five children. Immediately prior to his appointment as director, which marks his return to NIMH after an eight-year hiatus, Dr. Insel was Professor of Psychiatry at Emory University. There, he was founding director of the Center for Behavioral Neuroscience, one of the largest science and technology centers funded by the National Science Foundation and, concurrently, director of an NIH-funded Center for Autism Research.

From 1994 to 1999, he was Director of the Yerkes Regional Primate Research Center in Atlanta. While at Emory, Dr. Insel continued the line of research he had initiated at NIMH, studying the neurobiology of complex social behaviors in animals. Early in his NIMH research career, which extended from 1979 to 1994, Dr. Insel conducted clinical research on obsessive-compulsive disorder, conducting some of the first treatment trials for OCD using the selective serotonin reuptake inhibitors (SSRI) class of medications. He has published over 200 scientific articles and four books, including the *Neurobiology of Parental Care* (with Michael Numan) in 2003. Dr. Insel has served on numerous academic, scientific, and professional committees, including 10 editorial boards. He is a member of the Institute of Medicine, a fellow of the American College of Neuropsychopharmacology, and is a recipient of several awards. Dr. Insel graduated from the combined B.A.-M.D. program at Boston University in 1974. He did his internship at Berkshire Medical Center, Pittsfield, Massachusetts, and his residency at the Langley Porter Neuropsychiatric Institute at the University of California, San Francisco.

COL Ritchie is currently the psychiatry consultant to the US Army Surgeon General and Director of the Proponency of Behavioral Health. She trained at Harvard, George Washington, Walter Reed, and the Uniformed Services University of the Health Sciences. Her assignments and other missions have taken her to Korea, Somalia, Iraq, and Vietnam. An internationally recognized expert, she brings a unique public health approach to the management of disaster and combat mental health issues. She has published numerous articles on forensic, disaster, and military operational psychiatry. In 2005 she received the William Porter and Bruno Lima awards. Her textbook, "Mental Health Interventions for Mass Violence and Disaster" was recently published by Guilford Press. Military Medicine published her supplement on Humanitarian Assistance and Health Diplomacy: Military-Civilian Partnership in the 2004 Tsunami Aftermath. She is currently the senior editor on a forthcoming text on Combat and Operational Mental Health.

Robert J. Ursano, M.D. is Professor and Chairman of the Department of Psychiatry at the Uniformed Services University School of Medicine, our nation's only federal medical school. He is also Director of the Center for the Study of Traumatic Stress. Dr. Ursano is one of the world's leaders in research and public health planning and policy development for psychological and behavioral effects of trauma, disasters, terrorism, and bioterrorism in particular. His research and publications on the effects of traumatic events on individuals and groups are widely recognized as having made fundamental contributions to our understanding of the distress and illness that can result from trauma, disasters, and terrorism. He is noted for bringing individual and public health issues together on critical issues. Dr. Ursano and his team have been lead collaborators and advisors in times of disaster to WHO, National Academy of Science Institute of Medicine, U.S. Capitol, Department of Defense, corporations and businesses and numerous state and local agencies. His Textbook of Disaster Psychiatry (Cambridge University Press), was recently released and is the first textbook ever published on the topic. In addition Dr. Ursano is Editor in Chief of the distinguished psychiatric journal, Psychiatry: Interpersonal and Biological Processes, founded by Harry Stack Sullivan.

**Ronald D. Rieder, M.D.**

**What is Wrong With Our Patients?**

**Chp.:** Frederick G. Guggenheim, M.D.

Ronald O. Rieder, M.D., has been a Director of Residency Education for the past 29 years, first at Columbia University and now at Mount Sinai School of Medicine. On the national level, he has been President of the Association of Directors of Psychiatric Residency Training, and Founding Chair of the Committee on Research Training of the APA. Dr. Rieder received his undergraduate and medical education at Harvard. His internship was at Johns Hopkins, and his psychiatric

residency training at Albert Einstein. He then did a research fellowship in the Intramural Research Program of NIMH, working with Drs. David Rosenthal and Paul Wender. He remained at NIMH for six years as a Research Psychiatrist, and chaired education initiatives in the intramural program and the NIH's Foundation for Advanced Education in the Sciences. His research focused on schizophrenia, including genetic and brain imaging studies. Dr. Rieder's research background was unusual for those involved in residency training, and led to his focus on integrating neuroscience and research into the curricula for psychiatric trainees. At Columbia he developed NIMH-funded research fellowships and medical student research programs. For residents he initiated "neurobiological formulations" that related brain imaging and neuropsychological findings to clinical symptomatology.

**James H. Meadow-Woodruff, M.D.**

**SCHIZOPHRENIA AS A DISORDER  
 OF RECEPTOR TRAFFICKING**

**Chp.:** Christine Marx, M.D.

Dr. Meador-Woodruff received his B.S. in Chemistry from the University of Richmond, and his M.D. from the Medical College of Virginia. He then moved to Ann Arbor, and completed a combined residency in psychiatry and a research fellowship at the University of Michigan. After completing his research training, he joined the faculty of the Department of Psychiatry and the Mental Health Research Institute at the University of Michigan. He left Michigan in April 2006 to become the Heman E. Drummond Professor and Chairman of the Department of Psychiatry of University of Alabama at Birmingham (UAB). His research has been continuously funded by NIH since 1989. His laboratory's

primary research interest is on understanding how different parts of the brain communicate with other parts via a variety of chemical signals, and how this communication is disrupted in schizophrenia. His current focus is on studying the expression of genes associated with glutamatergic neurotransmission within individual cells in the nervous system. He also has a longstanding interest in teaching and mentorship, including serving on the APA Corresponding Committee on Research Training, which he chaired in 2006; is a frequent faculty participant at the annual APA Research Colloquium for Junior Investigators; and was the director of the University of Michigan's Psychiatry residency research track, holding one of the first NIH grants designed to fund such programs. Nearly 100 trainees have rotated through his lab. He is Editor-in-Chief of the journal *Neuropsychopharmacology*.

**Maria Oquendo, M.D.**

**Suicidal Behavior in Disorder:  
 Risk Factors and Interventions**

**Chp.:** David Baron, D.O.

Maria A. Oquendo, M.D. is Professor of Clinical Psychiatry at Columbia University and Vice-Chair for Education in the Department of Psychiatry at Columbia University and the New York State Psychiatric Institute (NYSPI). She is also Director of the Clinical Evaluation Core of the Silvio O. Conte Center for the Neurobiology of Mental Disorders at NYSPI. Her areas of expertise include the diagnosis, pharmacologic treatment, and neurobiology of bipolar disorder and major depression, with a special focus on suicidal behavior as well as cross cultural psychiatry. Dr. Oquendo graduated summa cum laude and Phi Beta Kappa from Tufts University in 1980. She received her M.D. from the College of Physicians and Surgeons at Columbia University in 1984. She completed her residency in Psychiatry at the Payne Whitney Psychiatric Clinic in the New York Hospital-Cornell Medical Center. Dr. Oquendo is the principal investigator on a high-risk study of suicide attempters with bipolar disorder and on a prospective study of suicidal behavior in patients with affective and psychotic disorders. She is also a co-investigator on four other NIMH-funded research studies examining the neurobiology of suicidal behavior. She is the Co-Principal Investigator on a Developing Center for Interventions to Prevent Suicide. She is the recipient of a grant from the American Foundation for Suicide Prevention for the study of serotonin transporter binding using PET in bipolar suicide attempters, non-attempters, and healthy volunteers. Dr. Oquendo teaches at Columbia University. Dr. Oquendo is a member of the American Psychiatric Association, the American College of Neuropsychopharmacology, the APA SAMHSA Fellowship and Selection Corresponding Committee, Group for the

Advancement of Psychiatry, Association of Women Psychiatrists, and the American Board of Psychiatry and Neurology, on which she also functions as an examiner. She is the president-elect of the American Society of Hispanic Psychiatry. She is an associate editor of the American Journal of Psychiatry and serves on the Scientific Advisory Council of the American Foundation for Suicide Prevention. She is a member of the NIMH scientific review committee, Interventions and Treatment of Mood and Anxiety Disorders (ITMA) responsible for providing peer review of applications for federally funded grants. She has authored or co-authored over 150 peer-reviewed articles, chapters, and editorials. She is the recipient of several awards including Exemplary Psychiatrist Award from the National Alliance for the Mentally Ill (1993); award from the National Alliance for the Mentally Ill for Commitment to Multicultural and Underserved Communities (2002); Travel Award from American Foundation for Suicide Prevention (2003); the Marian Butterfield Early Career Psychiatrist Award from the Association of Women Psychiatrists (2004); and the Gerald Klerman Award from the Depression and Bipolar Support Alliance (2005).

**Distinguished Psychiatrist Lecture Series**  
**THIS SESSION WILL BE AUDIOTAPED.**

**LECTURE 21**

**2:00 p.m.-3:30 p.m.**

**Room 146 A/B, Level One,  
Washington Convention Center**

**APA'S JUDD MARMOR AWARD LECTURE**

**Charles Nemeroff, M.D.**

**The Neurobiology of Child Abuse and Neglect:  
Implications for the Prevention and Treatment of  
Mood and Anxiety Disorders**

**Chp.:** Stuart C. Yudofsky, M.D.

Dr. Nemeroff was born in New York City and educated in the New York City Public School System. After graduating from the City College of New York in 1970, he received a Master's degree in biology from Northeastern University in 1973, and his M.D. and Ph.D. (Neurobiology) degrees from the University of North Carolina at Chapel Hill. His residency training in psychiatry was conducted at both the University of North Carolina and at Duke University, after which he joined the faculty of Duke University. At Duke he was Professor of Psychiatry and Pharmacology and Chief of the Division of Biological Psychiatry before relocating in 1991 to Emory University School of Medicine in Atlanta, Georgia, where he is the Reunette W. Harris Professor and Chairman of the Department of Psychiatry and Behavioral Sciences. His research has concentrated on the biological basis of affective and anxiety disorders. In recent years he has begun to elucidate the neurobiological mechanisms that mediate the increased risk for depression and post traumatic stress disorder in victims of child abuse. Dr. Nemeroff has received numerous honors during his career, including the A.E. Bennett Award from the Society of Biological Psychiatry (1979) the Kempf Award in Psychobiology (1989), and the APA's Samuel Hibbs Award (1990), and the Gold Medal Award and the Research Prize (1996)

from the Society of Biological Psychiatry. He was the recipient of the Gerald Klerman Award from the National Depressive and Manic-Depressive Disorders Association and the Selo Prize from the National Alliance for Research in Schizophrenia and Depression (1997). He has received the Research Award in Mood Disorders, the Bowis Award, and the Dean Award from the American College of Psychiatrists (ACP), the Menninger Prize (2000) from the American College of Physicians, the Research Award from the American Foundation for Suicide Prevention (AFSP) in 2001, and the Burlingame Prize from the Institute of Living (2002). In 2006 he received the APA Research Mentoring Award and the Vestermark Award. Dr. Nemeroff served as the Editor-in-Chief of Neuropsychopharmacology (2001-2006). With Alan F. Schatzberg, M.D., he is co-Editor of the Textbook of Psychopharmacology. He has served on the Mental Health Advisory Council of the NIMH. He is past President of the American College of Neuropsychopharmacology and the ACP. He is the current President of the AFSP. He is chair of the APA Committee on Research Training. In 2002 he was elected to membership in the Institute of Medicine of the National Academy of Sciences. He is the recipient of four research grants from the NIH and has published more than 875 research reports and reviews.

*(Continued next page)*

**Chp.:** John R. Peteet, M.D.

Dr. Blazer is former Dean of Medical Education and currently J.P. Gibbons Professor of Psychiatry and Behavioral Sciences and Vice Chair for Education and Academic Affairs at Duke University Medical Center. He is a Professor of Community and Family Medicine at Duke and Head of the University Council on Aging and Human Development. He also serves as Adjunct Professor in the Department of Epidemiology, School of Public Health, University of North Carolina. He received his M.D. degree from the University of Tennessee and his MPH and Ph.D. degrees from the University of North Carolina at Chapel Hill. He is the author or editor of 30 books, author or co-author of over 180 published abstracts and over 330 peer-reviewed articles. He is also the author or co-author of over 150 book chapters. Many of the book chapters and scientific articles are on the topics of depression, epidemiology, and consultation-liaison psychiatry, and religion and psychiatry, especially with the elderly. He is listed by the ISI among the most highly cited authors in both psychiatry and the social sciences. He was selected for the Distinguished Alumni Award at the School of Public Health, University of North Carolina in 1989, the Rema LaPouse Award from the American Public Health Association in 2001, the First Annual Geriatric Psychiatry Research Award from the American College of Psychiatrists in 2004, the Kleemeier Award from the Gerontological Society of America and, the Distinguished Faculty Award from Duke Medical School in 2005. He was elected to the Institute of Medicine, National Academy of Sciences in 1995 where he chaired the membership committee for two years (2005-2007). He currently serves on the editorial board of the Archives of General Psychiatry. Dr. Blazer has a career-long interest in the association of psychiatry and religion. He has authored or co-authored a number of articles on depression and spirituality and authored *Freud vs. God: How Psychiatry Lost its Soul and Christianity Lost its Mind* (1998) as well as *The Age of Melancholy: Major Depression and its Social Origins* (2005), books which explore the social influence upon the self, especially the spiritual self.

Room 146A/B, Level One  
Washington Convention Center**

**Terry Cline, M.D.**

**Chp.:** Annelle Primm, M.D.

Terry Cline, Ph.D., was nominated by President George W. Bush on November 13, 2006, and confirmed by the U.S. Senate on December 9, 2006, as Administrator for the Substance Abuse and Mental Health Services Administration (SAMHSA). As SAMHSA Administrator, Dr. Cline reports to Health and Human Services Secretary Michael O. Leavitt and leads the \$3.3 billion agency responsible for improving the accountability, capacity and effectiveness of the nation's substance abuse

prevention, addictions treatment, and mental health service delivery systems. Throughout his career, Dr. Cline has championed the principle that mental health and freedom from substance abuse are fundamental to overall health and well-being and that mental and substance use disorders should be treated with the same urgency as any other health condition. Prior to his appointment as SAMHSA Administrator, Dr. Cline put these core values to work as Oklahoma's Secretary of Health, a position he was appointed to by Governor Brad Henry in 2004. At the same time, he served as Oklahoma's Commissioner of the Department of Mental Health and Substance Abuse Services, a position he held since January 2001. He actively participated in and supported the creation of grassroots coalitions to improve the health status of local communities. During his tenure in Oklahoma, Dr. Cline built strong collaborative relationships among the multiple constituency groups and government agencies that touch the lives of people with substance abuse and mental health problems. As a result of these partnerships significant advances were made in transforming the state's service delivery systems, including the creation of Oklahoma's Integrated Services Initiative which creates a holistic approach to treatment needs, a wide expansion of drug courts throughout the state, and the introduction of mental health courts into Oklahoma along with a statewide focus on recovery and recovery support services. Dr. Cline has extensive experience in overseeing health and human services at the state level. He has also served as a provider through an earlier post as the Clinical Director of the Cambridge Youth Guidance Center in Cambridge, Massachusetts, and as a Staff Psychologist at McLean Hospital in Belmont, Massachusetts. His professional history also includes a six-year appointment as a clinical instructor in the Department of Psychiatry at Harvard Medical School and Chairman of the governing board for a Harvard teaching hospital in Cambridge, Massachusetts. A native of Ardmore, Oklahoma, Dr. Cline attended the University of Oklahoma, where he earned a bachelor's degree in psychology in 1980. He then received both a master's degree and a doctorate in clinical psychology from Oklahoma State University. Dr. Cline has involved himself in community service, including membership on a number of local, state, and national committees and boards with a focus on improving the overall health of the community and the nation.
