### WELCOME!

Welcome to Dallas and the 138th Annual Meeting of the American Psychiatric Association. I am sure that your experience will be educationally and socially successful.

As you may know, the Annual Meeting is psychiatry's major continuing education activity. For that reason the hard-working Scientific Program Committee and the leadership of the APA depend upon your comments and criticisms. So please let us know what you think. But in the meantime have a productive visit.

**138** TH ANNUAL MEETING • DALLAS, TEXAS  
MAY 18-24, 1985 • OUR PATIENTS IN A CHANGING WORLD

May 18, 1985

Dear APA Members and Guests:

On behalf of the Scientific Program Committee, I would like to welcome you to the 138th Annual Meeting of the American Psychiatric Association. An exciting meeting is planned, and I hope you will enjoy the numerous scientific sessions and leisure time activities.

For the 1985 Annual Meeting, we have developed several new formats. Three **CLINICAL CASE CONFERENCES** will allow APA members to attend a grand rounds-type format whereby either a videotape is reviewed or a patient is interviewed before the audience. Secondly, psychiatrists will be able to meet in small groups with distinguished colleagues to discuss difficult diagnostic or treatment cases as part of the **CONSULTATION WITH** format. Finally, the early risers will be able to have **BREAKFAST WITH** selected colleagues to discuss important issues of mutual concern.

The 1985 APA Annual Meeting marks the beginning of the **INTERNATIONAL SCHOLARS LECTURE SERIES**. This lecture series brings distinguished scholars from around the world to participate in our Annual Meeting. Additionally, two **PRESIDENTIAL SYMPOSIA** include outstanding psychiatrists and other health professionals as participants. Several sessions have been organized with patient advocacy groups and psychiatric patients to promote increased understanding and mutual respect.

The Council on Research and the Scientific Program Committee have organized a special session to begin the Annual Meeting entitled: **RESEARCH ADVANCES IN PSYCHIATRY: AN UPDATE FOR THE CLINICIAN**. This session is intended to highlight exciting research findings and to outline their possible clinical applications in psychiatric practice. Members may find this session useful in summarizing the state of psychiatric research.

The Scientific Program Committee has continued the publication of the **AMERICAN PSYCHIATRIC ASSOCIATION ANNUAL REVIEW**, now in its fourth volume. Many changes were made in the book to increase its relevance to clinical practice and to decrease its cost. **REVIEW UPDATE** sessions are being held throughout the week to summarize each of the sections in this volume.

Please write me at APA Headquarters if you have suggestions on how to make the 1986 Annual Meeting even better.

Sincerely yours,

Robert E. Hales, M.D.

Chairperson  
Scientific Program Committee

#### LOCAL ARRANGEMENTS/APA HOSPITALITY CENTER

The Local Arrangements Committee invites you to visit the Hospitality Center located in the Convention Center, Room N-401, Level IV. Hosts from the metropolitan area invite you to sample their Southern hospitality. Enjoy good coffee and inside advice from local members of the APA. The Hospitality Center will be open 9:00 a.m.–4:00 p.m. Sunday through Thursday.

Tickets for leisure time activities will be available at the Tour Desk in the Convention Center lobby. Tour information and tickets (if space is available) can be obtained at these sites. All tours will depart from the Convention Center. Plan to arrive ten minutes early; departures will not be delayed.

#### FIRST AID

The First Aid Center is located on Level IV of the Convention Center, open during the following hours:

Friday, May 17 through Thursday, May 23 8:30 a.m.–5:00 p.m.

Emergency Room Services available at Baylor University Medical Center, 3500 Gaston Avenue. Telephone: 820-2501. You must ask to speak with the Charge Nurse to confirm APA identity for special handling.

#### EXHIBITS

Technical, Scientific, and Physician-Patient Educational Services Exhibits will be located in the East Exhibit Hall, Level III, of the Convention Center. Exhibits will be open Monday, May 20–Wednesday, May 22, 9:00 a.m.–5:00 p.m. and Thursday, May 23, 9:00 a.m.–2:00 p.m.

#### PUBLISHERS' BOOKFAIR

A new feature during the 138th Annual Meeting will be a Publishers' Bookfair located in the East Exhibit Hall of the Convention Center. Major publishers, including APPI, will be located in this special area and will have the opportunity to sell and take orders for new and current professional books in the field of psychiatry. Hours of operation will be Sunday, May 19–Wednesday, May 22, 9:00 a.m.–5:00 p.m. and Thursday, May 23, 9:00 a.m.–2:00 p.m.

#### HOSPITALITY LOUNGE

A hospitality lounge will be located in the center of the East Exhibit Hall of the Convention Center and is for the use of all registrants. Coffee will be served during regular exhibit hours courtesy of McNeil Pharmaceutical.

#### DINING FACILITIES—CONVENTION CENTER

Ample dining facilities are available in the Convention Center. Food stands for snacks are strategically located throughout the facility, and a cafeteria and cocktail lounge are located on the Main Lobby level.

#### MESSAGE AND INFORMATION CENTER

This facility will be located in the East Exhibit Hall Corridor of the Convention Center. Staffed during registration hours, it serves as a locator center as well as an information and message center. Self-service message carousels will be available during convention center hours for pickup, deposit, and exchange of messages. There also will be an emergency bulletin board, with those messages being given special attention. Registrants are encouraged to

leave a schedule of courses and activities with their home offices so that in emergencies, they may be located at the meeting. Participants are requested to check the message carousels and emergency bulletin board periodically.

## CHILD CARE INFORMATION

This year information on child care will be provided in two ways. There will be a bulletin board near the Message and Information Center for the exchange of baby-sitting information. On this board parents may leave information on their availability to baby-sit and find out when other parents are available to baby-sit their children. This will be a self-service bulletin board. There also will be available at the Message and Information Center, the phone number at Texas Woman's University used to reach nursing students who provide baby-sitting as well as a list of students who baby-sit from Dallas Theological Seminary. The American Psychiatric Association does not screen the child care service providers and takes no responsibility for them. The hotels should also have a list of bonded baby-sitters.

## AMERICAN PSYCHIATRIC PRESS, INC. BOOKSTORE

Visit the American Psychiatric Press, Inc.-sponsored bookstore in the Publishers' Book Fair! The Bookstore will feature two separate sections displaying titles published by the American Psychiatric Association and the Press. In addition, there will be a special software section offering programs to help the private practitioner.

New books this spring include PSYCHIATRY UPDATE: AMERICAN PSYCHIATRIC ASSOCIATION ANNUAL REVIEW, VOLUME 4, edited by Robert E. Hales, M.D., and Allen J. Frances, M.D.; THE TRAUMA OF WAR: STRESS AND RECOVERY IN VIETNAM VETERANS, edited by Stephen M. Sonnenberg, M.D., Arthur S. Blank, Jr., M.D., and John A. Talbot, M.D.; THE NEW ECONOMICS AND PSYCHIATRIC CARE, edited by Steven S. Sharfstein, M.D., and Allan Beigel, M.D.; new PROGRESS IN PSYCHIATRY series; in addition, two new additions to the popular PRIVATE PRACTICE and CLINICAL INSIGHTS monographs series. Location: Convention Center

Hours: Sunday (May 19) 9:00 a.m. to 5:00 p.m.

Monday (May 20) through Wednesday (May 22) 9:00 a.m. to 5:00 p.m.

Thursday (May 23) 9:00 a.m. to 2:00 p.m.

## MEMBERSHIP RESOURCE CENTER

The APA Membership Resource Center will be located adjacent to the Registration Area in the East Exhibit Hall of the Convention Center and will be open during the following hours:

Saturday, May 18-12 noon-6:00 p.m.

Sunday, May 19-8:00 a.m.-5:00 p.m.

Monday-Wednesday, May 20-22-7:30 a.m.-5:00 p.m.

Thursday, May 23-7:30 a.m.-2:00 p.m.

Registrants are invited to visit the Resource Center and pick up information on any of the following services to APA members: Office of Education/Continuing Medical Education; Membership; APA Placement Service; Library and Archives; Office of Minority Affairs; Member Benefits; Public Affairs; Hospital & Community Psychiatry Service; Consultation Service; APA Periodicals; and Government Relations & CAP/PAC.

Be sure to stop by the Art Show, an annual event sponsored by the Member and Spouse Art Associations. In the Resource Center, members interested in future meetings of the APA will find programs for the 1985 Institute on Hospital & Community Psychiatry in Montreal, as well as submission forms for the 1986 Annual Meeting in Washington, D.C.

## PRESS ROOM AND DAILY BULLETIN

The Press Room is for the use of reporters and broadcasters covering the Annual Meeting. It is located in Room E-409, Level IV, of the Convention Center. It will be open at 12 noon on Saturday, May 18 until 5:00 p.m. On Sunday, May 19, it will open at 9:00 a.m. and close at 5:00 p.m. Monday through Thursday, the hours will be 8:00 a.m. to 6:00 p.m. All sessions of the Annual Meeting, with the exception of CME courses, Clinical Case Conferences, and the Business Session, are open to registered press. Problems should be reported to John Blamphin, Director of Public Affairs. The office for the **Daily Bulletin** is located in the Press Room.

## HOMETOWN RADIO INTERVIEWS

Psychiatrists who have reserved a time with the Division of Public Affairs to record a brief radio interview for distribution to their hometown radio stations, should go to Room E-410, Level IV, in the Convention Center at least five minutes before the scheduled interview.

## APA PERIODICALS OFFICE

The office of the three APA periodicals, the *American Journal of Psychiatry*, *Hospital and Community Psychiatry*, and *Psychiatric News*, will be in Room E-408, Level IV, of the Convention Center during the 1985 Annual Meeting. The office will be open from 9:00 a.m. to 5:00 p.m. Monday, May 20, through Thursday, May 23.

The *American Journal of Psychiatry* does not hold first refusal rights for any papers presented at the Annual Meeting; however, authors may submit them for publication if they wish. The *Journal* will accept for review only papers that are in final form and conform to the requirements listed in "Information for Contributors" (in each issue and available on request).

*Hospital and Community Psychiatry* welcomes the submission of papers and other material from the Annual Meeting. *H&CP* publishes clinical and administrative material of interest to professional staff members in mental health facilities and agencies, the journal's primary audience. Papers may be submitted singly, or papers from symposia or paper sessions may be submitted as a group for consideration as a special section. Material must be in final form, ready for blind peer review. Details are available in *H&CP*'s "Information for Contributors," published several times a year, or from the *H&CP* editorial staff at APA (202/682-6070).

Staff of both journals will be available to answer authors' questions. It is the policy of both journals to publish only original material that has not been published elsewhere in any form and that is not being considered for publication elsewhere.

The staff of *Psychiatric News* will meet daily in the office to discuss news coverage of the meeting. Persons who wish to contact members of the staff may leave messages to arrange appointments or may leave written announcements or letters for possible publication in the newspaper.

## PKSAP

The American Psychiatric Association has developed and implemented a self-assessment program for psychiatrists titled the Psychiatric Knowledge and Skills Self-Assessment Program (PKSAP). As a new option for the Annual Meeting, an overview of PKSAP will be presented using a computerized audience response system (a touch-tone pad at each seat) to respond to selected PKSAP multiple choice questions and patient management problems for each topic in modules A, B, and C. One of each of the three PKSAP modules will be presented each day, 10:00 a.m.-5:00 p.m. Module A will be on Tuesday, and the topics include diagnostic testing, geriatric psychiatry, schizophrenia, sexual functioning and disorders, and short-term dynamic psychotherapy and family therapy; Module B will be reviewed on Wednesday, and the topics include affective disorders, alcohol and substance abuse, emergency psychiatry, forensic psychiatry, and sleep disorders; Module C will be presented Thursday, and the topics include anxiety, personality and impulse disorders, child psychiatry and organic mental disorders, and psychopharmacology.

## FRIDAY AFTERNOON SITE VISITS

In conjunction with the Annual Meeting, the APA Scientific Program Committee has invited Dallas psychiatric facilities to develop supplemental activities to the scientific program. In order to participate in one of these programs you must sign up in the Hospitality Center, Room N-401 of the Convention Center by Wednesday, May 22 at 1:00 p.m. Transportation instructions will be provided at that time. The programs will last about three hours and will be limited to 45 participants to each facility.

The following programs will be offered from 1:30 p.m. to 5:00 p.m. on Friday, May 24: Timberlawn Psychiatric Hospital, Inc. and Southwestern Medical School.

## CONTINUING EDUCATION CREDIT

The American Psychiatric Association is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to sponsor continuing medical education for physicians, and the official Annual Meeting program, with some exceptions, meets the criteria for continuing medical education, Category I credit. One hour of credit may be claimed for each hour of participation. As an organization accredited for continuing medical education, the American Psychiatric Association certifies that the continuing medical education activities designated as Category I meet the criteria for Category I of the Physician's Recognition Award of the American Medical Association and the CME requirements of the APA.

All program activities are designated either Category I or Category II. Sessions designated as Category II are marked with an asterisk (\*) in the program book.

In addition to the other Annual Meeting sessions certified for Category I, 71 CME courses will be offered at the Annual Meeting. The courses will be offered in half-day and one-day formats. One hour of credit may be claimed

for each hour of participation. Four one-day courses on Saturday, May 18, and five one-day courses and 10 symposia on Sunday, May 19, have been arranged prior to the Opening Session and will also provide Category I credit. Admission to all courses is by Annual Meeting badge and course ticket only.

One of the criteria for Category I approval is that a program explore one subject or closely related group of subjects in depth; to claim credit, registrants should attend a session or course in its entirety and use the Annual Meeting Syllabus in conjunction with the Annual Meeting session materials.

## TO PARTICIPATE IN THE 1986 ANNUAL MEETING

To present a scientific paper, symposium, course, workshop, video or film at the 1986 APA Annual Meeting in Washington, D.C., May 10-16, 1986, obtain a form in the Membership Resource Center or the Scientific Program Office. This form was mailed to the entire membership in April.

The form contains complete instructions. PLEASE NOTE that all proposals for the 1986 Annual Meeting must be in the Office of the Chairperson of the Scientific Program Committee, APA Headquarters, 1400 K St., N.W., Washington, DC 20005 by **September 7, 1985**. Otherwise they cannot and will not be processed for the Committee's consideration. The full text of a scientific paper does not have to accompany the abstract, but two copies must be received at APA headquarters by **September 27, 1985**.

# SCIENTIFIC EXHIBITS

## AMOXAPINE: NEUROLEPTIC ACTIVITY AND EFFICACY IN PSYCHOTIC DEPRESSION (Booth 1022)

Raymond F. Anton, M.D., Charleston, SC

Eleven psychotically depressed patients were treated with increasing doses of amoxapine for up to 5 weeks. Seven patients responded clinically, and one showed a partial response. A threefold increase in serum prolactin and significant serum neuroleptic activity occurred during treatment, which provides *in vivo* evidence, although limited, of amoxapine's dopamine-blocking activity.

## ANTICONVULSANT DRUGS AND COGNITIVE FUNCTION (Booth 1026)

Michael R. Trimble, M.R.C.P., F.R.C. Psych., London, England

Two studies were conducted to examine the relationship between anticonvulsant drugs and cognitive function. Cognitive function improved in patients who received carbamazepine in lieu of one or more anticonvulsants and in patients who reduced the number of anticonvulsants they received. High anticonvulsant serum levels were associated with impairment in cognitive function.

## ANTIDEPRESSANT DRUGS AND THE SEIZURE THRESHOLD (Booth 1101)

Michael R. Trimble, M.R.C.P., F.R.C. Psych., London, England

The literature on the relationship between antidepressant drugs and seizure threshold will be briefly reviewed. A comparison of the effect of amitriptyline, nomifensine, and placebo on seizure precipitation in a double-blind study of 42 depressed epileptic patients will be presented.

## ANTIDEPRESSANT DRUGS (CURRENT AND NEWER) AND THEIR CARDIOVASCULAR EFFECTS (Booths 1039, 1041)

Alexander Glassman, M.D., New York, NY

The direct cardiac effects of the older tricyclic antidepressants are limited but quite consistent. They do not pose a serious risk to cardiac status in patients without preexisting cardiac complications. The most common dangerous cardiovascular effect is that of hypotension, especially in the elderly. The newer antidepressants have a different profile, but still require greater clinical experience before cardiovascular safety can be established.

## BIOCHEMICAL CORRELATES OF ANTIDEPRESSANT THERAPY: CHANGES IN PLASMA MHPG (Booth 1028)

David G. Ostrow, Chicago, IL

This exhibit presents a study of biochemical markers in depressed patients and examines the influence of single-blind doxepin therapy on those markers. Plasma MHPG levels distinguished two groups, which are described according to clinical, psychological, and biochemical characteristics.

## BRAIN CHANGES, NEGATIVE SYMPTOMS, AND NEUROLEPTIC EFFICACY IN CHRONIC SCHIZOPHRENIC PATIENTS (Booth 1032)

George Serban, M.D., New York, NY

This exhibit presents a clinical study of 30 chronic schizophrenic patients with pronounced negative symptoms and weak or absent positive symptoms who were treated with thiothixene for 11 weeks. Correlations between negative symptoms, treatment, brain changes, and scale findings will be presented and analyzed.

## BUPROPION: ONE-YEAR TREATMENT IN OUTPATIENTS PREVIOUSLY GIVEN TRICYCLIC ANTIDEPRESSANTS (Booths 1013, 1015)

Elmer A. Gardner, M.D., Washington, DC

Forty-eight private practice patients were entered into an open uncontrolled clinical trial designed to evaluate the long-term efficacy and safety of bupropion hydrochloride in patients who did not tolerate or did not respond to tricyclic antidepressants. The overall efficacy of bupropion (39 patients) was 81%. Ineffectiveness or side effects required termination of bupropion treatment in eight (17%) of the patients. Twenty-seven (69%) of the bupropion responders completed 1 year of treatment. Patient scores on the Hamilton Rating Scale for Depression and the Clinical Global Impression Scale and a summary of the side effects and reasons for termination of bupropion treatment are presented.

## COMPARISON OF AMOXAPINE AND DOXEPIN, WITH SPECIAL REFERENCE TO EARLY ONSET OF ACTION (Booth 1034)

Donald E. O'Hair, Ph.D., San Diego, CA

Pooled data were compared from patients treated with amoxapine or doxepin who attained early unquestionable clinical improvement ( $\geq 75\%$  improvement on the Hamilton Rating Scale for Depression and "markedly improved" on the Clinical Global Impressions Scale. Amoxapine patients were significantly ( $P \leq 0.05$ ) more improved at days 4, 7, and 14. Those given doxepin experienced more drowsiness and dry mouth, while those given amoxapine experienced more constipation.

## CONTROLLED EVALUATION OF A NEW CLASS OF ANTIANXIETY AGENTS

(Booth 1017)

Jay B. Cohen, M.D., Los Angeles, CA

The efficacy and safety of buspirone, a new nonbenzodiazepine anxiolytic, were compared with those of clorazepate in a 4-week, double-blind assessment of anxious psychoneurotic patients with or without depression. Six standard psychometric tests were used. The agents were essentially equipotent, but buspirone caused significantly fewer drug-related adverse reactions, including less sedation, than clorazepate.

## A DOUBLE-BLIND COMPARATIVE EVALUATION OF NOMIFENSINE MALEATE AND IMIPRAMINE HYDROCHLORIDE IN DEPRESSED OUTPATIENTS (Booth 1103)

James Bremner, M.D., Olympia, WA

This presentation discusses a multi-center, double-blind study of the comparative efficacy and safety of nomifensine maleate and imipramine hydrochloride in the treatment of depressed adult outpatients. Nomifensine was found to be statistically superior to imipramine in four indexes of treatment and to cause fewer side effects.

## A DOUBLE-BLIND COMPARISON OF NOMIFENSINE MALEATE AND IMIPRAMINE HYDROCHLORIDE IN DEPRESSED GERIATRIC OUTPATIENTS (Booth 1104)

Charles Meredith, M.D., La Mesa, CA

This presentation discusses a double-blind investigation of the efficacy and safety of nomifensine, imipramine, and placebo in treatment of 62 depressed geriatric patients divided into three groups. Nomifensine and imipramine were found superior to placebo, but there was no significant difference between the active agents on the basis of analysis of various scales and tests.

## FLUPHENAZINE PHARMACOKINETICS: CLINICAL IMPLICATIONS AND DOSING GUIDELINES (Booth 1038)

Larry Ereshefsky, Pharm. D., San Antonio, TX

The clinical utility of obtaining fluphenazine plasma levels is demonstrated by application to patients at San Antonio State Hospital. Guidelines for the use of fluphenazine hydrochloride and decanoate are presented. Response and side effect correlations with plasma level are presented as well as dose conversion from oral to depot therapies. A pharmacokinetic model based on plasma level analysis using the Advanced Continuous Simulation Language indicates that the absorption rate (7-day half-life) of the depot neuroleptic plays a major role in the time to steady state. In contrast, oral data derived from bioequivalence studies yield half-lives of 15–20 hours with times to steady state of 4 days versus 34.5 days for patients receiving weekly depot injections.

## INTERACTION OF BUSPIRONE AND DIAZEPAM WITH ALCOHOL IN HEALTHY HUMAN SUBJECTS (Booth 1019)

Herbert Moskowitz, Los Angeles, CA

The effects on driving skills of buspirone and diazepam, singly and in combination with alcohol, were examined. Performance of skills was measured on a driving simulator and a laboratory divided-attention apparatus requiring both tracking and visual search skills. In this study, diazepam, with or without alcohol, produced significantly more functional impairment than either placebo or buspirone with or without alcohol. Buspirone was not significantly different from placebo, with or without alcohol, respectively.

## LORAZEPAM: ADJUNCTIVE USE IN PSYCHIATRY (Booth 1021)

Stephen R. Saklad, Pharm.D., San Antonio, TX

Lorazepam has proved of value in treating anxiety. Data on its usefulness in status epilepticus and as an anterograde amnesic for surgical candidates, burn victims, and chemotherapy patients have been published. This study includes lorazepam use in dystonia, cogwheel rigidity, akathisia, and tardive dyskinesia. Promising results are reported.

## LOW DOSE MAINTENANCE THERAPY WITH FLUPHENAZINE DECANOATE (Booth 1042)

Stephen R. Marder, M.D., Los Angeles, CA

An increasing awareness of the adverse effects of neuroleptic drugs has focused attention on the need to treat schizophrenic outpatients with the lowest effective maintenance dose. This exhibit will display the costs and benefits of substantially lowering the dose of fluphenazine decanoate in stable outpatients.

## LOXAPINE IN CHRONIC ORGANIC BRAIN SYNDROME (Booth 1040)

Thomas A. Ban, M.D., Nashville, TN

Patients 60 years of age or older who had chronic organic brain syndrome with psychosis were treated with loxapine, thioridazine, or haloperidol in five comparative double-blind studies. Although overall improvement was similar with all three agents, all significant ( $P < 0.05$ ) improvements at week 1 favored loxapine. Mild to moderate sedative and extrapyramidal effects occurred with each drug.

#### MEASUREMENT OF ANTIDEPRESSANT METABOLITES IN PATIENTS TREATED WITH LOXAPINE (Booth 1046)

Earl A. Burch, Jr., M.D., New Orleans, LA

The coexistence of psychosis and depression is a diagnostic and treatment challenge. Although some neuroleptics are thought to have antidepressant properties, loxapine is the only neuroleptic whose metabolite, amoxapine (Asenden), is marketed as an antidepressant. This exhibit will demonstrate that patients treated with loxapine achieve measurable levels of this antidepressant metabolite.

#### A PLACEBO-CONTROLLED MULTI-CENTER STUDY OF NOMIFENSINE IN DEPRESSED OUTPATIENTS (Booth 1102)

John Feighner, M.D., La Mesa, CA

This presentation discusses a 4-week, placebo controlled, multi-center study of the efficacy and safety of nomifensine maleate in treatment of depressed adult outpatients. The nomifensine group (61 patients) showed a statistically significant improvement over the placebo group (63 patients) at weeks 3 and 4 and at end point, as measured by total Hamilton Rating Scale for Depression score and various other factors.

#### THE RECOGNITION OF AKATHISIA IN NEWLY ADMITTED ACUTE PSYCHIATRIC PATIENTS (Booths 1035, 1037)

Luis Ramires, M.D., Brecksville, OH

Medication-induced akathisia in the newly admitted acute psychiatric patient, can result in increased disruptive behavior, misdiagnosis, and lack of compliance. Early detection of akathisia and modification of the medication regimen can result in abatement of akathisia, control of symptoms, and patient compliance.

#### SLEEP DISTURBANCES IN THE ELDERLY: CURRENT APPROACHES TO DIFFERENTIAL DIAGNOSIS AND MANAGEMENT (Booth 1044)

Joel Posner, M.D., Philadelphia, PA

## PHYSICIAN PATIENT EDUCATIONAL SERVICES EXHIBITS

#### AMERICAN ASSOCIATION FOR GERIATRIC PSYCHIATRY (Booth 1014)

Elliott M. Stein, Chicago, IL  
This professional organization promotes quality psychiatric care for older individuals. AAGP cosponsors symposia, lectures, and courses at national meetings for psychiatry and gerontology. It also publishes newsletters and directories. This organization is striving to create a national network of geriatric psychiatrists for the benefit of patients and the profession itself.

#### THE CHRISTIAN MEDICAL SOCIETY, PSYCHIATRY SECTION (Booth 1006)

Sharon Smith, Richardson, TX  
Presupposing that man is a creature of a personal God, the Psychiatry Section of the Christian Medical Society seeks to be a positive catalyst helping therapists to be sensitive to man's religious or spiritual dimension. This sensitivity affects the patient's or client's therapy as well as the psychiatrist's world view.

#### FABRE CLINIC (Booth 1018)

Louis F. Fabre, M.D., Ph.D., Houston, TX

In a 4-week double-blind study, amoxapine and maprotiline were compared in the treatment of 73 outpatients with moderate to severe depressive illness. The significant differences on the Hamilton Rating Scale for Depression and the Clinical Global Impression Scale that favored amoxapine at days 4 and 7 included some factors recently shown to be predictive of favorable ultimate response. Over a 4-week period amoxapine and maprotiline appeared equally efficacious and safe.

#### INTERNATIONAL PSYCHIATRIC ASSOCIATION FOR THE ADVANCEMENT OF ELECTROTHERAPY (Booth 1016)

Glen N. Peterson, M.D., Oakland, CA

This nonprofit organization has a dedicated membership in the United States, Canada, and Mexico. It was originally founded in 1976 due to concern about serious detriments to patient care resulting from widespread ignorance and prejudice about ECT and from direct, irrational legal constraints on patient access to ECT. Promotion of basic and continuing education in ECT for psychiatrists is also a goal of the organization.

#### THE MANIC-DEPRESSIVE AND DEPRESSIVE ASSOCIATION (Booth 1012)

Marilyn J. Weiss, Northbrook, IL

## The Brain and Heart: Clinical Interrelationships

Sunday, May 19, 1985 • 7 pm to 10 pm

The Wedgewood Room, Loews Anatole, Dallas, Texas

*"Every affection  
of the mind that is  
attended with either  
pain or pleasure,  
hope or fear,  
is the cause of an  
agitation whose  
influence extends  
to the heart."  
—William Harvey,  
1628*

Patients and physicians frequently attribute many complaints to organic cardiovascular disease and, conversely, attribute organic cardiovascular disease to psychological disorders. Appropriate treatment of anxiety in the medically ill patient requires first its recognition, then some knowledge of the underlying pathophysiology, and, finally, information about the therapies used. The same can be said of depression in the patient with cardiovascular disease. Finally, it is necessary to recognize those patients who have cardiac symptoms that are part of a psychiatric disorder characterized as generalized anxiety disorder. The purpose of this symposium is to familiarize physicians with these problems, to help them establish proper diagnoses, and apply appropriate treatments. *Videotaped patient interviews and interactive computer technology will be included in the program.*

The American Psychiatric Association designates this continuing medical education activity for 3 credit hours in Category 1 of the Physician's Recognition Award of the American Medical Association and for the CME requirement of the APA

Supported by an educational grant from the Upjohn Company

 Mayo Clinic and Mayo Medical School  
 announces

**“The Fog People:  
 Families of the Addicted”**

This unusual program, developed at the Mayo Clinic as part of its Insight series, integrates classical dramatic literature and contemporary medical knowledge to examine a specific psychiatric issue.

- Geraldine Fitzgerald, Jason Robards, and Sam Robards will perform provocative excerpts from Eugene O'Neill's *Long Day's Journey Into Night*.

- Following their performance, three physicians from the staff of the Mayo Clinic will respond to the drama from several medical perspectives: the interaction of drug and patient; the reaction of the family; the dilemma of the physician.

- A discussion with actors, panelists, and audience will conclude the evening.

**\*FILM SESSION I: NOON FEATURE**

**Chp.:** Harvey R. Greenberg, M.D.

Consonant with the western locale of this year's Annual Meeting, our 1985 noon film festival presents films which relocate themes of the classic Hollywood western into a contemporary setting.

**F1 LONELY ARE THE BRAVE**  
(107 minutes) 1962

**Director:** David Miller

**Distributor:** Swank Motion Pictures  
4700 Wadsworth Road  
Dayton, OH 45414

Lonely are the Brave is an outstanding representative of what critic Philip French has called the "post-western western." A favorite theme of the classic western was the inroads of civilization upon the landscape and values of the old west; according to the western mythos, with the coming of the railroad, came the superimposition of the town's collective culture upon the cowboy's rugged individualism. Directors of early westerns, like John Ford, portrayed the march of civilization as inevitable, even necessary, but also recorded the poignant erosion of the hero's lonely freedom and integrity.

Since the sixties, post-westerns like Lonely are the Brave no longer view civilization's advance unambivalently. The landscape is now urbanized and polluted; greed and indifference prevail, and the "loner" protagonist engages in a valiant but hopeless struggle against a society that perceives him as nuisance or menace, rather than hero.

In Lonely are the Brave, Kirk Douglas gives one of the finest performances of his career as a quixotic misfit who breaks into jail to liberate a left-wing writer imprisoned for helping illegal Mexican immigrants. Dalton Trumbo wrote the screenplay not long after his harassment by the United States House of Representatives Committee on Un-American Activities.

Merton M. Gill, M.D.

**West Ballroom C, Level III, Convention Center**

**Chp.:** Morton Reiser, M.D.

**Co-Chp.:** Gerald A. Melchiode, M.D.

Psychoanalysis and psychoanalytically oriented therapy are two different groups of care, not parts of a continuum, Merton M. Gill, M.D., will comment in his address, "Psychoanalysis and Psychoanalytically Oriented Psychotherapy: A Revised View of Their Relationship." Dr. Gill, professor of psychiatry at the Abraham Lincoln School of Medicine,

University of Illinois, Chicago, and supervising analyst at the Chicago Psychoanalytic Institute since 1971, says that the dichotomy creates a greater range of conditions for which psychoanalytic care can be used. Since he received his medical degree from the University of Chicago in 1938, Dr. Gill has earned a reputation as one of America's leading psychiatric researchers. Among the honors for his research were the National Institute of Mental Health Research Career Award and the NIMH Research Scientist Award. In 1980, Dr. Gill received APA's Foundations' Fund Prize for distinguished contributions to research over the past 10 years.

Renée C. Fox, Ph.D.

**Grand Ballroom C, Lobby Level, Anatole**

**Chp.:** Elissa P. Benedek, M.D.

**Co-Chp.:** Frederick G. Guggenheim, M.D.

Bioethics in American health care go beyond making medical decisions. Not only do they illustrate American values and beliefs, but their focus also can have deleterious effects on medical education by diminishing the already weak behavioral science training medical students receive. These are among the points sociologist Renée C. Fox, Ph.D., will make during her lecture, "The Expansion of Bioethics: Its Significance and Side Effects." Dr. Fox is professor of sociology and psychiatry at the University of Pennsylvania, Philadelphia. She has studied the development of medical ethics, the role of medicine in society, and the meaning of illness and death in American culture. Her books include: The Courage to Fail: A Social View of Organ Transplants and Dialysis and The Social Meaning of Death. In addition, Dr. Fox has written extensively about the ethics of medical experimentation and technology, American society's response to illness, and the methods by which society determines the content of medical education.

STUDENTS**

Richard C. Simons, M.D.

Monet Ballroom, Mezzanine Level, Anatole

**Chp.:** Herbert Pardes, M.D.

**Co-Chp.:** Larry B. Silver, M.D.

This year's Seymour D. Vestermark Award is one of many well-deserved honors received by Richard C.

Simons, M.D., professor of psychiatry at the University of Colorado Health Sciences Center and supervising analyst at the Denver Institute for Psychoanalysis. Dr. Simons has been recognized for teaching excellence by his psychiatric residents, his fellow educators, and his psychiatric colleagues. His teaching techniques, which include use of videotapes, have brought new and valuable dimensions to psychiatric course work. His presentation, "Reaching Them Where They Are At: Bringing Psychiatry to Medical Students," will reflect those techniques. In addition to his professorial responsibilities, Dr. Simons has served on curriculum, education, and residency selection and evaluation committees at the State University of New York Downstate Medical Center, the Denver Institute for Psychoanalysis, and the University of Colorado School of Medicine. He has contributed substantially to books and made numerous scientific presentations about medical student education in psychiatry.

2:00 p.m. - 4:00 p.m.

**LECTURE 4**

**CORONARY ARTERY DISEASE: SURGICAL, MEDICAL, AND PSYCHOLOGICAL DIMENSIONS OF TREATMENT**

Michael E. DeBakey, M.D.  
George H. Pollock, M.D.

**West Ballroom B, Level III, Convention Center**

**Chp.:** Robert L. Williams, M.D.  
**Co-Chp.:** Robert E. Hales, M.D.

The psychological implications of cardiac surgery will be the topic of a joint lecture by Michael DeBakey, M.D., famed heart surgeon and chancellor of the Baylor University College of Medicine, Houston, and George H. Pollock, M.D., one of America's foremost experts on the relationship between physiology and psychiatric illness. Dr. DeBakey will discuss the efficacy of coronary bypass surgery and Dr. Pollock will focus on the processes by which patients come to terms with such surgery. Dr. DeBakey has made medical history throughout his career. As a medical student, he developed a pump that later became an essential part of the heart-lung machine. A pioneer in developing the artificial heart, Dr. DeBakey was the first to successfully graft replacements for arterial aneurysms and obstructive lesions and to successfully use a heart pump in a patient. His Dacron artificial arteries now are routinely used for treating diseased arteries. He also performed the first successful carotid endarterectomy, thereby establishing the field of surgery for strokes. Dr. Pollock's research in neurophysiology, neuropharmacology, psychiatry, psychoanalysis, and

psychosomatic medicine has established a foundation for understanding the developmental processes of youth and aging and for clinical application of psychoanalytic principles. Dr. Pollock is clinical professor of psychiatry at the University of Illinois College of Medicine and is president of the Institute for Psychoanalysis, Chicago. He serves as treasurer of the APA and president of the Chicago Psychoanalytic Society.

**FILM SESSION II: CULTURAL COLLISION: FIRST CONTACTS**

**Chp.:** Barry Morenz, M.D.

When cultures collide, a change occurs on both a group and individual level. This session will explore the individual and group responses to cultural clash, and will illustrate defensive reactions which occur within individuals as well as groups, and how these defensive reactions can be transformed into culturally acceptable behavior.

**F2 FIRST CONTACT (54 minutes) 1982**

**Producers:** Bob Connolly and Robin Anderson

**Distributor:** Filmmakers Library, Inc.  
133 East 58th St., Suite 703A  
New York, NY 10022

This film uses archival footage to illustrate the first contact between westerners and New Guinea highlanders in the 1930's. It traces the progress of the Leahy brothers, a family of Australian gold miners, as they traverse the highlands of New Guinea and become the first outsiders to meet the culture of a completely isolated population of one million native people. The natives' early attempts to explain the white man's presence within their own cultural belief systems soon fail, and the results are illustrated in the film.

Trobriand Cricket, set in the Trobriand Islands, explores how the local natives have used the culture of a colonizing group and adapted it to their own needs. This film is a fascinating and delightful study of a group response to cultures in conflict.

**Discussant:** James Collins, M.D.

## VIDEOTAPE SESSIONS

**3:30 p.m. - 5:00 p.m.**

**Monet Ballroom, Mezzanine Level, Anatole**

### **WORKING WITH AIDS: PROBLEMS WITH PATIENTS, CAREGIVERS, AND PUBLIC ATTITUDES**

Acquired Immune Deficiency Syndrome (AIDS) is usually a fatal disease with recently described psychiatric manifestations and strong emotional and social impact. Using two tapes, Killer In the Village and AIDS: Staff Reactions on a Psychiatric Unit, the discussion will focus on the reaction of caregivers, patients, and the public to this condition, and the attempts that concerned and compassionate health providers are making to minimize the reactions of avoidance and fear among staff working with the severely ill AIDS patient.

**Director:** H. James Lurie, M.D.

This format provides an opportunity for clinicians and psychiatric educators to meet with a professional expert in the area of video production, technology, and training, to consult on completed videotapes or videotapes in production and to discuss ideas for new educational videotapes. The goal is both to promote the development of video teaching materials of high technical and educational quality and to encourage members to produce and submit new programs for the 1986 video sessions at the Annual Meeting in Washington, May 10-16.

One-half inch VHS playback equipment is available, and participants are invited to bring cassettes of completed work or work-in-progress. Short five-minute segments of the work of various participants will be shown in a workshop-consultation atmosphere to facilitate an exchange of ideas.

## BEDSIDE ROUNDS ON THE PSYCHIATRIC WARD

Including the patient in the discussion about his condition, treatment planning, and prognosis has become a prominent theme in psychiatric literature

and research. Through videotape and discussion, this presentation will demonstrate how bedside rounds can be utilized on a psychiatric unit. Such bedside rounds are used not only to teach about psychopathology and differential diagnosis, but to include patients in a tactful discussion. In this way, they too may learn about what is being taught without embarrassing, frightening, or disturbing them.

**WHAT ARE WE GOING TO DO ABOUT THE CARE OF THE POOR?**

Arnold S. Relman, M.D.

**East Ballroom D, Level III, Convention Center**

**Chp.:** Allan Beigel, M.D.

**Co-Chp.:** Alan I. Levenson, M.D.

Since 1977, Arnold S. Relman, M.D., has watched American medicine navigate changing political and clinical waters by reviewing and editing medical, economic, and political research papers submitted to the New England Journal of Medicine. As editor of that prestigious publication, Dr. Relman has developed a unique perspective on the state of medical care in America, and he will bring that perspective to his lecture, "What Are We Going To Do About the Care of the Poor?" He contends that competition among health care providers is undermining traditional voluntary efforts to provide high quality health care to the indigent. At the same

time, governmental policy is eroding tax support for the public institutions on which the poor increasingly rely for care. The result, he says, could be national health insurance. In addition to editing the *New England Journal of Medicine*, Dr. Relman is professor of medicine at Harvard Medical School and a member of the board of directors at the Hastings Center's Institute of Society, Ethics and the Life Sciences. He was president of the Association of American Physicians in 1983-1984 and a member of the board of directors, American Society of Law and Medicine, 1981-1983.

**THE PSYCHIATRY OF DISASTER**

Beverley Raphael, M.D.

**West Ballroom A, Level III, Convention Center**

**Chp.:** Carol C. Nadelson, M.D.  
**Co-Chp.:** Naomi Goldstein, M.D.

Beverley Raphael, M.D., has gained international renown for her pioneering work in preventive psychiatry for victims of both everyday and extraordinary crises. She will bring that expertise to her presentation, "The Psychiatry of Disaster," in which she discusses the psychopathological reactions to disasters and their effect on special groups of people. Dr. Raphael also will discuss psychiatric intervention and its results. Her research into psychological reactions to important life events such as first pregnancies and disasters has shed valuable insight into the variables that contribute to mental disorders. Among her best known works are studies on the impact a parent's death has on young children, development of intervention programs for major disaster victims, and research into the antecedents and risk variables that are linked to adolescent mental disorders. In addition to her research, Dr. Raphael, who is the Foundation Professor of Psychiatry at the University of Newcastle, Newcastle, New South Wales, has been involved in the development of high quality mental health care services in the community and in psychiatric and general hospitals.

**F5 BAD DAY AT BLACK ROCK**  
(81 minutes) 1957

**Director:** John Sturges  
**Distributor:** MGM/United Artists  
1350 Avenue of the Americas  
25th Floor  
New York, NY 10019

In a classic configuration of the western genre, one man opposes a small town corrupted by greed and fear until the integrity of the body politic can be restored — often at the price of his own life or self-imposed exile.

Bad Day at Black Rock scorchingly reinvents this scenario in a post-World War II California desert town. Sergeant John J. MacCready, a dispirited one-armed combat hero, stops at Black Rock before resuming civilian life in the East. He seeks the father of one of his slain troops, a Japanese farmer, to give him his son's posthumous decoration. The farmer has disappeared under mysterious circumstances. A series of increasingly abrasive encounters between MacCready and the local "boss" escalates into outright violence as MacCready seeks to unravel the grim secret of Black Rock, and restore meaning to his blasted life.

**\* Offers Category II**

Spencer Tracy gives one of the most adroit performances of his career as the resourceful MacCready. Crisp dialogue, arresting visual composition, and the skillful deployment of deliberately limited means characterize this remarkable film. Several violent moments make it unsuitable for small children.

**Monet Ballroom, Mezzanine Level, Anatole**

### **USES OF VIDEO IN PSYCHIATRIC SUPERVISION**

**Chp:** H. James Lurie, M.D.

For a number of years, videotape playback has been used as a teaching technique through which psychiatric supervision of individual therapy cases can be enhanced. Alternative supervision techniques with video which have also been developed over the past several years include using video segments in group supervision, showing segments of videotapes to both family members and family therapists in training, and having videotapes from one training group critiqued by a training group from a different country. Video in supervision is often limited only by the imagination of the supervisor and the resistance of the supervisee. Four eminent clinician-teachers will describe in this session their specific uses of video in psychiatric supervision.

#### **APA'S ADOLF MEYER LECTURE**

#### **MEYERIAN PSYCHOBIOLOGY, PERSONALITY DEVELOPMENT AND THE ROLE OF LIFE EXPERIENCES**

Michael Rutter, M.B., Ch.B.

**East Ballroom B, Level III, Convention Center**

**Chp.:** Bennett L. Leventhal, M.D.

**Co-Chp.:** Irving Philips, M.D.

Michael Rutter, M.B., Ch.B. will bring his own expertise about the importance of life history in the development of mental illness when he presents the Adolf Meyer Lecture, "Meyerian Psychobiology, Personality Development and the Role of Life Experiences." During the lecture, Dr. Rutter will discuss the relationship between Meyer's concepts and recent research. He will focus on ways in which the environment and biological predisposition affect the development of psychiatric disorders. A professor of child psychiatry at the University of London Institute of Psychiatry, Dr. Rutter is well known for his contributions to the understanding of autism, the relationship between mentally ill parents and their children's development, and adolescent mental health. He also is an expert on mental health and the family. Dr. Rutter serves on numerous British and American committees, councils, and research groups, including the Medical Advisory Committee for the National Society for Autistic Children, the U.S. Social Science Research Council's Committee on Social and Affective Development during Childhood, and the U.S. Academy of Sciences Committee on Child Development Research and Public Policy.

**COURAGE, CREATIVITY, AND COST-EFFECTIVENESS: THE CHALLENGE FOR PSYCHIATRIC PROGRAM ADMINISTRATION**

Harold M. Visotsky, M.D.

**West Ballroom D, Level III, Convention Center**

**Chp.:** Stuart L. Keill, M.D.

**Co-Chp.:** Darold A. Treffert, M.D.

Throughout his career, Harold M. Visotsky, M.D., has worked to ensure high quality in the administration and delivery of mental health care. Dr. Visotsky is the Owen L. Coon Professor and chairman of the Department of Psychiatry and Behavioral Sciences at Northwestern University Medical School. In addition, he is director of the Institute of Psychiatry at Northwestern Memorial Hospital and of the Center for Mental Health and Psychiatric Services at the American Hospital Association. His career includes service as director of mental health at the Chicago Board of Health and director of the Illinois Department of Health. He also has served on the staffs of state hospitals and other public facilities. In presenting his lecture, "Courage, Creativity, and Cost-Effectiveness: The Challenge for Psychiatric Program Administration," Dr. Visotsky will look at three elements on which the future of mental health programs rests: the courage to effectively market psychiatric programs; the ability to discriminate between innovation and true creativity; and the adaptation of the review system so that it includes audits of cost-benefit ratios.

Jorge Luis Borges

**East Ballroom A, Level III, Convention Center**

**Chp.:** William D. Davidson, M.D.

**Co-Chp.:** Frederick Gottlieb, M.D.

One of the 20th century's literary giants, Jorge Luis Borges developed his love of literature when, as a child exploring his father's library, he discovered the English classics. Since then, he has shared his intense interest in language and in the world of imagination and its symbols through his writings.

**\*Offers Category II**

Among his works that have been translated from Spanish into English are The Aleph and Other Short Stories, Ficciones, Labyrinths, and Dreamtigers. During his travels through Spain from 1919 to 1921, Sr. Borges became associated with the school of avant-garde poets known as Ultraists. His short stories, essays, and novellas departed from the literary traditions of his native Rio de la Plata, Argentina, and treated literature as a game of illusion with language as its chief player. Winner of the International Publishers' Prize for Literature in 1961 and the Commandant de l'Ordre des Lettres et des Arts, conferred by the French government, Sr. Borges continues to have considerable influence on writers and readers throughout the world. Today he lives in Buenos Aires.

Melvin Sabshin, M.D.

West Ballroom D, Level III, Convention Center

Chp.: Jonathan F. Borus, M.D.

Co-Chp.: Orlando B. Lightfoot, M.D.

As APA Medical Director since 1974, Melvin Sabshin, M.D., has developed extensive expertise in the economic, political, and social conditions that affect psychiatry. During his lecture, "Coping with 'New Realities,' Empiricism and the Resurgence of Psychiatry," Dr. Sabshin will discuss the issues, the science, and the organizational strength that will determine the profession's future. Before accepting his position at the APA, Dr. Sabshin was acting dean of the Abraham Lincoln School, University of Illinois College of Medicine, and also served as professor and chair of the Department of Psychiatry at the University of Illinois College of Medicine. He earned his medical degree from Tulane University School of Medicine in 1948. Dr. Sabshin has served as chair of the APA's Scientific Program Committee and as president of the American College of Psychiatrists. Active in international affairs, he was elected to serve on the Executive Committee of the World Psychiatric Association in 1983.

**FILM SESSION V : CHILD SEXUAL ABUSE**

**Chp.:** Allan Tasman, M.D.

This program will explore the problem of child sexual abuse. The presentation will include a review of the extent of this problem, as well as demonstrate methods of education for children ranging from pre-school through adolescence.

**F6 CHILD SEXUAL ABUSE: WHAT YOUR  
CHILDREN SHOULD KNOW, A PROGRAM  
FOR PARENTS (90 minutes) 1983**

**Produced and written by:** Michael Hirsch

**Director:** Pat Denny

**Distributor:** Indiana University  
Audio-Visual Center  
Bloomington, IN 47405

This is one of five films in a series which provides both children and adults with techniques and information to identify and avoid child sexual abuse. This film, geared for an adult audience, reviews several case histories of women who were sexually abused and concludes with illustrations of specific educational programs.

**F7 NO MORE SECRETS (13 minutes) 1982**

**Director:** Peter Barton  
**Distributor:** O.D.N. Productions, Inc.  
 74 Varick Street, Suite 304  
 New York, NY 10013

This film, using a clever combination of live action and animation, is directed toward an audience of latency age children. It is an excellent example of an approach to educate children about sexual abuse and is a valuable resource for anyone working with children.

## VIDEOTAPE SESSIONS

**2:00 p.m. - 5:00 p.m.**  
**Monet Ballroom, Mezzanine Level, Anatole**

**NOT GUILTY BY REASON OF INSANITY**  
**2:00 p.m. - 4:00 p.m.**

**Chp.:** Jonas R. Rappeport, M.D.

The insanity defense has been the subject of intensive scrutiny in recent months by psychiatrists, attorneys, governmental officials, and families, evaluating the ethical, legal, and psychological issues which must be weighed in evaluating a person who pleads, "Not Guilty, by Reason of Insanity." This session will focus on the issues raised by the videotape, Not Guilty by Reason of Insanity--Henry. The tape focuses on Henry, who murdered his mother, aunt, and uncle, showing an interview of Henry by a psychiatrist. Questions about Henry's illness and its relationship to the crimes and the insanity plea are raised by the videotape.

**SUICIDE: CAN THE ATTITUDES OF CAREGIVERS KILL?**

**4:00 p.m. - 5:00 p.m.**

**Chp.:** Bryan L. Tanney, M.D.

The issue of responsibility for a person's suicide has plagued and intrigued therapists, family members, and acquaintances of individuals who have killed themselves: How could it have been prevented, and was it my fault? Using the following videotape as a focus, the session will address issues of responsibility, prevention, and intervention.

**F8 THE BALLAD of GREGORIO CORTEZ (100 minutes) 1983**

**Director:** Robert M. Young  
**Distributor:** Films Incorporated  
 440 Park Avenue South  
 New York, NY 10016

The Ballad of Gregorio Cortez, based on a true story, examines the effects on an individual of racial discrimination and cultural prejudice. The film follows the story of Gregorio Cortez, a Mexican immigrant in Texas, as he is tried and convicted and finally exonerated in the death of the local sheriff. The film explores how the awareness in the protagonist of his role as scapegoat is contrasted with the non-reflective response of his pursuers and illuminates how their pursuit galvanizes and reinforces their pre-existing belief systems.

**\*VIDEO PRODUCTION CLINIC B**

**8:30 a.m. - 10:15 a.m.**

**Ming Room, Mezzanine Level, Anatole**

**Director:** Edward A. Mason, M.D.

This format provides an opportunity for clinicians and psychiatric educators to meet with a professional expert in the area of video production, technology, and training, to consult on completed videotapes or videotapes in production and to discuss ideas for new educational videotapes. The goal is both to promote the development of video teaching materials of high technical and educational quality and to encourage members to produce and submit new programs for the 1986 video sessions at the Annual Meeting in Washington, May 10-16.

One-half inch VHS playback equipment is available, and participants are invited to bring cassettes of completed work or work-in-progress. Short five-minute segments of the work of various participants will be shown in a workshop-consultation atmosphere to facilitate an exchange of ideas.

**8:30 a.m. - 10:15 a.m.**

**GLOSSOLALIA: A BIOPSYCHOSOCIAL PHENOMENON**

The phenomenon of speaking in tongues, or glossolalia, has intrigued religious leaders, psychiatrists, and neurolinguists for many years. Using the videotape, Organic Glossolalia: A Neurolinguistic Analysis, as a focus, the presentation will illustrate the spectrum of glossolalia, the varying situations and circumstances in which it can occur, and the unique features of organic glossolalia (the clinical case which is reported here being the first instance of organically induced glossolalia in the literature).

**V6 ORGANIC GLOSSOLALIA: A NEUROLINGUISTIC ANALYSIS**

**Producer:** Michel R. Louvain, M.D.  
Marina City  
300 North State Street, #5307  
Chicago, IL 60610

**Discussant:** Michel R. Louvain, M.D.

Munchausen's Syndrome, or factitious illness, has been a fascinating condition for psychiatric study. Using a case of Munchausen's Syndrome, in which a patient demonstrates the scars from multiple surgical procedures and discusses her motivation for continually seeking medical attention and mutilation, the discussion will focus on identification of such patients, and intervention strategies which might be considered.

The value of work, meaning of employment and need for individual satisfaction is not determined by wages. These two films will be helpful for therapists dealing with issues of aging or retirement in their patients.

**F9 THE WORK I'VE DONE (56 minutes) 1984**

**Director:** Kenneth Fink  
**Distributor:** Blue Ridge Mountain Films  
49th St. & Marks Place  
New York, NY 10003

This film sensitively explores the reaction of several men facing retirement after long years of factory labor. It explores the personal stress attendant to retirement and illustrates the value for self-cohesion of work.

**TEMPTATION OF MADNESS**

Elie Wiesel

East Ballroom B, Level III, Convention Center

**Chp.:** Michael R. Zales, M.D.

**Co-Chp.:** Benjamin Liptzin, M.D.

Elie Wiesel, the author of Night, The Testament, and The Golem, has gained international recognition for his writings on the Jewish experience during the Holocaust and in contemporary society. He will bring that expertise to his lecture, "Temptation of Madness," during which he will discuss whether the elements of insanity that existed during World War II continue to exist, where they are, and how they are to be identified. Currently the Andrew W. Mellon Professor in the Humanities and professor of religions at Boston University, Professor Wiesel moved to the United States in 1956 after surviving the camps at Birkenau, Auschwitz, Monowitz, and Buchenwald during World War II. He has served as chairman of the President's Commission on the Holocaust and the U.S. Holocaust Memorial Council. Most recently, Professor Wiesel has been influential in the Jewish community's work toward relieving hunger in Ethiopia.

LECTURE 13

RECENT TRENDS IN THE DEVELOPMENT OF MENTAL HEALTH ACTIVITY IN THE PEOPLE'S REPUBLIC OF CHINA

Shen Yu-cun, M.D.

West Ballroom A, Level III, Convention Center

Chp.: Herbert Pardes, M.D.

Co-Chp.: John M. Davis, M.D.

Shen Yu-cun, professor of psychiatry and chair of the Department of Psychiatry at Beijing Medical College, is among the most respected psychiatrists in China. In addition, she is director of the Institute of Mental Health in Beijing, the People's Republic of China, and has been instrumental in establishing community-based mental health care centers throughout her country. During her presentation, "Recent Trends in the Development of Mental Health Activity in the People's Republic of China," she will discuss epidemiological studies, the network of community facilities in urban and rural China, and the mental health goals set by the Ministry of Health. Dr. Shen then will review the results of studies completed through collaboration between China and the United States. In addition, she will discuss the biopsychosocial approach to China's research in child psychiatric care, an area that has received increased attention there recently.

**F11 LAST NIGHT AT THE ALAMO**  
(80 minutes) 1983

**Director:** Eagle Pennell  
**Distributor:** Cinecom  
7 West 36th St.  
New York, NY 10018

The Texas filmmaker Eagle Pennell is a quintessential regionalist. He works on miniscule budgets and employs largely unknown casts with an idiosyncratic blend of "method" improvisation and cinema verite. His favored theme is the decline and fall of the Texas "good old boy," his favored locations are the dusty roadhouses and bars which, like their clientele, have seen better days.

**\*Offers Category II**

Last Night at the Alamo is the latest, and arguably the best of Pennell's efforts. The Alamo is a bar in the Houston suburbs, scheduled for demolition to make way for a mall. Its regulars assemble to drink, brag, and quarrel away the night. They comprise the most eccentric cohort of boozy dreamers assembled since The Iceman Cometh, a collective study in male Texas angst. Their plight is epitomized by Cowboy, a balding lothario with clouded dreams of becoming a Hollywood star, who embarks on an eleventh-hour quest to save his favorite wateringhole, with hilarious and poignant results.

### MEDIA IN PREVENTION AND ASSISTANCE WITH THE IMPAIRED PHYSICIAN

Chp.: Carolyn B. Robinowitz, M.D.

The prevention of physician impairment, as well as effective early intervention when impairment is identified, has been of great interest to both the medical community and groups concerned with insuring ethical and competent medical and psychiatric care for patients. In recent years, a number of videotapes have been produced which are designed to assist in prevention of impairment with physicians in training, to facilitate the process of life review for practicing physicians who may be experiencing stress, burnout, or depression, or to show through simulated interviews with impaired physicians, effective confrontational strategies which can serve as models for those who must "confront" a physician with an impairment.

This special program will include, as presenters and discussants, physicians with extensive expertise in the uses of media to enhance the goals of prevention, early intervention, or confrontation of impairment in physicians. Examples of some available media will be shown during this presentation.

**Chp.:** Donald G. Langsley, M.D.  
**Co-Chp.:** Charles W. Popper, M.D.

Nobel laureate D. Carleton Gajdusek, M.D., is devoted to children, particularly those living in developing nations. A pediatrician, Dr. Gajdusek has focused his life's work on studying disease patterns among children, particularly those in primitive cultures throughout the world. His discovery of the ways in which infectious diseases originate and spread earned Dr. Gajdusek the 1976 Nobel Prize in Physiology/Medicine. For the past 25 years, Dr. Gajdusek has been director of the Study of Child Growth and Development and Disease Patterns in Primitive Cultures and the Laboratory of Slow, Latent and Temperate Virus Infections at the National Institute of Neurological and Communicative Disorders and Stroke. Since 1970, Dr. Gajdusek also has been chief of the Laboratory of Central Nervous System Studies at the National Institutes of Health, Bethesda, MD. Not only does he invest his professional energies in pediatric health care, he also invests his personal resources in children's lives. Over the years, Dr. Gajdusek has adopted 21 children in the United States and 15 children in New Guinea.

Norman Dain, Ph.D., professor of history at Rutgers State University in Newark, N.J., and adjunct professor at Cornell University Medical College's Department of Psychiatry, is one of America's leading experts on the development of psychiatric care in Western civilization. The author of numerous books and articles about the history of psychiatry, the concept of insanity, and mental institutions, Dr. Dain has documented the evolution of American attitudes toward psychiatry since the 18th century when demons and witchcraft were thought to cause mental illness. His lecture, "Critics and Dissenters: Anti-Psychiatry in the United States," will review that evolution and discuss the mental health care developments that challenge psychiatry to-

**FILM SESSION IX: THE NAZI HOLOCAUST AND  
ITS RESIDUE**

**Chp.:** Edward A. Mason, M.D.

Because of the tragedy of the Nazi Holocaust, survivors have been strongly motivated to deny and repress their experiences in order to shield their children from the knowledge of such a brutal, horrible reality. The children often grew to believe that they should not question, trying to spare their parents pain. The result, unwittingly, was a conspiracy of silence, distancing parents from children, creating problems between the generations. These two films and the discussion will underline the nature of the problems and some of the progress being made.

**F12 NIGHT AND FOG (31 minutes) 1955**

**Director:** Alain Resnais  
**Distributor:** Films Incorporated  
440 Park Ave. South  
New York, NY 10016

This film classic is a grim story of the Nazi concentration camps. Documented with still and motion pictures, it is filled with counterpoint: between voice and music, black and white and color, past and present, living and dead. It recreates the horrors of the Holocaust. (French with English subtitles).

**F13 BREAKING THE SILENCE: THE GENERATION AFTER THE HOLOCAUST** (50 minutes) 1984

**Director:** Edward A. Mason, M.D.  
**Distributor:** Cinema Guild  
 1697 Broadway  
 New York, NY 10019

For many families of Holocaust survivors, the pain of talking about the horrors has inhibited communication. This is a film record of nine young Jews who came together in a consciousness-raising group, gained the courage and support to overcome the barriers of silence and then exchanged feelings and memories with their parents. This award-winning documentary illustrates the value of intergenerational communication and the impact of NOT sharing a family tragedy.

**SPECIAL PROBLEMS OF ADOLESCENCE**

**Chp.:** Diane Fagelman, M.D.

The complexities and conflicts of contemporary social and family life may, in combination with developmental conflicts, produce in some adolescents profound emotional turmoil. At times this may present as physical illness; at other times it may emerge in the desire to drop out of school or run away from home. The presentations in this program will focus on several special problems primarily associated with adolescence. Discussion will touch on the intrapsychic, familial, and social factors involved with such problems, as well as the possible roles of the psychiatrist in helping solve these problems.

**ANOREXIA NERVOSA**  
**2:00 p.m. - 2:45 p.m.**

Although potentially appearing at any age after puberty, anorexia nervosa is classically an illness of

the young adolescent girl. Using an excellent tape produced by the Carrier Foundation as a basis of demonstrating attitudes both of the general public and of patients in various stages of recovery, the discussion will focus on controversies over etiology, the various alternatives available for treatment, and the role of the psychiatrist as part of the treatment team.

**DROPOUTS**  
**2:45 p.m. - 3:30 p.m.**

High school students who are under stress, and disenchanted with their school life may choose to drop out of school. Using this sensitively-produced tape by an independent video producer from New York City the discussion will focus not only on factors which produce the drop out phenomenon, but the potential role of the psychiatrist in intervention

**RUNAWAYS**  
**3:30 p.m. - 5:00 p.m.**

Today's runaways are usually under 15, white, female, and middle-class; they are mostly running away from abuse, but run toward dangers which urban programs are trying to prevent. Featuring interviews with the adolescents and adults involved in this growing and almost ignored problem, this award-winning tape raises questions about where preventive efforts are needed.

FILM SESSION X: IN SEARCH OF SPOCK: A PSYCHOANALYTIC INQUIRY

Chp.: Harvey R. Greenberg, M.D.

Nearly 20 years after its first airing, Star Trek continues to enjoy an incredible world-wide popularity. This presentation focuses on the character universally nominated as a major source of Star Trek's enduring appeal: Mr. Spock, the elfin-eared Science Officer of the U.S.S. Enterprise.

It is suggested that Spock's noble, flawed figure recapitulates in outer space many a Terran youngster's search for a viable identity. Points of adolescent identification which will be considered include Spock's struggle to maintain control over his instinctual drives, his role as healing mediator between old and new, his unresolved Oedipal difficulties, ambivalence towards the feminine, his creativity and spirituality.

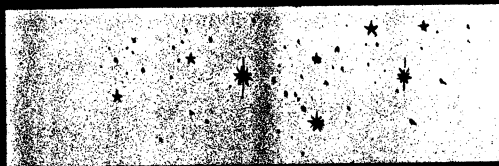

The entire series is also informed by an "adolescent" wrenching between the conservative values that pervade earlier science-fiction/adventure films, and the libertarian ideals of the late 1960's, when Star Trek came into being. Several examples of this intriguing torsion will be cited.

F14 STAR TREK: THE MOTION PICTURE (STAR TREK I) (130 minutes) 1979

Director: Robert Wise
Distributor: Films Incorporated
440 Park Avenue South
New York, NY 10016

With the passage of time, and two more Star Trek blockbuster films, Star Trek: The Motion Picture has fallen into some critical disfavor. But for the viewer who is willing to forego the quick action fix of today's space operas, it is a marvelous movie, most apt in depicting Spock's psychological dilemmas and the search for ontological truth that consumes his troubled soul.

As the film opens, Spock has retired to Vulcan for several years to prepare himself for the ritual of Kolinahr, the shedding of all emotions. He fails the test at the last moment, when his human feelings are stirred by telepathic contact with a vastly intelligent entity sweeping through deep space, destroying everything in its path. Sensing its purpose may be linked to his quest, Spock rejoins his friends aboard a recommissioned Enterprise to save Earth from destruction, and find peace for his beleaguered spirit.

## VIDEOTAPE SESSIONS

**\*VIDEO PRODUCTION CLINIC C**  
**8:30 a.m. - 10:15 a.m.**  
 Ming Room, Mezzanine Level, Anatole

**Director:** Donald C. Fidler, M.D.

This format provides an opportunity for clinicians and psychiatric educators to meet with a professional expert in the area of video production, technology, and training to consult on completed videotapes or videotapes in production, and to discuss ideas for new educational videotapes. The goal is both to promote the development of video teaching materials of high technical and educational quality and to encourage members to produce and submit new programs for the 1986 video sessions at the Annual Meeting in Washington, May 10-16.

One-half inch VHS playback equipment is available, and participants are invited to bring cassettes of completed work or work-in-progress. Short five-minute segments of the work of various participants will be shown in a workshop-consultation atmosphere to facilitate an exchange of ideas.

**ELECTROCONVULSIVE THERAPY:  
 THERAPEUTIC AND ETHICAL ISSUES**

In recent years the advantages of electroconvulsive treatment have become increasingly evident, although opponents of ECT have also become increasingly vocal in their opposition. The documentary, *Electroconvulsive Therapy: Practice and Controversy*, thoughtfully presents a balanced view of this treatment. Viewpoints of both the advocates and detractors of ECT are shown, as is a discussion of Federal funding, ECT research, and the issue of informed consent. The tape will serve as the basis of further discussion of this effective but controversial treatment.

**FILM SESSION XI: ADOLESCENT PROTEST: ART VERSUS ANARCHY**

**Chp.:** Harvey R. Greenberg, M.D.

Graffiti art evolved out of the urban ghetto. Its early practitioners were mainly adolescents from disadvantaged New York backgrounds who evolved their own unique folkways, heros, and language. In time, adolescents from other backgrounds became involved and graffiti style began to have an impact on the art world and popular culture at large. At this writing, there have already been several major exhibitions by gifted graffiti artists, whose work commands handsome prices. Meanwhile, less fortunate — and less talented — workers in the field continue to cover the urban landscape with questionable iconography.

Two other collateral developments of what has come to be known as the "hip hop" culture are breakdancing and "rapping," the disco equivalent of the Gilbert and Sullivan patter song. Taken as a whole, graffiti, breakdancing, and "rapping" may be seen as an exuberant flowering of adolescent art, untrammelled by sophisticated instruction.

Some experts have applauded this explosion of creativity; aestheticians admire its pure energy; psychiatrists welcome the sublimation of impulses into art that otherwise are so frequently expressed through gang warfare and other criminal enterprises. On the other hand, government officials perceive graffiti as defacement, not decoration, and decry the millions that must be spent to clean subways and buildings. Meanwhile, many ordinary citizens angrily protest having their vision and hearing daily assailed by what they perceive as the very dubious benefits of "hip hop."

**F15 STYLE WARS (69 minutes) 1983**

**Director:** Tony Silver  
**Distributor:** New Day Films  
 22 Riverview Drive  
 Wayne, NJ 07470

The pleasures and problems of the "hip hop" movement are evenhandedly captured in Tony Silver's prize-winning documentary, Style Wars, a definitive documentary of this intriguing subculture. Style Wars chronicles the city's complex, sometimes comic-opera graffiti wars, and the rise to fame of the renowned Rock Steady Crew of breakdancers. Graffiti writers like Skeme, Kase II, Seen, Shy 147,

and Iz the Wix challenge the authority of outspoken Mayor Edward Koch, the police, and helpless, angry parents. Style Wars succeeds both as entertainment and as a thought-provoking documentation of a striking cultural phenomenon.

**THE PRESENT AND FUTURE ROLE OF HEALTH CARE IN THE COMPLEXITIES OF ADVANCED MODERN ECONOMICS**

Wassily Leontief, Ph.D.

**West Ballroom A, Level III, Convention Center**

**Chp.:** Norman Rosenzweig, M.D.

**Co-Chp.:** David A. Rothstein, M.D.

Computerization, automation, and their effects on health care will be among the topics discussed by economist Wassily Leontief, Ph.D. Dr. Leontief

won the 1973 Nobel Prize in economics for devising the input-output method of determining ways that various parts of an economy interact. During his lecture, "The Present and Future Role of Health Care in the Complexities of Advanced Modern Economics," Dr. Leontief will discuss the relationship that his input-output technique has to medical economics. Long considered one of the world's leading economists, Dr. Leontief was an economic advisor to China in the 1920s and has been a consultant for numerous U.S. agencies including the Departments of Labor and Commerce and the Environmental Protection Agency. He also was a consultant on the economic and social consequences of disarmament for the United Nations. Today, he is the director of the Institute for Economic Analysis and professor of economics at New York University. In addition, he is a consultant to the United Nations Development Programme. Dr. Leontief has written eight books and numerous articles on American and world economics.

Six years before he completed his medical degree, Viktor Frankl, M.D., was asked by Sigmund Freud to write a paper for the International Journal of Psychoanalysis. Since then, Dr. Frankl's work has made him a leader in psychiatric theory and research. He has written several hundred scientific articles and 26 books, including Man's Search for Meaning, and his theories have inspired 80 dissertations. His work has earned several awards, including the Albert Schweitzer Medal, and prompted Oskar Pfister to introduce himself to Dr. Frankl during the International Congress of Psychotherapy when it was in Zurich. Now professor of neurology and psychiatry at the University of Vienna Medical School (where he earned his medical degree in 1930 and his doctoral degree in 1949), Dr. Frankl has been a visiting professor at Harvard, Southern Methodist University and Duquesne University and a

**Director:** Ted Kotcheff  
**Distributor:** Films Incorporated  
440 Park Avenue South  
New York, NY 10016

Next to This Sporting Life, North Dallas Forty is arguably the best film ever made about professional athletics; it is certainly the best film made to date about American pro football.

Phil Elliot is the long time wide-receiver of the North Dallas Bulls. Nearly a decade of professional play has left his body wrecked, but Elliot still owns the best pair of hands in the business. His coach and the higher-ups of the giant conglomerate that run the Bulls have been increasingly down on him for his "negative attitude." His irreverance and cynicism, together with his physical decline, are leading to his downfall, but he knows too much, has seen too much to stop ragging his superiors. His love affair with a feisty Dallas divorcee who has no love for the game provides the two-minute warning that awakens Elliot from prolonged late adolescence.

By turns scathing indictment and affectionate reprise, North Dallas Forty offers a stunning overview of the professional football scene, with all its heroism, narcissism, and greed. Nick Nolte plays the battered Elliot with gritty good-humor; the country singer Mac Davis gives an unexpectedly astute performance as Maxwell, the compromised quarterback. A supporting cast headed by Dabney Coleman, Steve Forrest, and professional footballer John Matuszak is nothing short of superb. North Dallas Forty is exciting, funny, and sad.

**WHO ARE THE HOMELESS, AND WHAT DO THEY NEED?**

The homeless have been of particular concern to the American Psychiatric Association. Although it is estimated that 50% of the homeless in American cities have chronic mental illness, with little access to psychiatric services, there is considerable disagreement in some quarters about whether the homeless need or deserve special consideration.

In today's program, *Shelter*, a sensitive documentary about the homeless in Seattle will serve as a forum for discussion about the needs of this diverse group of individuals.

Norman Sartorius, M.D.

**East Ballroom D, Level III, Convention Center**

**Chp.:** Gerald L. Klerman, M.D.

**Co-Chp.:** Allen J. Frances, M.D.

International discussion of psychiatric classifications is a priority if national and international collaboration is to succeed. That will be one of the points made by Norman Sartorius, M.D., director of the World Health Organization's Division of Mental Health, during his lecture, "International Perspectives of Psychiatric Classification." The principal investigator of the International Pilot Study on Schizophrenia, the International Study on Depression, and numerous other research projects involving centers in different countries, Dr. Sartorius is uniquely prepared to discuss the need for international agreement on classification. He joined the World Health Organization in 1967 and served in Southeast Asia before assuming responsibility for the program on epidemiological and social psychiatry. In 1977, he was appointed director of WHO's Division of Mental Health. In addition, Dr. Sartorius holds the Chair of Transcultural Psychiatry at the University of Zagreb School of Medicine in Yugoslavia and is an associate on the faculty at The Johns Hopkins School of Public Health.

SCHIZOPHRENIA IN THE MENTALLY  
RETARDED

Frank J. Menolascino, M.D.

Grand Ballroom B, Lobby Level, Anatole

Chp.: A. John Rush, M.D.

Co-Chp.: Walter H. Wellborn, Jr., M.D.

Frank Menolascino, M.D., has studied and written about nearly every aspect of psychiatric disorders among the mentally retarded. His work has ranged from diagnosis and treatment of mentally ill retarded children to defining their needs in the community, training teachers and family to work effectively with such children, to their civil and treatment rights. Though an expert in many areas related to mental retardation, Dr. Menolascino will focus on the challenges of a dual diagnosis when he presents his lecture, "Schizophrenia in the Mentally Retarded." The discussion will include a description of a behavioral treatment approach which his research indicates is very effective. Dr. Menolascino is professor of psychiatry and pediatrics and vice-chair of the Department of Psychiatry at the University of Nebraska College of Medicine, Omaha. He also is associate director of the Nebraska Psychiatric Institute.

DECISIVE INFLUENCES THAT SHAPED  
LATIN AMERICAN PSYCHIATRY

Lester H. Rudy, M.D.

West Ballroom D, Level III, Convention Center

Chp.: Fernando Cabrera, Jr., M.D.

Co-Chp.: Evaristo Gomez, M.D.

Like its North American counterpart, psychiatry in Latin America has many roots in 19th century European theories. But in the 1920s, mental health care in the two regions diverged and began to reflect the differences between developed and developing nations. Those are among the highlights to be presented by Lester Rudy, M.D., during the Simon Bolivar Lecture. His discussion will provide an his-

toric context and understanding of the struggles and sacrifices made by Latin American psychiatrists as they have established and cultivated their profession. Dr. Rudy is professor and chair of the department of psychiatry at the University of Illinois College of Medicine, Chicago, where he has taught since 1955. In addition, he is psychiatrist-in-chief and acting director of the University of Illinois Hospital. Dr. Rudy is a member of the Section Council on Psychiatry of the Pan American Medical Association and of the Section on Education of The World Psychiatric Association. He has received numerous awards, including the Bowis Award presented by the American College of Psychiatrists for Outstanding Achievement and Leadership in the Field of Psychiatry.

BUT DOES PSYCHIATRIC EPIDEMIOLOGY  
COUNT FOR THE CLINICIAN?

Myrna M. Weissman, Ph.D.

West Ballroom B, Level III, Convention Center

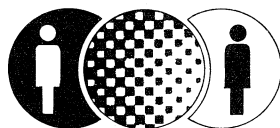

Chp.: Darrel A. Regier, M.D.

Co-Chp.: Alan Mellow, M.D.

Myrna Milgram Weissman, Ph.D., will bring her years of tracing the incidence of mental illness to her audience during her address, "But Does Psychiatric Epidemiology Count for the Clinician?" She will discuss the 1984 NIMH Epidemiological Catchment Area Study and its relevance to clinical practice. Dr. Weissman, professor of psychiatry and epidemiology and director of the Depression Research Unit at Yale University School of Medicine, is studying not only psychiatric epidemiology but also the treatment and genetics of affective disorders. She received her doctoral degree in chronic disease epidemiology from Yale University in 1974 and has served as a consultant to the World Health Organization, the White House Office of Science and Technology Policy, and the President's Commission on Mental Health. She has written more than 200 scientific articles. In 1978, Dr. Weissman received the APA's Foundations' Fund Prize for Research in Psychiatry.

**FILM SESSION XIII: THE CHANGING FACE OF ADOLESCENCE**

**Chp.:** John B. Sikorski, M.D.

Contemporary psychiatric theory and practice tend to view the experience of adolescence from a variety of vantage points. One perspective tends to highlight the conflicts and attempts at resolutions along the developmental continuum, while another view highlights the more adaptive mechanisms in the cultural continuity of the adolescent phenomenon. These films and their discussion will focus on central themes of the emergence of self-image, sexuality, sense of the future, and adaptive inter-psychic and interpersonal mechanisms central to the psychiatric understanding of adolescents.

**F17 WHATEVER HAPPENED TO CHILDHOOD**  
(45 minutes) 1983

**Director:** Stephen Judson  
**Distributor:** Churchill Films  
 662 North Robertson Blvd.  
 Los Angeles, CA 90069

This film presents a series of scenes and interviews with pre-teens, adolescents, and adults discussing issues and problems of family life, work, responsibility, intimacy, and the future confronting today's youth.

**F18 FIRST THINGS FIRST (30 minutes) 1982**

**Director:** Bill Wadsworth  
**Distributor:** Bill Wadsworth Productions  
 1913 W. 37th  
 Austin, TX 78731

This is a sensitive, candid film about the issues, conflicts, caring, and ambivalence involved in initiating sexual activity in adolescence.

**F19 A VERY DELICATE MATTER (30 minutes) 1982**

**Director:** Claude Kervin  
**Distributor:** Learning Corporation of America  
 1350 Avenue of the Americas  
 New York, NY 10019

The focus of this film is on the impact of venereal disease on adolescent self-image, interpersonal relationships, and adaptive mechanisms.

**F20 SYLVIA: A SUMMER BEFORE COLLEGE (29 minutes) 1983**

**Director:** Grania Gurievitch  
**Distributor:** Carousel Films  
 241 East 34th Street  
 New York, NY 10016

This film highlights the more adaptive mechanisms utilized by more achievement oriented and normative appearing adolescents.

**TARDIVE DYSKINESIA: CURRENT ASSESSMENT AND TREATMENT**

**Chp.:** William Glazer, M.D.

Although tardive dyskinesia may occur spontaneously, its occurrence after prolonged use of neuroleptic medications has provoked increased research and extensive controversy toward early diagnosis, possible treatment, and implications for prevention. Two videotapes will be used as the basis for discussion of this important issue. The first, Recognizing and Advising Patients About Tardive Dyskinesia (TD), presents examples of typical cases of TD: early, subtle, or unusual presentations; differential diagnosis; and management and course of TD. Portions of a second tape, Treatment of Tardive Dyskinesia with Diazepam, will be shown to demonstrate the results of a research project to highlight the uses of nonsedating doses of Diazepam with TD treatment. Discussion will focus on assessment and management issues of this important topic.

**V13 RECOGNIZING AND ADVISING PATIENTS ABOUT TD**

**CONFLICTS AND COMPLICATIONS IN DECISION-MAKING ABOUT ABORTION**

**3:30 p.m. - 5:00 p.m.**

From discussion generated in this recent election year, the issue of abortion has polarized many Americans. Ethical, religious, legal, psychological, and financial considerations may lead to conflicts about abortion, even among its most staunch advocates. This documentary, produced for the PBS series, Frontline, not only shows the poignant struggle of one woman who, abused and abandoned by her boyfriend, still decides to have an abortion, it also shows the decision of a couple to have their baby and place it for adoption. In addition, the activities of a right-to-life doctor who pickets the clinic every Saturday, offers counseling on alternatives and provides free housing to the women who decide to

carry their babies to term, are also shown. The tape will serve as the basis for discussion about this important and controversial issue.

### UNDERSTANDING AND HELPING THE FAMILY OF THE PERSON WITH ALZHEIMER'S DISEASE

Alzheimer's disease is a devastating illness, not only for the victims of the illness, but for those who care for them. Two sensitively produced videotapes depict the problems and solutions, both physical and psychological, which are developed by families as they deal with the progressive mental deterioration of someone they care about, whose decline they must watch. The discussion will focus on programs which help with assessment and medical management as well as provide support and help for family members.

### V16 ALZHEIMER'S DISEASE: YOU ARE NOT ALONE

### FILM SESSION XV: JOINT CUSTODY

**Chp.:** John B. Sikorski, M.D.

This three-part PBS documentary film sensitively explores the issues and risks involved in different styles of co-parenting, and highlights the daily complexities of these arrangements. In focusing on the adaptive social support and legal implications of these arrangements, the film provides a vehicle for further exploration and discussion of critical mental health issues for these children in families-at-risk.

The film and discussion will address the changes and complexities of post-divorce child custody arrangements that have developed during the past two decades and will present the relevant advantages as well as the psychological risk to parents and children involved in such agreements. The session will also acquaint the participants with the usefulness of a documentary film such as this in their professional educational work with families who are undergoing this distressing decision-making process.

### F23 JOINT CUSTODY: A NEW KIND OF FAMILY (85 minutes) 1983

**Director:** Josephine Hayes Dean  
**Distributor:** Josephine Dean Productions, Inc.  
205 West End Avenue  
New York, NY 10023

This cinema verite style film sensitively explores a variety of approaches to post-divorce child custody arrangements, focusing on the complexities of these arrangements and the varieties of sharing responsibilities which parents utilize, as well as the impact of such arrangements on the child's feelings and development.

## STRESS MANAGEMENT

Stress is a ubiquitous contemporary phenomenon, and stress reduction techniques are rapidly being developed to assist individuals to identify their own stresses, reduce their stress responses, as well as reduce the stresses themselves. The tape, Less Stress in 5 Easy Steps, shows how to deal with everyday stress. Derived from practice in a psychiatric clinic, the steps include: 1) recognizing stress, 2) techniques for fast relief, 3) relaxation techniques, 4) changing the ways of reacting to stress, and 5) learning to accept and appreciate yourself. After a full week at the APA meetings, this session should prove a great place for both unwinding as well as learning new cognitive and behavioral techniques, before heading home.
