GUIDE TO THE 2013 ANNUAL MEETING

PROGRAM BOOK, NEW RESEARCH BOOK, EXHIBITS GUIDE

This book contains the Program Book, New Research Program Book and Exhibits Guide. Located within the Program Book you will find a topic index in addition to program tracks (color-coded) that will assist you in finding scientific sessions of interest. The individual program for each day of the meeting is also color-coded so that you can easily find the day(s) of the meeting that interest you. The program is listed by start time with the formats listed alphabetically under those times. To make it even easier to plan your day a separate Days-at-a-Glance has been included with your registration materials. The New Research Program Book lists the titles of the Posters that will be presented at this meeting, organized numerically by session/day. There is a topic index for the Posters only at the end of the New Research Program Book. The Exhibits Guide contains a list of the exhibitors and a floor plan of the exhibit hall, along with information about the Product Theaters.

If you have any questions about this book or the scientific program, please feel free to stop by the Scientific Programs Office, Room 206, East Mezzanine, Moscone Convention Center and an APA staff person will be happy to assist you. All central office APA staff will be wearing

Dear APA Members and Guests:

Welcome to San Francisco, and the 166th Annual Meeting of the American Psychiatric Association. This beautiful and unique city, with its vibrancy, cultural diversity, and excitement, provides a perfect setting for the scientific presentations.

Please note a few of the many exciting sessions featuring thought-provoking, stellar and engaging presenters from around the U.S. and the World! In a special Keynote Presentation, President Bill Clinton is one of the most highly anticipated presenters. The Program also includes Nobel Laureates Elizabeth H. Blackburn, Ph.D., Stanley B. Prusiner, M.D., and Andrew Schally, Ph.D., M.D. Acclaimed researchers-clinicians include Robert H. Lenox, M.D., Maria Oquendo, M.D., Irvin Yalom, M.D., Stephen Stahl, M.D., Nora Volkow, M.D., Gary S. Small, M.D., and Eric Nestler, M.D. Their lectures will explore topics ranging from genetics and cognition to new drug discovery to suicide.

Saturday evening's Opening Session features a conversation between Dr. Jeste and noted academician and USC Gould School of Law Professor Elyn Saks, J.D., Ph.D., exploring her struggles and successes with schizophrenia and acute psychosis. Monday's highlights include the premiere of award-winning filmmaker Delaney Ruston, M.D.'s new documentary on global mental healthcare and stigma "Hidden Pictures" as well as the Convocation Address by internationally respected neuroscientist Baroness Susan Greenfield of Oxford University. The Baroness also will lecture on Tuesday on the timely subject of digital technology and the developing young mind.

Always popular Media Workshops, Symposia, Poster Sessions, brief Scientific and Clinical Reports, Advances in, Small Interactive Sessions and more are scheduled throughout the meeting—over 400 sessions covering the range of topics possible in current psychiatric practice with the full diversity of patient populations. Seven tracks highlight psychiatry's subspecialty areas as well as the DSM-5 and NIDA-sponsored sessions. In addition to the educational mission of the Annual Meeting, the extensive program endeavors to stimulate self-reflection, inspiration and affirmation about the state of our profession and ourselves as clinicians and professionals.

The APA Office of Scientific Programs, the Meetings and Conventions Department, along with the Scientific Program Committee, have endeavored to produce the best Annual Meeting ever for the benefit of the greatest asset the APA has: you, the General Member! We hope you are as excited as we are about the next 5 days. Thank you for your continued support of the APA mission for advocacy, education and research on behalf of our patients.

Sincerely,

Josepha A. Cheong, M.D.

Dear Colleagues and Guests:

Welcome to the 166th Annual Meeting of the American Psychiatric Association in San Francisco, “The City by the Bay.” “Pursuing Wellness across the Lifespan,” is the theme of this year’s meeting, which offers hundreds of sessions to learn the latest science, clinical advances, and promising practices from among the best in the field, as well as numerous networking and social opportunities.

The Opening Session will be on Saturday, May 18 from 4:30 – 5:30 p.m. and will be immediately followed by a special conversation between APA President Dilip Jeste, M.D., and Elyn Saks, J.D., Ph.D. Dr. Saks, who has schizophrenia, is an inspirational example of resilience in the face of a serious mental illness. She is the Orrin B. Evans Professor of Law, Psychology, and Psychiatry and Behavioral Sciences at the University of Southern California, a MacArthur Foundation Fellow, and author of the award-winning best-seller *The Center Cannot Hold: My Journey Through Madness*. The annual American Psychiatric Foundation Benefit will be on Saturday from 7:00 – 10:00p.m. (ticket required) at the City Club of San Francisco.

A special keynote address will be presented by President Bill Clinton on Sunday, May 19 from 5:30 – 6:30 p.m. The Convocation will be held on Monday from 5:30 – 6:30 p.m.

We are privileged to have among our presenters three Nobel Laureates: Elizabeth H. Blackburn, Ph.D., Nobel Prize winner in Physiology or Medicine (2009); Stanley B. Prusiner, M.D., Nobel Prize winner in Physiology or Medicine (1997); and Andrew V. Schally, Ph.D., M.D.H.C., Nobel Prize winner in Physiology or Medicine (1977).

We are delighted to partner once again with the National Institute on Drug Abuse (NIDA) to feature a series of sessions highlighting advances in research and treatment of substance use disorders. Other topical tracks featured at the meeting include: addiction, child and adolescent psychiatry, forensic psychiatry, geriatric psychiatry, psychosomatic medicine, integrated care, and military mental health.

The much-anticipated DSM-5, the latest revision of the Diagnostic and Statistical Manual of Mental Disorders, will be released at the meeting. An extensive series of sessions will help attendees understand key changes in the DSM-5 and their implications for practice, focusing on topics such as substance use disorders, autism, major depression, military mental health, and the cultural considerations. In addition, a full-day Master Course: DSM-5: What You Need To Know, will be presented by DSM-5 Task Force Chair David J. Kupfer, M.D., and Vice-Chair Darrel A. Regier, M.D., M.P.H. and members of the work groups on Saturday, May 18.

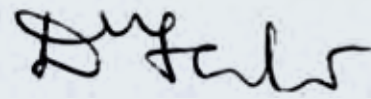

Meeting attendees can purchase the DSM-5 before it goes on sale to the public at the American Psychiatric Publishing (APP) bookstore in the Exhibit Hall. Attendees are also invited to meet the DSM-5 Task Force leaders at a special event at the APP bookstore on Saturday, May 18 from 4:00 to 5:00 p.m.

The always popular MindGames, APA’s national Jeopardy-like competition for residents, will take place on Tuesday at 6:00.

Many thanks go out to the Scientific Program Committee for its outstanding work under the leadership of chair Josepha Cheong, M.D. and to the APA staff members who have worked to develop an outstanding program for the 2013 Annual Meeting. Of course, we hope you’ll enjoy some of what San Francisco has to offer with its well-known landmarks and attractions such as Fisherman’s Wharf, the Golden Gate Bridge, and cable cars, along with a multitude of cultural and culinary delights.

Outstanding educational and networking opportunities await you at our 166th Annual APA meeting. On behalf of APA and the Scientific Program Committee, welcome to the meeting and enjoy an informative, enlightening week!

Sincerely,

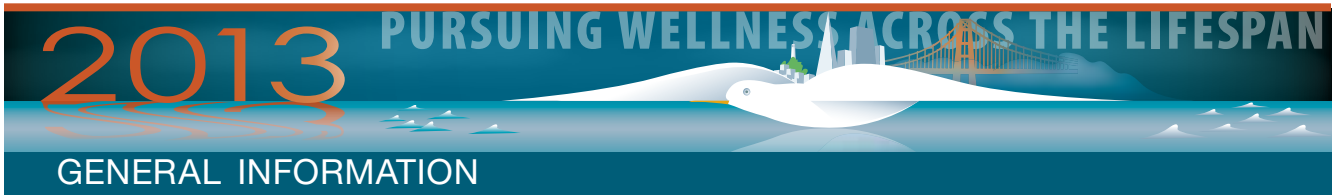

A handwritten signature in black ink, which appears to read "Dilip Jeste". The signature is fluid and cursive.

Continuing Medical Education

Educational Objectives

At the conclusion of this meeting the participant will be able to:

1. Review new research findings in the fields of psychiatry and neuroscience and address gaps in knowledge;
2. Acquire new knowledge and skills in clinical psychiatry, which can be utilized to improve patient care;
3. Identify and remove barriers to the transfer of new knowledge for your practice, including provision of culturally competent care for diverse populations;

4. Assess a variety of treatment choices, including psychotherapeutic and pharmacological options; and
5. Recognize mental health service delivery issues, including barriers to care.

The APA is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. The APA designates this live activity for a maximum of 50 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Please note: Formats on the scientific program, as outlined below, have been approved for CME credit.

The scientific sessions on the official Annual Meeting program, with some exceptions, meet the criteria for AMA PRA Category 1 Credit™. Sessions in the following program formats are designated as category 1: **Advances in... Series; Case Conferences; CME Courses; Focus Live; Forums; Lectures; Master Courses; Presidential Symposia; Scientific and Clinical Reports; Seminars; Small Interactive Sessions; Symposia; and Workshops.**

New Research Poster Sessions are NOT designated for AMA PRA Category 1 Credit™. Located in Exhibit Hall A-C, Moscone Convention Center.

Scientific sessions are open to all Annual Meeting registrants with the exception of Case Conferences, which are open to APA members only. CME Courses and Master Courses require an additional fee.

To document CME credit earned at the Annual Meeting, participants should maintain a list of sessions they attended. Credit is earned on an hour-for-hour basis. A daily attendance log is provided in this book for listing your sessions and credits.

Course Enrollment

Ticket Purchase Is Required For All Courses.

The days and hours of operation are as follows: Friday, 12 noon–3:00 p.m.; and Saturday–Wednesday, 7:30 a.m.–5:00 p.m. Come to this office if you have questions about: 1.) Scientific sessions listed in the Program Book or Syllabus; 2.) Adding audio-visual equipment to scientific sessions; 3.) Scientific program changes; 4.) Submitting a scientific session for the 2014 Annual Meeting; and 5.) The 2013 Institute on Psychiatric Services.

Scientific Session Capacity Guidelines

If overcrowding occurs in a scientific session we ask your assistance so that all in attendance can benefit. Please abide by the following guidelines if you are in a crowded room.

1. Take a seat as close to the front of the room as possible;
2. Move to the center of the row and fill all seats, so that chairs are available on the aisles for additional attendees;
3. Don't stand or sit in the aisles or lean against walls. Overcrowding of meeting rooms may subject the session to shut down by the Fire Marshall; therefore, please either find a seat or attend another session; and
4. If there are no seats available, a DVD of the session might be available. Please check the DVD order form that is included with your registration materials.

Shuttle Bus Service

A 2013 Meeting badge is required to ride on the courtesy shuttle bus. Shuttle bus service will begin on Saturday, at approximately 7:00 a.m., and will operate daily throughout the meeting commensurate with the scientific program schedule and will conclude on Wednesday, at 5:30 p.m. The Moscone Convention Center will serve as the “hub” for all shuttle bus routes. The Shuttle Bus Desk is located in the South Lobby, Street Level, Moscone Convention Center. A detailed shuttle bus schedule will be available on site and will be posted in the lobbies of participating hotels.

Smoking Policy

No smoking is allowed anywhere in the Moscone Convention Center.

Tape Recording and Visual Reproduction Policies

Case Conferences and the Keynote Address may not be recorded. For other sessions, unless prohibited by the presenters, audio recording is permitted for personal use only. Attendees may use their own small, portable devices to audio record. Attendees are not permitted

to photograph (including with cell phone cameras) or video any session because the intrusive nature of the recording may disrupt the session. Larger, professional recorders are not permitted except for use by registered members of the working press in accordance with APA Press Policies. APA has authorized a professional firm to record sessions. Badges of personnel representing this firm will clearly identify them.

DISCLOSURE INDEX

AMERICAN PSYCHIATRIC ASSOCIATION CONTINUING MEDICAL EDUCATION
POLICY ON FULL DISCLOSURE

The American Psychiatric Association requires disclosure by all program planners and presenters at CME activities of any financial or other affiliation with commercial organization(s) that may have a direct or indirect interest in the subject matter of the educational activity. A “financial interest” may include, but is not limited to: being an employee and/or being a shareholder in the organization; being on retainer with the organization; or having research or honoraria paid by the organization. An “affiliation” may include holding a position on an advisory committee, speakers’ bureau or some other role or benefit to a supporting organization.

In compliance with the ACCME’s Standards for Commercial Support, the APA has a management of conflict (MCI) process for all CME activities. This process ensures that all conflicts of interest are identified, managed and resolved prior to the educational activity. Additionally, the prospective audience must be informed of the presenters’ or program planners’ affiliations with every commercial interest by an acknowledgement in the printed program and verbal or visual disclosure to participants at the session (disclosure by

slide or overhead is required if audiovisual equipment is used for the presentation). Disclosing to learners the relevant financial relationships that were present and resolved assists learners in assessing the potential for bias in the information that is presented. The APA also requires verbal disclosure of discussion of unlabeled uses of a commercial product or investigational use of a product not yet approved for this purpose.

The presenters and planners on the following pages indicated that either they or an immediate family member have a financial interest or other affiliation with a commercial entity producing, marketing, reselling, or distributing health care goods or services consumed by or used on patients; the company name and affiliation is also listed. Providers of clinical service directly to patients are not considered to be commercial interests. The second group of presenters and planners indicated neither they nor an immediate family member has any significant relationship to disclose.

All presenters and planners must complete a disclosure in order to participate in an APA CME activity. This disclosure listing includes the presenters of the Scientific Program and New Research Poster Sessions.

Advances In ... Series

These sessions are intended to highlight important new advances occurring in the field of psychiatry involving selected disorders or treatments. Some of these sessions are chaired by editors of recent textbooks published by the American Psychiatric Publishing, Inc. (APPI) and feature selected chapter authors from these texts. The books discussed at these sessions may be purchased at the APPI bookstore or online.

During the Advances in Research session presented on Monday, leading clinical researchers present the latest developments in research.

Another type of advances session, Advances in Medicine, includes sessions designed to provide psychiatrists with the latest in clinical developments in other areas of medicine. The intent is to give participants an update from a physician in a particular specialty. These sessions will help participants keep pace with the rapidly expanding knowledge base and technology in various branches of medicine.

Case Conferences

During these 90-minute sessions, clinical material is presented by videotape or the treating therapist. One or more experts then discuss the case.

! These sessions are open to APA members only. A blue registration badge or an APA membership card are required for admittance.

Courses

Courses are designed to emphasize learning experiences that actively involve participants and include the opportunity for informal exchange with the faculty. Offered in four-hour (half-day), six-hour (full-day), and eight-hour (full-day) sessions, courses either review basic concepts in a special subject area or present advanced material on a circumscribed topic. Participants must purchase tickets to attend.

Debates

Experts in the field, including psychiatrists and non-psychiatrists, will debate a controversial topic in psychiatry. The debate format allows for members to hear both pro and con views about important, interesting and timely concerns for our members. Someone who has expertise in the topic area moderates the debate. A portion of the time is allocated for questions from the audience to the presenters with active participation by participants.

Focus Live

These 90-minute sessions allow participants to test their knowledge using an interactive Audience Response System (ARS), offering a new and entertaining way to learn. ARS sessions can make a group of 300 feel like they are having a small group consultation with an expert clinician. Experts, who served as guest editors of FOCUS, will lead lively multiple choice question-based discussions, and the audience will enter their answers with hand-held devices. Results are instantly tallied and projected on the screen.

Forums

Are flexible presentations of 90 minutes to 2 hours in length that afford an opportunity to highlight and select topics that are of timely interest to psychiatrists. Speakers and panel members are chosen for their expertise and leadership in the field.

Lectures

Lectures feature a small number of distinguished speakers discussing scientific and cultural topics, many of which will extend our understanding beyond the usual limits of clinical psychiatry. The Scientific Program Committee invites the lecturers. Award lectures are selected by the various APA Award Boards.

New Research and Young Investigator New Research Poster Sessions

This format allows for presentation of the very recent findings. Posters, which are visual, are self-explanatory presentations. Two poster sessions on Monday will be designated as Young Investigators' Poster Sessions, which will contain poster presentations from young investigators, residents, medical students, and research or clinical fellows.

Scientific and Clinical Report Sessions

Scientific and Clinical Reports are oral presentations of papers prepared for submission before publication. In this 90-minute format, reports are grouped by topic, with floor discussion from the audience following the presentation of each paper. There is no formal discussant.

Seminars

A format allowing for in-depth teaching and learning related to “niche” topics or covering issues which represent a service to the profession (e.g., impaired physician programs, patient suicide, etc.). It is also a venue for testing the feasibility of new course by offering the content free for the first year.

Small Interactive Sessions

(Includes sessions formerly known as discussion groups, roundtable discussion groups, research consultations, and master educator consultations.)

This 90-minute format allows small groups to meet informally with either selected experts in psychiatry to discuss topics chosen by the expert; to obtain consultations around problems in research from senior researchers; or utilize clinical material offered by the

participants and hear, clinically-based seminars presented by outstanding educators. Some of these are reserved for residents only. These sessions are limited to 50 participants or less on a first-come, first-served basis.

Symposia

Symposia are three-hour sessions consisting of four to six presentations that are thematically linked and focus on a specific topic relevant to clinical psychiatry. They are designed to provide comprehensive treatment of a topic or discussion of the topic from several points of view by the participants and stimulate discussion with the audience.

Workshops

Workshops are 90-minute sessions, which typically involve brief presentations from individual panel members, followed by the opportunity for lively and informative discussion. This format provides for substantial audience participation and should be highly interactive.

Media Workshops are three-hour sessions held Saturday -Wednesday, in which a feature-length film is shown and discussed. Some of these sessions may be scheduled in the evening during the meeting (Saturday – Tuesday).

PURSUING WELLNESS ACROSS THE LIFESPAN

SUNDAY
MAY 19

2013 APA Annual Meeting

Keynote Speech by President Bill Clinton

Sunday, May 19, 5:30 pm to 6:30 pm
San Francisco, CA
Moscone Center, Hall D

After leaving the White House, President Clinton established the William J. Clinton Foundation with the mission to improve global health, strengthen economies, promote healthier childhoods, and protect the environment by fostering partnerships among governments, businesses, nongovernmental organizations (NGOs), and private citizens to turn good intentions into measurable results. Today the Foundation has staff and volunteers around the world working to improve lives through several initiatives, including the Clinton Health Access Initiative, which is helping 4.5 million people living with HIV/AIDS access lifesaving drugs. The Clinton Climate Initiative, the Clinton Development Initiative, and the Clinton Giustra Sustainable Growth Initiative—are applying a business-oriented approach to fight climate change worldwide and to promote sustainable economic growth in Africa and Latin America. In the U.S., the Foundation is working to combat the alarming rise in childhood obesity through the Alliance for a Healthier Generation, and is helping individuals and families succeed and to increase small business growth in underserved communities through the Clinton Economic Opportunity Initiative. Established in 2005, the Clinton Global Initiative brings together global leaders to devise and implement innovative solutions to some of the world's most pressing issues. So far, more than 2,100 Clinton Global Initiative commitments have improved the lives of 400 million people in 180 nations.

She received her Ph.D. from Oxford University and has held postdoctoral fellowships at the Wellcome Institute for the History of Medicine (London) and the University of Freiburg (Germany). Currently, she serves on the Board of the Mind and Life Institute, an organization dedicated to cross-cultural dialogue between Buddhism and the brain sciences. She is co-editor of *Biosocieties* and the author of three books, *Medicine, Mind and the Double Brain* (1987), *Reenchanted Science* (1997), and *The Cure Within* (2007). She has also published many articles and produced a range of edited collections including *The Placebo Effect* (1997). Research interests include the history of the neurological case history and the “inner world” of brain disorder.

APA Frontiers of Science Lecture

Andrew V. Schally, Ph.D., M.D.H.C.
 Sunday, 8:00 a.m.–9:30 a.m.

Andrew V. Schally, Ph.D., M.D.H.C., received his Ph.D. degree in endocrinology/bio-

chemistry from McGill University. He joined the faculty of the Department of Pathology at the University of Miami Miller School of Medicine in 2006 and is currently Distinguished Leonard M. Miller Professor of Pathology and Director of the Endocrine, Polypeptide, and Cancer Institute. He is also a Distinguished Medical Research Scientist of the Department of Veterans Affairs. For his research on hypothalamic hormones, he received many

honors and awards including the Nobel Prize in Physiology and Medicine in 1977. Dr. Schally has authored or co-authored more than 2,300 scientific publications in the field of endocrinology and oncology. He is continuing his work on the development of new therapies for cancer using various peptide analogs.

Oskar Pfister Award Lecture

Marc Galanter, M.D.
 Sunday, 10:00 a.m.–11:30 a.m.

Marc Galanter, M.D. is a Professor of Psychiatry at New York University and

was Founding Director of its Division of Alcoholism and Drug Abuse. He is senior editor of *Substance Abuse* and co-editor of the American Psychiatric Association's *Textbook of Substance Abuse Treatment*. He has written three books—*Cults: Faith, Healing, and Coercion*, *Network Therapy for Alcohol and Drug Abuse*, and *Spirituality and the Healthy Mind*—and has published more than 200 peer-reviewed articles. His research has addressed network therapy for substance abuse, pharmacologic treatment for addiction, the psychology of Twelve-Step recovery, and spirituality in healthcare. Among his awards are APA's Gold Achievement Award for innovation in clinical care and the Seymour Vestermark Award for Psychiatric Education, New York State's Award for Psychiatric Research, and the Brinkley Smithers Award for Research from the American Society of Addiction Medicine.

APA Frontiers of Science Lecture

Jan-Ake Gustafsson, M.D., Ph.D.
 Sunday, 10:00 a.m.–11:30 a.m.

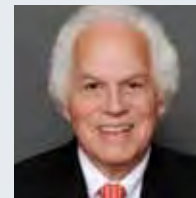

Jan-Ake Gustafsson, M.D., Ph.D., has been the Robert A. Welch Professor at the University of

Houston and Director of the new Center of Nuclear Receptors and Cell

Signaling since January 2009. Before that, he was professor of Medical Nutrition and Chairman of the Department of Biosciences and Nutrition at the Karolinska Institutet in Stockholm. Dr. Gustafsson's early focus on the biochemistry of steroid receptors led to his discovery of the three-domain structure of the glucocorticoid receptor, its specific DNA binding, and its cloning. Dr. Gustafsson determined the first structure of the DNA-binding domain of a steroid receptor and discovered two novel receptors, liver X receptor beta (LXRβ) and the second estrogen receptor ERβ. Both ERβ and LXRβ have important functions in the central nervous system.

APA Frontiers of Science Lecture

Stanley B. Prusiner, M.D.
 Sunday 12:30 p.m.–2:00 p.m.

Stanley B. Prusiner, M.D., is Director of the Institute for Neurodegenerative Diseases and

Professor of Neurology at the University of California, San Francisco. Dr. Prusiner is internationally recognized for discovering a class of pathogens that he named prions. His current research focuses on determining their atomic structure and deciphering their mechanism of replication, to produce therapeutics that retard neurodegeneration in Parkinson's, Alzheimer's, and other dementias. Dr. Prusiner is a member of the National Academy of Sciences and Institute of Medicine, the American Academy of Arts and Sciences, and the Royal Society, London. He is the recipient of numerous prizes, including the Nobel Prize in Physiology or Medicine (1997) and the National Medal of Science (2009). Dr. Prusiner holds 50 issued or allowed United States patents, which are assigned to the University of California.

APA Distinguished Psychiatrist Lecture

Gary Small, M.D.
Sunday, 2:30 p.m.–4:00 p.m.

Gary Small, M.D., attended medical school at the University of Southern California and trained in geriatric psychiatry at UCLA, where he is now Professor of Psychiatry, Parlow-Solomon Professor on Aging, and Director of the UCLA Longevity Center and the Geriatric Psychiatry Division at the Semel Institute for Neuroscience and Human Behavior. His research team has developed brain scan methods that detect signs of Alzheimer's disease years before patients show symptoms. He tests medicines for delaying the onset of Alzheimer's symptoms and has developed healthy lifestyle and memory training programs. Scientific American magazine named him one of the world's top innovators in science and technology. Among his many publications are popular books such as *The Memory Bible* (New York Times best seller) and his most recent book, *The Alzheimer's Prevention Program*.

Manfred S. Guttmacher Award Lecture

Alec Buchanan, M.D., Ph.D.,
Michael Norko, M.D., M.A R.
Sunday, 2:30 p.m.–4:00 p.m.

Alec Buchanan, M.D., Ph.D., associate professor in the Law and Psychiatry Division at Yale

School of Medicine, earned an M.B.Ch.B. and M.D. from the University of Edinburgh, M. Phil. degrees from the University of London and Cambridge University as well as a doctorate from Cambridge. His research is focused on psychiatric risk assessment and risk management, services for mentally disordered offenders, and psychiatric jurisprudence. He is Associate Editor of the *Journal of the American Academy of Psychiatry and the Law* and *Journal of Marriage and Family*. and recently chaired the APA Task Force which produced the report *Resource Document on Psychiatric Violence Risk Assessment (Am J Psychiatry 169:3, March 2012, data supplement)*. He is a Fellow of both the APA and the Royal College of Psychiatry.

Michael Norko, M.D., M.A R., associate professor in the Law and Psychiatry Division at Yale

School of Medicine and Director of Forensic Services for the Connecticut Department of Mental Health and Addiction Services, received his M.D. from SUNY–Upstate Medical Center and mental health administration certificate from the New School for Social Research. He is a Past President of the Connecticut Psychiatric Society, has chaired the AAPL Committee on Institutional and Correctional Forensic Psychiatry, was Editor of the *AAPL Newsletter* (1996-2003), and the Vice President of AAPL (2005-2006); and he currently is Deputy Editor of the *Journal of the American Academy of Psychiatry and the Law*. He has published and presented nationally and internationally on forensic psychiatry, including his special interest in the use of the concepts of dangerousness and risk in psychiatric practice.

American Psychiatric Publishing

Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5)

American Psychiatric Association

This new edition of *Diagnostic and Statistical Manual of Mental Disorders* (DSM-5™), used by clinicians and researchers to diagnose and classify mental disorders, is the product of more than 10 years of effort by hundreds of international experts in all aspects of mental health. Their dedication and hard work have yielded an authoritative volume that defines and classifies mental disorders in order to improve diagnoses, treatment, and research.

The criteria are concise and explicit, intended to facilitate an objective assessment of symptom presentations in a variety of clinical settings—inpatient, outpatient, partial hospital, consultation-liaison, clinical, private practice, and primary care.

NEW!

New features and enhancements make DSM-5™ easier to use across all settings:

- The latest findings in neuroimaging and genetics have been integrated into each disorder along with gender and cultural considerations.
- The revised organizational structure recognizes symptoms that span multiple diagnostic categories, providing new clinical insight in diagnosis.
- Specific criteria have been streamlined, consolidated, or clarified to be consistent with clinical practice.
- Dimensional assessments for research and validation of clinical results have been provided.
- Both ICD-9-CM and ICD-10-CM codes are included for each disorder.

The *Diagnostic and Statistical Manual of Mental Disorders*, Fifth Edition, is the most comprehensive, current, and critical resource for clinical practice available to today's mental health professionals.

APA Frontiers of Science Lecture

Elizabeth Blackburn, Ph.D.
Monday 9:00 a.m.–10:30 a.m.

Elizabeth Blackburn, Ph.D. is the recipient of the 2009 Nobel Prize in Physiology or

Medicine for her discoveries in telomere biology. She has been recognized for her contributions to the field with numerous prizes, awards, and honorary degrees, including the 2006 Albert Lasker Award for Basic Medical Research and election to the American Association for the Advancement of Science and the Institute of Medicine. In 2007, *Time* magazine named her one of the “100 Most Influential People in the World,” and in 2008, she was the North American Laureate for L’Oréal-UNESCO for Women in Science. Dr. Blackburn is currently the Morris Herzstein Endowed Chair in Biology and Physiology in the Department of Biochemistry and Biophysics at the University of California, San Francisco, where she is working with human cells with the goal of understanding telomerase and telomere biology.

APA Award for Research in Psychiatry

Stephen R. Marder, M.D., Donald C. Goff, M.D., Daniel C. Javitt, M.D., Ph.D., Robert W. Buchanan, M.D.

Monday, 9:00 a.m.–11:00 a.m.

Stephen R. Marder, M.D. Stephen R. Marder, M.D., received his degree from the State University

of New York at Buffalo and subsequently joined the staff at the Brentwood VA Medical Center and the faculty at UCLA. His research has focused on the treatment of schizophrenia and the pharmacology of antipsychotic drugs. He is currently the Director of VISN 22 Mental Illness

Research for the VA and Director of the Section on Psychosis at the UCLA Semel Institute for Neuroscience and Human Behavior. Dr. Marder is a member of the National VA Committee on the Seriously Mentally Ill. Among his numerous awards are the Exemplary Psychiatrist Award from the National Alliance for the Mentally Ill and the Wayne Fenton Award for Outstanding Clinical Care from the *Schizophrenia Bulletin*. He is listed in “The Best Doctors in America” and “America’s Top Doctors.”

Donald C. Goff, M.D., earned his medical degree at the University of California School of

Medicine, Los Angeles. He established and was Director of the Schizophrenia Clinical and Research Program at Massachusetts General Hospital, which integrated pharmacology, cognitive behavioral therapy, neuroimaging, and genetics to enhance the understanding of the pathophysiology of schizophrenia and to develop new treatments. He relocated to NYU Medical Center in February 2012, is now Director of the Nathan Kline Institute and Vice Chair of Psychiatry, and is continuing his research on developing novel treatments for schizophrenia. Dr. Goff is the recipient of the Kempf Award for Mentorship in Biological Psychiatry from the American Psychiatric Association and the Stanley Dean Award for Research in Schizophrenia from the American College of Psychiatrists. Dr. Goff has published more than 200 articles concerning schizophrenia and related topics.

Daniel C. Javitt, M.D., Ph.D., earned his degrees from Albert Einstein College of Medicine and is

currently Professor of Psychiatry and Neuroscience at Columbia University College of Physicians and Surgeons,

where he directs the Division of Experimental Therapeutics as well as the Columbia Conte Center for Schizophrenia Research. His research focuses on mechanisms underlying negative symptoms and cognitive deficits in schizophrenia and other serious mental disorders. He has received numerous awards, most recently the Stanley Dean Award for Schizophrenia Research from the American College of Psychiatrists (2012). He holds patents for the use of glycine, D-serine, and glycine transport inhibitors in schizophrenia. Dr. Javitt currently serves on the editorial board of several prestigious journals and has published more than 250 articles on issues related to normal brain function, NMDA receptors, and schizophrenia.

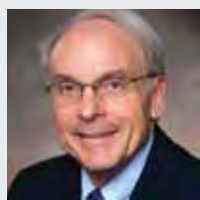

Robert W. Buchanan, M.D. is

Professor in the Department of Psychiatry, University of

Maryland School of Medicine, Deputy Director of the Maryland Psychiatric Research Center, and Chief of the MPRC Outpatient Research Program. Major research interests include schizophrenia phenomenology and the development of novel pharmacological approaches for side effects of antipsychotic treatment. He has been involved in multiple aspects of the Measurement and Treatment Research to Improve Cognition in Schizophrenia project, including the identification of potential pharmacological targets for the treatment of cognitive impairments and the development of guidelines for conducting clinical trials of cognitive-enhancing drugs. He currently serves as an investigator in the Treatment and Evaluation Network for Experimental Targets in Schizophrenia. He has had an ongoing role in the development and update of the Schizophrenia Patient Outcomes Research Team psychopharmacological treatment recommendations.

APA Distinguished Psychiatrist Lecture

Jeremy Lazarus, M.D.
Monday, 9:00 a.m.–10:30 a.m.

Jeremy A. Lazarus, MD, a board-certified psychiatrist in private practice in Denver, became the 167th

president of the American Medical Association in 2012. He represents AMA on the Joining Forces initiative, which assists veterans with traumatic brain injury, post-traumatic stress disorder, and post-combat depression. He has authored numerous publications on ethics, economics, and managed care issues along with *Entering Private Practice: A Handbook for Psychiatrists*, his newest book. Dr. Lazarus received a medical degree in psychiatry from the University of Illinois College of Medicine and is now a clinical professor of psychiatry at the University of Colorado Denver School of Medicine and a voluntary professor of psychiatry at the University of Miami Leonard M. Miller School of Medicine. Dr. Lazarus received the Colorado Psychiatric Society Outstanding Achievement Award in 2008 and the APA's Distinguished Service Award in 2012.

APA Frontiers of Science Lecture

Nora D. Volkow, M.D.
Monday, 11:00 a.m.–12:30 p.m.

Nora D. Volkow, M.D., became Director of the National Institute on Drug Abuse at the National

Institutes of Health in 2003. NIDA supports research on the health aspects of drug abuse and addiction. Dr. Volkow's work has been instrumental in demonstrating that drug addiction is a disease of the human brain. As a research psychiatrist and scientist, Dr. Volkow pioneered the use of brain imaging to investigate the toxic effects of drugs and their

addictive properties. She also made important contributions to the neurobiology of obesity, ADHD, and the behavioral changes that occur with aging. Dr. Volkow was selected for membership in the Institute of Medicine in the National Academy of Sciences and was recently named one of *Time Magazine's* "Top 100 People Who Shape our World."

Alexander Gralick Award Lecture

Romina Mizrahi, M.D., Ph.D.
Monday, 1:30 p.m.–3:00 p.m.

Romina Mizrahi, M.D., Ph.D. is currently involved in research to develop a better

understanding of the pathophysiology of schizophrenia and its treatment by using phenomenology and brain imaging techniques. That research aims to investigate the relationship between stress and psychosis by using positron emission tomography and experience sampling to examine the neurotransmitter dopamine in the brain and tap into daily experiences of stress and attenuated psychotic symptoms in persons at risk for psychosis, in those who misuse cannabis and experience psychotic symptoms, and in patients with schizophrenia; to understand the relation between neuroinflammation and brain function and structure; and to investigate the role of neuroinflammation in Alzheimer's disease and in those at risk of mild cognitive impairment.

APA Frontiers of Science Lecture

Daniel Geschwind, M.D., Ph.D.
Monday, 3:30 p.m.–5:00 p.m.

Daniel Geschwind, M.D., Ph.D., joined the UCLA faculty in 1997 where he is the Gordon and

Virginia MacDonald Distinguished Chair in Human Genetics, Professor of Neurology and Psychiatry at the UCLA

School of Medicine, and Director of the Neurogenetics Program and the Center for Autism Research and Treatment. His research aims to improve our understanding of autism and neurodegenerative diseases and to foster large-scale collaborative patient resources for genetic research and data sharing. He serves on several scientific advisory boards, including the Faculty of 1000 Medicine, the Executive Committee of the American Neurological Association, and the NIH Council of Councils. He received the Derek Denny-Brown Neurological Scholar Award from the American Neurological Association in 2004 and the Scientific Service Award from Autism Speaks in 2007. He is a member of the Institute of Medicine.

APA/NIMH Vestermark Psychiatry Educator Award Lecture

Jules Malcom Ranz, M.D.
Monday, 3:30 p.m.–5:00 p.m.

Jules Malcolm Ranz, M.D., has been director of the Columbia University

Public Psychiatry Fellowship at New York State Psychiatric Institute, a nationally acclaimed model for public and community psychiatry fellowships, for the past 21 years. In 2011, Dr. Ranz created the University's Program for Psychiatric Education to work with program directors in four NYC psychiatry residency training programs who have expressed interest in using his Four-Factor Model to augment the systems-based practices training they provide to their residents. Dr. Ranz supports fellowship alumni by nurturing the development of the joint NY Regional Chapters of the American Association of Community Psychiatrists and the American Association of Psychiatric Administrators. In the past four years, he has served on the selection committees of both the GAP and APA Public Psychiatry Fellowships (as Chair from 2010 to 2012.)

The William C. Menninger Memorial Convocation Lecture

Baroness Susan Greenfield, C.B.E., D.Phil.

Susan Greenfield is a neuroscientist at the University of Oxford and has been awarded 30 Honorary Degrees from British and foreign universities. She heads a multi-disciplinary research group exploring novel

brain mechanisms linked to neurodegenerative diseases. In addition, she has published a neuroscientific theory of consciousness: *The Private Life of the Brain* (2003) and developed an interest in the impact of 21st Century technologies on how young people think and feel, as discussed in her book *ID: The Quest for Identity in the 21st Century* (2008). She further explores the neurobiological approach to identity in her latest book *You and Me: The Neuroscience of Identity*, (2011).

In 1998 Susan received the Michael Faraday Medal from the Royal Society. She was awarded a CBE in the Millennium New Year's Honours List, and a non-political Life Peerage in 2001. Susan recently served as the Chancellor of Heriot Watt University (2005-2012). In 2000 she was elected to an Honorary Fellowship of the Royal College of Physicians and in 2007 to an Honorary Fellowship of the Royal Society of Edinburgh. Further recognition of her work includes L'Ordre National de la Légion d'Honneur and the American Academy of Achievement Golden Plate Award, both received in 2003, as well as the Australian Medical Research Society Medal, awarded in 2010. In 2011 she joined the Advisory Board of the Kusuma School of Biological Sciences at the Indian Institute for Technology, Delhi and in 2012 she became a Governor of The Florey Institute for Neuroscience and Mental Health.

Adolf Meyer Award Lecture

William T. Carpenter, Jr., M.D.
 Tuesday, 9:00 a.m.–10:30 a.m.

William T. Carpenter, Jr., M.D., is a professor at the University of Maryland School of

Medicine and Director of the Maryland Psychiatric Research Center. He obtained his medical degree from the Wake Forest University School of Medicine. Dr. Carpenter is Editor-in-Chief of *Schizophrenia Bulletin* and has authored more than 400 publications. His major professional interest is severe mental illness, especially schizophrenia. He provided expert testimony in the case of the *United States v. John Hinckley, Jr.* and was a member of the State Department delegation to inspect the political use of psychiatry in the Soviet Union. He chairs the work group on psychotic disorders in preparation of *DSM-5*. He has been the recipient of numerous awards and was elected to the Institute of Medicine of the National Academy of Sciences in 1998.

John Fryer Award Lecture

Caitlin Ryan, Ph.D., A.C.S.W.
 Tuesday, 9:00 a.m.–10:30 a.m.

Caitlin Ryan, Ph.D., A.C.S.W. is a clinical social worker who has worked on lesbian, gay, bi-

sexual, and transgender (LGBT) health and mental health for nearly 40 years. She is a graduate of Smith College School for Social Work. Her work has been recognized by the National Association of Social Workers, the National Association of People with AIDS, the Gay & Lesbian Medical Association, and the American Psychological Association, which gave her the Distinguished Scientific Contribution Award for

groundbreaking research on LGBT youth and families. As Director of the Family Acceptance Project at San Francisco State University, Dr. Ryan and her team are developing an evidence-based family intervention model to strengthen and help ethnically and religiously diverse families support their LGBT children, maintain LGBT youth in their homes, decrease family rejection and health risks, and promote family acceptance and well-being.

Judd Marmor Award Lecture

David Braff, M.D.
 Tuesday, 11:00 a.m.–12:30 p.m.

David Braff, M.D., is Professor of Psychiatry and Director of the Schizophrenia Program at the

University of California, San Diego, School of Medicine. His research interests involve identifying inhibitory and information processing deficits in psychiatric disorders and using translational and genetic research to identify the genetic architecture of neuropsychiatric disorders. He has treated many patients with schizophrenia and other serious mental disorders. Dr. Braff has published widely, sits on the editorial boards of the *Archives of General Psychiatry* and five other journals, and serves on many national and international committees and societies. He is currently the Executive Secretary of the Society of Biological Psychiatry. He has received numerous grants, awards, and prizes and has been selected as one of the “Best Doctors” in the United States and in San Diego.

APA Distinguished Psychiatrist Lecture

Maria A. Oquendo, M.D.
 Tuesday, 11:00 a.m.–12:30 p.m.

Maria A. Oquendo, M.D., is Professor of Clinical Psychiatry and Vice Chair for

Education in Psychiatry at Columbia University and the New York State Psychiatric Institute. Her expertise is in diagnosis, pharmacologic treatment, and neurobiology of bipolar disorder and major depression with an emphasis on suicidal behavior. She has received many awards including the Simon Bolivar Award from the APA (2010) and has twice received the Exemplary Psychiatrist Award from the National Alliance for the Mentally Ill. She was named Honorary Professor, Universidad Peruana Cayetano Heredia, Lima, Peru (2011). Dr. Oquendo is principal investigator on a study of suicidal behavior in affective disorders. She was recently awarded a T32 grant to implement a research fellowship program in Global Mental Health. She has authored or co-authored more than 220 peer-reviewed articles.

International Guest Lecture

Baroness Susan Greenfield, C.B.E., D.Phil.
 Tuesday, 11:00 a.m.–12:30 p.m.

Susan Greenfield, C.B.E., D.Phil. is a neuroscientist at the University of

Oxford. She has received over 30 honorary degrees and heads a multi-disciplinary research group exploring novel brain mechanisms linked to neurodegenerative diseases such as Alzheimer’s and Parkinson’s. She is an Honorary Fellow of the Royal College of Physicians and the Royal Society of

Edinburgh. She was awarded the Michael Faraday Medal from the Royal Society, the L'Ordre National de la Légion d'Honneur, the Australian Medical Research Society Medal, a CBE in the Millennium New Year's Honours List, and granted a non-political Life Peerage in 2001. Another interest is the impact of 21st century technologies on how young people think and feel, as discussed in her books *ID: The Quest for Identity in the 21st Century* and *You and Me: The Neuroscience of Identity* (2011).

APA Frontiers of Science Lecture

Eric J. Nestler, M.D., Ph.D.
Tuesday, 1:30 p.m.–3:00 p.m.

Eric J. Nestler, M.D., Ph.D., is Professor of Neuroscience at the Mount Sinai School of

Medicine, where he serves as Chair of the Department of Neuroscience and Director of the Friedman Brain Institute. He received his advanced degrees from Yale University and served on the Yale faculty from 1987 to 2000 as Professor of Psychiatry and Neurobiology and Director of the Division of Molecular Psychiatry. He served as Distinguished Professor and Chair of the Department of Psychiatry at The University of Texas Southwestern Medical Center until moving to New York in 2008. Dr. Nestler's research focuses on understanding the molecular mechanisms of addiction and depression in animal models and using this information to develop improved treatments for these disorders. Dr. Nestler is a member of the Institute of Medicine and a Fellow of the American Academy of Arts and Sciences.

APA Guest Lecture

Robert K. Moyzis, Ph.D.
Tuesday, 3:30 p.m.–5:00 p.m.

Robert K. Moyzis, Ph.D., is Professor of Biological Chemistry at the Institute of

Genomics and Bioinformatics, University of California, Irvine, and is internationally known for his pioneering work on human genome organization and complex genetic disorders, including his discovery and molecular cloning of the human telomere. As Director of the Center for Human Genome Studies at Los Alamos National Laboratory, he helped initiate the worldwide Human Genome Project. His laboratory conducted some of the first genome-wide computational searches for recent Darwinian selection in humans. At UCI, his research focused on development and use of HGP technology to study complex disorders such as ADHD, autism, and Alzheimer's disease.

APA Distinguished Psychiatrist Lecture

Steve M. Stahl, M.D., Ph.D.
Tuesday, 3:30 p.m.–5:00 p.m.

Stephen M. Stahl, M.D., Ph.D., is Adjunct Professor of Psychiatry, University of

California San Diego and Chairman, Neuroscience Education Institute. Dr. Stahl received his M.D. from Northwestern University and his Ph.D. in pharmacology and physiology from the University of Chicago with specialties in internal medicine, neurology, and psychiatry. Dr. Stahl currently serves as editor-in-chief of the journal *CNS Spectrums* and is on numerous editorial boards of other leading journals. He has edited and written numerous books, including

the award-winning *Stahl's Essential Psychopharmacology*, and *Essential Psychopharmacology Prescriber's Guide*. He also has an active clinical practice specializing in psychopharmacologic treatment of resistant cases. Dr. Stahl has been cited as one of "America's Top Psychiatrists" and one of the "Best Doctors in America."

Solomon Carter Fuller Award Lecture

John Gaston, M.D.
Tuesday, 3:30 p.m.–5:00 p.m.

John O. Gaston, M.D., completed medical school and residency training at Yale

University. His focus has been on improving the mental health of African Americans through teaching, clinical service, and administration. He is currently Vice Chair for Clinical Affairs in the Department of Psychiatry and Behavioral Sciences at Morehouse School of Medicine. Dr. Gaston has served as Director of the Residency Training Program and Medical Director of the CORK Institute on Alcohol and Other Addictive Disorders. He has held numerous positions within the American Psychiatric Association, including Area 5 Representative, and is a member of the APA PAC Board of Directors. His APA committee appointments have included Chair, Committee of Black Psychiatrists, and the Bylaws Committee. Dr. Gaston is a past President of the Georgia Psychiatric Physicians Association.

APA JobCentral Virtual Career Fair June 18, 2013 • 12 pm-3 pm EST

The American Psychiatric Association would like to invite you to attend our first **APA JobCentral Virtual Career Fair!** APAJobCentral has been connecting employers and exceptional psychiatrists for over a year now. By creating this virtual event, we hope to start that initial conversation between your recruiting department and psychiatrists searching for that perfect career without anyone having to leave their home or office!

Employer and Job Seeker Benefits

As an **employer**, you are allowed up to four recruiters to showcase your open positions in your customized virtual booth. Your team will be able to engage in one-on-one online chats, view attendees' resumes, work histories, and view optional profile pictures. A rating system is in place for you to score your interactions and record notes about each candidate! **Early-bird discounted booths and sponsorship packages available!**

As a **job seeker**, you will be able to interact live with recruiters and HR departments at each virtual booth. You are able to share your resume, experience, and schedule second-round interviews. By learning about all of the new opportunities available in one 3 hour time slot, you increase your job pool as you continue on the search for your first or next career opportunity! As with APA JobCentral, job seeker registration is **and always will be FREE.**

For detailed information on how you can register as an employer, contact Eamon Wood at ewood@pminy.com or 212-904-0363. If you are a job seeker, please visit APA JobCentral's web page at jobs.psychiatry.org for more information.

GENERAL INFORMATION

The APA Exhibits Program is an integral component of the overall Annual Meeting and provides an excellent opportunity for meeting registrants to obtain the latest information on products and services related to the psychiatric profession.

Please allow adequate time in your daily schedule to visit the exhibits, which are located in Exhibit Hall A-C, Exhibit Level. At the exhibits you will have the opportunity to participate in interactive computer programs and speak with the representatives of companies who provide services and products related directly to psychiatrists' professional and personal interests.

To assist in locating a particular company or product, a floor plan of the exhibit hall is included in the exhibits section of *The Guide*, along with a list of: 1) exhibitors with product/service description; 2) exhibitors by product/service listing; and 3) exhibitors listed alphabetically with booth numbers.

Hospitality Lounges

Two APA Cafés, serving complimentary coffee, are located throughout the exhibit hall. Please utilize these areas to relax and refresh during your time in the hall. The APA Cafés will also provide attendees with charging stations for cell phones and laptops, as well as free Wi-Fi.

Publishers' Book Fair

Major publishers and book sellers, including the American Psychiatric Publishing, are located in this designated area. Participating companies are selling and taking orders for new and current professional books in the field of psychiatry.

Career Fair

Exhibitors in this area include: government agencies, hospitals, locum tenens, mental health clinics,

psychiatric facilities, and recruiters seeking psychiatrists to fill open positions. Find the APA JobCentral, The Career Hub for Psychiatry, the ultimate recruitment tool for employers and job-seekers alike, located in the APA Member Center, next to the American Psychiatric Publishing Bookstore.

International Meeting Pavilion

The International Meeting Pavilion is an area in the exhibit hall comprised of international organizations and associations that will be holding international meetings outside of the U.S.

Endorsements

Products and services displayed in the exhibit hall occur by the contractual arrangement between the American Psychiatric Association and participating companies. This arrangement does not constitute or imply an endorsement by the American Psychiatric Association of these products or services.
