ADVANCES IN TARDIVE DYSKINESIA: Clinical Considerations and a Patient Perspective

DATE:

Sunday, May 6, 2018, 2:00 PM – 3:00 PM

LOCATION:

Javits Center, Exhibit Hall
Product Theater Room 2, New York, NY

Lunch will be provided

PRESENTED BY:

INDICATION & USAGE

INGREZZA (valbenazine) capsules is indicated for the treatment of adults with tardive dyskinesia.

IMPORTANT SAFETY INFORMATION

WARNINGS & PRECAUTIONS

Somnolence

INGREZZA can cause somnolence. Patients should not perform activities requiring mental alertness such as operating a motor vehicle or operating hazardous machinery until they know how they will be affected by INGREZZA.

QT Prolongation

INGREZZA may prolong the QT interval, although the degree of QT prolongation is not clinically significant at concentrations expected with recommended dosing. INGREZZA should be avoided in patients with congenital long QT syndrome or with arrhythmias associated with a prolonged QT interval. For patients at increased risk of a prolonged QT interval, assess the QT interval before increasing the dosage.

ADVERSE REACTIONS

The most common adverse reaction ($\geq 5\%$ and twice the rate of placebo) is somnolence. Other adverse reactions ($\geq 2\%$ and $>$ Placebo) include: anticholinergic effects, balance disorders/falls, headache, akathisia, vomiting, nausea, and arthralgia.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit MedWatch at www.fda.gov/medwatch or call 1-800-FDA-1088

Please see adjacent page for INGREZZA Brief Summary of Prescribing Information or visit www.INGREZZAHCP.com for full Prescribing Information.

This is an informational event provided by Neurocrine Biosciences, Inc. Participants cannot claim CME credit for attending this informational event and participation may be subject to reporting under the Sunshine Act. The Industry Product Theater's content and the views expressed therein are those of Neurocrine Biosciences, Inc. and not of APA or APAF.

HCPs licensed in Vermont or Minnesota (as well as their employees, eg, office staff) and federal employees (including VA and DoD) are prohibited from partaking in a meal or snack during this event. Please check the opt-out option when signing in. Attention New Jersey Prescribers: The meal provided exceeds the \$15.00 limit under New Jersey law. Please plan to opt-out of the meal when you arrive.

PLEASE VISIT BOOTH 1427

Brief Summary: for full Prescribing Information and Patient Information, refer to package insert.

INDICATIONS AND USAGE

INGREZZA is a vesicular monoamine transporter 2 (VMAT2) inhibitor indicated for the treatment of adults with tardive dyskinesia.

WARNINGS AND PRECAUTIONS

Somnolence

INGREZZA can cause somnolence. Patients should not perform activities requiring mental alertness such as operating a motor vehicle or operating hazardous machinery until they know how they will be affected by INGREZZA.

QT Prolongation

INGREZZA may prolong the QT interval, although the degree of QT prolongation is not clinically significant at concentrations expected with recommended dosing. In patients taking a strong CYP2D6 or CYP3A4 inhibitor, or who are CYP2D6 poor metabolizers, INGREZZA concentrations may be higher and QT prolongation clinically significant. For patients who are CYP2D6 poor metabolizers or are taking a strong CYP2D6 inhibitor, dose reduction may be necessary. For patients taking a strong CYP3A4 inhibitor, reduce the dose of INGREZZA to 40 mg once daily. INGREZZA should be avoided in patients with congenital long QT syndrome or with arrhythmias associated with a prolonged QT interval. For patients at increased risk of a prolonged QT interval, assess the QT interval before increasing the dosage.

ADVERSE REACTIONS

The following adverse reactions are discussed in more detail in other sections of the labeling:

- Somnolence
- QT Prolongation

Clinical Trials Experience

Because clinical trials are conducted under widely varying conditions, adverse reaction rates observed in the clinical trials of a drug cannot be directly compared to rates in the clinical trials of another drug and may not reflect the rates observed in practice.

Variable and Fixed Dose Placebo-Controlled Trial Experience

The safety of INGREZZA was evaluated in 3 placebo-controlled studies, each 6 weeks in duration (fixed dose, dose escalation, dose reduction), including 445 patients. Patients were 26 to 84 years of age with moderate to severe tardive dyskinesia and had concurrent diagnoses of mood disorder (27%) or schizophrenia/schizoaffective disorder (72%). The mean age was 56 years. Patients were 57% Caucasian, 39% African-American, and 4% other. With respect to ethnicity, 28% were Hispanic or Latino. All subjects continued previous stable regimens of antipsychotics; 85% and 27% of subjects, respectively, were taking atypical and typical antipsychotic medications at study entry.

Adverse Reactions Leading to Discontinuation of Treatment

A total of 3% of INGREZZA treated patients and 2% of placebo-treated patients discontinued because of adverse reactions.

Common Adverse Reactions

Adverse reactions that occurred in the 3 placebo-controlled studies at an incidence of $\geq 2\%$ and greater than placebo are presented in Table 1.

Table 1: Adverse Reactions in 3 Placebo-Controlled Studies of 6-week Treatment Duration Reported at $\geq 2\%$ and $>$ Placebo

Adverse Reaction ¹	INGREZZA (n=262) (%)	Placebo (n=183) (%)
General Disorders		
Somnolence (somnolence, fatigue, sedation)	10.9%	4.2%
Nervous System Disorders		
Anticholinergic effects (dry mouth, constipation, disturbance in attention, vision blurred, urinary retention)	5.4%	4.9%
Balance disorders/fall (fall, gait disturbance, dizziness, balance disorder)	4.1%	2.2%
Headache	3.4%	2.7%
Akathisia (akathisia, restlessness)	2.7%	0.5%
Gastrointestinal Disorders		
Vomiting	2.6%	0.6%
Nausea	2.3%	2.1%
Musculoskeletal Disorders		
Arthralgia	2.3%	0.5%

¹ Within each adverse reaction category, the observed adverse reactions are listed in order of decreasing frequency.

Other Adverse Reactions Observed During the Premarketing Evaluation of INGREZZA

Other adverse reactions of $\geq 1\%$ incidence and greater than placebo are shown below. The following list does not include adverse reactions: 1) already listed in previous tables or elsewhere in the labeling, 2) for which a drug cause was remote, 3) which were so general as to be uninformative, 4) which were not considered to have clinically significant implications, or 5) which occurred at a rate equal to or less than placebo.

Endocrine Disorders: blood glucose increased

General Disorders: weight increased

Infectious Disorders: respiratory infections

Neurologic Disorders: drooling, dyskinesia, extrapyramidal symptoms (non-akathisia)

Psychiatric Disorders: anxiety, insomnia

During controlled trials, there was a dose-related increase in prolactin. Additionally, there was a dose-related increase in alkaline phosphatase and bilirubin, suggesting a potential risk for cholestasis.

DRUG INTERACTIONS

Drugs Having Clinically Important Interactions with INGREZZA

Table 2: Clinically Significant Drug Interactions with INGREZZA

Monoamine Oxidase Inhibitors (MAOIs)	
<i>Clinical Implication:</i>	Concomitant use of INGREZZA with MAOIs may increase the concentration of monoamine neurotransmitters in synapses, potentially leading to increased risk of adverse reactions such as serotonin syndrome, or attenuated treatment effect of INGREZZA.
<i>Prevention or Management:</i>	Avoid concomitant use of INGREZZA with MAOIs.
<i>Examples:</i>	isocarboxazid, phenelzine, selegiline
Strong CYP3A4 Inhibitors	
<i>Clinical Implication:</i>	Concomitant use of INGREZZA with strong CYP3A4 inhibitors increased the exposure (C_{max} and AUC) to valbenazine and its active metabolite compared with the use of INGREZZA alone. Increased exposure of valbenazine and its active metabolite may increase the risk of exposure-related adverse reactions.
<i>Prevention or Management:</i>	Reduce INGREZZA dose when INGREZZA is coadministered with a strong CYP3A4 inhibitor.
<i>Examples:</i>	itraconazole, ketoconazole, clarithromycin
Strong CYP2D6 Inhibitors	
<i>Clinical Implication:</i>	Concomitant use of INGREZZA with strong CYP2D6 inhibitors may increase the exposure (C_{max} and AUC) to valbenazine's active metabolite compared with the use of INGREZZA alone. Increased exposure of active metabolite may increase the risk of exposure-related adverse reactions.
<i>Prevention or Management:</i>	Consider reducing INGREZZA dose based on tolerability when INGREZZA is coadministered with a strong CYP2D6 inhibitor.
<i>Examples:</i>	paroxetine, fluoxetine, quinidine
Strong CYP3A4 Inducers	
<i>Clinical Implication:</i>	Concomitant use of INGREZZA with a strong CYP3A4 inducer decreased the exposure of valbenazine and its active metabolite compared to the use of INGREZZA alone. Reduced exposure of valbenazine and its active metabolite may reduce efficacy.
<i>Prevention or Management:</i>	Concomitant use of strong CYP3A4 inducers with INGREZZA is not recommended.
<i>Examples:</i>	rifampin, carbamazepine, phenytoin, St. John's wort ¹
Digoxin	
<i>Clinical Implication:</i>	Concomitant use of INGREZZA with digoxin increased digoxin levels because of inhibition of intestinal P-glycoprotein (P-gp).
<i>Prevention or Management:</i>	Digoxin concentrations should be monitored when co-administering INGREZZA with digoxin. Increased digoxin exposure may increase the risk of exposure related adverse reactions. Dosage adjustment of digoxin may be necessary.

¹ The induction potency of St. John's wort may vary widely based on preparation.

Drugs Having No Clinically Important Interactions with INGREZZA

Dosage adjustment for INGREZZA is not necessary when used in combination with substrates of CYP1A2, CYP2B6, CYP2C8, CYP2C9, CYP2C19, CYP2E1, or CYP3A4/5 based on *in vitro* study results.

OVERDOSAGE

Human Experience

The pre-marketing clinical trials involving INGREZZA in approximately 850 subjects do not provide information regarding symptoms with overdose.

Management of Overdosage

No specific antidotes for INGREZZA are known. In managing overdose, provide supportive care, including close medical supervision and monitoring, and consider the possibility of multiple drug involvement. If an overdose occurs, consult a Certified Poison Control Center (1-800-222-1222 or www.poison.org).

For further information on INGREZZA, call 84-INGREZZA (844-647-3992).

Learn More About This Guide

In this book, you will find three sections: Program, New Research and the Exhibits Guide. Use these sections to navigate the 2018 Annual Meeting and experience all the meeting has to offer. We're glad you're joining us. Welcome to the Annual Meeting.

Located within the Program, you will find a description of the various scientific session formats along with a log where you can record your daily attendance for the purpose of obtaining CME credit for your activities. The Program is first organized by day, then by session start time, with formats and sessions listed alphabetically under those times. Individual meeting days and program tracks are color-coded to make navigating the Program simple and easy.

The New Research section lists the posters that will be presented at this meeting, organized numerically by session/day. There is a topic index at the end of the New Research section to assist you in finding the posters most interesting to you.

The Exhibits Guide contains an acknowledgement to exhibitors for sponsorships, a list of the exhibitors and a floor plan of the Exhibit Hall, along with information about the Product Theaters, Therapeutic Updates, Career Fair, and Publishers Book Fair. Use this guide and the included exhibitor and author/presenter indices to navigate the exhibit hall and find precisely the booth you're looking for.

If you have any questions about this book or the scientific program, please feel free to stop by the Education Center, Special Events Hall 1D Foyer, First Level, Javits Center, and a member of the APA Administration will be happy to assist you. All members of the APA Administration will wear green badges.

Welcome from the Scientific Program Committee

Dear Colleagues and Guests,

Welcome to New York City!

We're delighted you're here with all of us for what promises to be a rich and informative APA Annual Meeting.

This year, the APA scientific program committee poured through a record number of high-quality submissions to select compelling content representing the full spectrum of our field's breadth and depth. With more than 500 sessions to choose from, the meeting app will come in handy as you try to decide where to spend your time. The app is free to download at psychiatry.org/app.

Once you've gotten the app up and running, go to 'sessions' and select the 'filter' in the top right corner. You will find an assortment of topics ranging from Academic Psychiatry to Consultation-Liaison Psychiatry, Integrated and Collaborative Care, Diversity and Health Equity, Physician Well-Being and Burnout, Technology, Psychopharmacology, Women's Health,

and more. If you encounter technological glitches while trying to download or use the app, please come to the APA Education Center in the Javits Center for assistance.

We want this meeting to be a wonderful experience for you from beginning to end. Please try to reconnect with a dear friend or colleague and make a few new friends too!

If you love music, please join us for the 100th birthday anniversary celebration of Leonard Bernstein Saturday evening, May 5, when Dr. Richard Kogan, M.D., Julliard-trained concert pianist and clinical professor of psychiatry at the Weill Cornell Medical Center, performs "West Side Story: The Mind and Music of Leonard Bernstein" from 5:30 p.m. – 7:00 p.m. at the Marriott Marquis.

May the fun in shared learning begin!

Very warmly,
Linda L. M. Worley, M.D.

Welcome from the APA President

Dear Colleagues and Guests,

Over the next few days, leaders in psychiatry from the U.S. and around the world will take part in an informative and stimulating program. This year's theme, "Building Well-Being Through Innovation," addresses two key issues that psychiatrists face today: physician burnout and the role of technology and innovation in mental health care.

An entire track will focus on physician burnout and well-being. Sessions will explore strategies for promoting physician wellness and interventions that can help psychiatrists stay abreast of changes and meet the needs of our patients while leading professionally satisfying careers and maintaining personal balance. On Sunday, Darrell Kirch, M.D., President and CEO of the Association of American Medical Colleges, will present a talk on "The Burnout Crisis—Building a Resilient Clinician Workforce for the Future."

Several sessions will look at how the field of psychiatry is changing, particularly the role of technology. Susan Greenfield, C.B.E., Founder and CEO, Neuro-Bio Ltd., will present on "How the Digital World is Changing the Way We Think and Feel," and Thomas R. Insel, M.D., Founder and President of Mindstrong Health, will answer the question "Will Technology Transform Mental Healthcare?" Also, don't miss the Mental Health Innovation Zone which addresses the ever-changing landscape of technology in mental health services with curated educational activities on digital medicine, virtual reality, machine learning, entrepreneurship, networking opportunities and more.

At the Opening Session, Sunday at 4:30 p.m., retired U.S. Army Lt. Gen. Mark Hertling, former commanding general of U.S. Army Europe, will give a talk on how physicians can apply leadership principles developed by the military to medical practice.

The research track, in partnership with the National Institute of Mental Health, will focus on collaboration and technology and will feature a plenary session with Director Joshua Gordon, M.D., Ph.D. Several sessions feature NIDA director Nora Volkow, who will address new research in addiction and how it can impact the ongoing opioid crisis. Other tracks include Child and Adolescent Psychiatry, Forensic Psychiatry, Geriatric Psychiatry and Consultation-Liaison Psychiatry, as well as a track for Residents, Fellows and Medical Students.

I want to draw attention to several other sessions that I am excited to see: Benjamin Druss, M.D., M.P.H., Faculty, Emory University, Rolling School of Public Health, will present "Beyond Integration: Linking Mental Health, Physical Health and Public Health;" Wendy Whelan, NYC Ballet Principal, will talk about "The Life of a New York City Ballet Principal: A View Through the Opera Glass;" and Helen Herman, M.D., Professor, University of Melbourne, will talk about "Transformative Partnerships for the Mental Health of Young People."

Learning Labs offer a chance to challenge yourself with new ways of thinking and a hands-on learning experience. Among the interactive Learning Labs are discussions of the role of microaggressions in psychiatry, a debate on pharmacogenetic testing and a session on using improv techniques to fight burnout.

Take advantage of the free collaborative care training APA is offering multiple times during the meeting. This year we have added a new advanced course for psychiatrists ready to implement collaborative care in their communities.

I want to express deep appreciation to the Scientific Program Committee and especially chair Linda L. M. Worley, M.D., and vice-chairpersons Jacqueline Feldman, M.D., and Iqbal Ahmed, M.D., for all the excellent work in developing the programs and sessions at the meeting.

For the latest information and meeting updates, please download the free APA Meetings App (psychiatry.org/app) and follow @APAPsychiatric on Twitter. Join the conversation and engage on social media during the meeting using #APAAM18.

Throughout my career, I've looked forward to the APA Annual Meeting as a chance to connect with colleagues and reenergize my love for psychiatry. With the outstanding scientific program and the immense array of cultural attractions in our host city, I am certain that the 2018 APA Annual Meeting will be an informative and inspiring experience for all who attend. I look forward to seeing you!

American Psychiatric Association

Welcome from the APA CEO and Medical Director

Dear Colleagues and Guests,

Welcome to New York City for the 2018 Annual Meeting of the American Psychiatric Association. The meeting offers a rich educational program, featuring the latest scientific research, advances in clinical practice, and numerous special events and networking opportunities.

I am happy to say that the number of international attendees at this meeting has seen a significant increase over the previous year. Advances in technology and communication have made our world a much smaller place and made this a very exciting time to be a psychiatrist. It is more important than ever for APA and our members to be active participants in the global medical community. Whenever possible, we should connect with our colleagues from other parts of the world and engage in an exchange of medical knowledge, research, culture and ideas. I can think of no better venue for such an exchange than the APA Annual Meeting, the foremost psychiatric event in the world.

Our Annual Meeting also honors those doing exemplary work in the field of psychiatry. Please join me in honoring APA Distinguished Fellows, Distinguished Life Fellows, International Fellows, award winners and others at the Convocation of Distinguished Fellows. The Convocation will be followed by the William C. Menninger Memorial Lecture, a conversation on mental health strategy at different levels of government

featuring APA member Elinore McCance-Katz, M.D., Ph.D., Assistant Secretary for Mental Health and Substance Use at SAMHSA. Residents, Fellows and Medical Students will find a robust series of scientific sessions specifically tailored for residents and their professional growth through the dedicated session track. Learning Labs returns with more exciting, innovative sessions that emphasize hands-on learning and team training. And the ever-popular MindGames, where teams of residents go head-to-head with each other in a Jeopardy-style competition on patient care, medical knowledge and psychiatric history, is back and sure to be a fun and informative event.

If you haven't done so already, I encourage you to download the APA Meetings app for easy access to program information and the latest updates during the meeting. The app contains a treasure trove of content in a very user-friendly package and is a great way to manage your time and connect with your colleagues during the meeting. Download the app today at psychiatry.org/app.

If you're on Twitter, Facebook or Instagram, be sure to share your thoughts and experiences on the meeting by using #APAAM18.

Thank you, and I look forward to seeing you over the next few days!

Welcome from the New York County Psychiatric Society

Dear Colleagues and Guests,

On behalf of the New York County Psychiatric Society (NYCPS), welcome to the Big Apple! I am excited to have you in our city, home of many world class hospitals and research institutions, as well as a vibrant community of private practice and community based physicians. Psychiatry also has a bright future in New York City, with many resident and fellow members and early career psychiatrists, with ten residency programs and dozens of psychiatric fellowships in Manhattan and Staten Island alone. As president of the largest District Branch of the American Psychiatric Association, I am proud to live and work in this amazing, diverse city, and I hope you get to explore some of it in between all the great learning and networking opportunities this week.

NYC is one of the most recognizable and iconic cities in the world. Its five boroughs—Brooklyn, the Bronx, Manhattan, Queens, and Staten Island—are each unique. The people of NYC span every ethnicity across the globe and vary from the most impoverished to the wealthiest of America, yet they all join together as a community moving to the hum of the city. I hope you have a chance to experience the charm of our many neighborhoods.

NYC is known for its premier experiences such as its galleries and historic locations. In addition to our larger museums, such as the Met, MOMA, and Natural History Museum, there are many smaller ones that are just as interesting. For example, the Tenement Museum on the Lower East Side recreates the apartments immigrants

lived in from the 1800s to the 21st century. The New York City Transit Museum in Downtown Brooklyn includes subway cars from across the decades.

For history buffs, NYC has much to offer. In terms of historical psychiatric sites, NYC has many, with evidence of psychiatric care in Manhattan dating back to the mid-18th century! To further explore the rich history of psychiatry in NYC, we recommend the Hard Hat Tour on Ellis Island, where you can tour the island's immigrant psychiatric and medical units.

Although the pace of the city in many areas can be intense, there are also many peaceful, green spots in the City's numerous parks and squares to relax and people watch! Aside from the well-known Central Park, there is also the High Line, a rail trail right near the Javits Center where the Annual Meeting is held. If you are feeling adventurous and want to explore outside of Manhattan, Prospect Park in Brooklyn and the Bronx Botanical Gardens are beautiful.

For foodies, there's not enough room in this Meeting Guide for recommendations, so I'll recommend finding a local NYCPS member and asking them for their favorite spot or, even better, joining up with me for lunch!

Again, welcome to our city. We hope you love it as much as we do!

APA Central

All attendees are invited to visit APA Central in the Exhibit Hall to learn how APA provides medical leadership for mind, brain and body. Representatives from the APA are available to answer your questions.

Not an APA Member?

Discover the value of APA membership. Join onsite through the Rebate Program and save up to \$600. The Rebate Program is open to fully trained psychiatrists, residents and fellows, and international psychiatrists and residents who paid the full-program or resident nonmember Annual Meeting registration fee. Stop by APA Central for more details and to apply.

Explore PsychPRO

PsychPRO, the APA's mental health clinical data registry, is aimed at

- ▶ helping psychiatrists meet new quality reporting requirements and deliver high-quality care;
- ▶ helping psychiatrists avoid payment penalties and achieve bonuses for meeting CMS quality reporting requirements;
- ▶ reducing the burden of submitting Performance-in-Practice data and obtaining ABPN MOC Part IV credit; and
- ▶ advancing the research needs of the profession.

Stop by to learn about this new member benefit and how you can participate.

APA Foundation

It is the APA Foundation's mission to:

- ▶ Raise awareness and overcome barriers
- ▶ Invest in the future leaders of psychiatry
- ▶ Support research and training to improve mental health care
- ▶ Lead partnerships to address public challenges in mental health

Through your donations, you help us advance psychiatry and support the importance of mental health where people live, work, learn and worship.

APAPAC & Congressional Advocacy Network

Together, we're making a difference to boost psychiatry, evidence-based treatments, reimbursement, and patient care. Members can get involved through the American Psychiatric Association Political Action Committee (APAPAC) and the Congressional Advocacy Network (CAN). APAPAC identifies and makes political contributions to candidates' campaigns for federal office who are supportive of mental health issues affecting our specialty and our patients, through the generous contributions of members. The CAN helps to develop, train and energize a national network of psychiatrists committed to building personal relationships with members of Congress to help educate them on mental health issues and the profession of psychiatry. Please stop by APA Central to learn how you can get involved.

APA JobCentral

Looking for your next career move, or need to make a hire? Visit APA JobCentral located in APA Central to discover available jobs across the country or post a position. A representative will be available to assist you with the user-friendly system. Using the Event Connection tool, candidates and employers can flag their resume and/or posting to show their attendance at this year's meeting. Be sure to stop by and pick up a copy of the *2018 APA JobCentral Recruitment Guide*. Visit us online at jobs.psychiatry.org.

Continuing Medical Education

Certificate of Attendance and Evaluation

The general meeting evaluation and CME certificate of attendance are available at the CME Certificate of Attendance Booth located in the Education Center, Special Events Hall 1D Foyer, First Level, Javits Center, Saturday – Wednesday, 7:30 a.m. – 5:30 p.m., or online at psychiatry.org/annualmeetingcme. The online evaluation website will be available during the meeting and for three months afterward. Participants can claim CME certificates on or before August 9, 2018. You will need the user name and password provided in your registration confirmation email or your badge number to access the evaluation and obtain your certificate.

Certificates will not be issued after August 9.

Educational Objectives

By participating in this meeting, you will

- ▶ describe the utility of psychotherapeutic and pharmacological treatment options;
- ▶ integrate knowledge of current psychiatry into discussions with patients; and
- ▶ identify barriers to care, including health service delivery issues.

- ▶ describe new research findings in psychiatry and neuroscience and how they may impact practice;
- ▶ apply quality improvement strategies to improve clinical care;
- ▶ provide culturally competent care for diverse populations;

Accreditation

The APA is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. The APA designates this live activity for a maximum of *40 AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Unless otherwise specified, scientific sessions on the Annual Meeting program meet the criteria for *AMA PRA Category 1 Credit™*. Sessions in the following program formats are designated as Category 1: advances in psychiatry, case conferences, courses and master courses, FOCUS Live!, forums, lectures, symposia and presidential symposia, rapid-fire talks, interactive sessions, learning lab sessions, EduTours, and workshops and media workshops.

Poster sessions, Convocation, the Opening Session, and events in the Mental Health Innovation Zone are NOT designated for *AMA PRA Category 1 Credit™*.

Please note that the scientific program schedule is subject to change. Please see the APA Meetings App for details on changes to the scientific program. The *APA Daily* will list only session cancellations – not room, time or presenter changes.

Attendance

Scientific sessions are open to all Annual Meeting registrants with the exception of case conferences, which are open to APA members only. Courses and master courses require advance registration and an additional registration fee. You must be registered for the meeting before you can enroll in courses and master courses.

To document CME credit earned at the Annual Meeting, participants should maintain a list of sessions they attend. Credit is earned on an hour-for-hour basis. A daily attendance log is provided in this book for tracking your sessions and credits. See page **64**.

Participation Policy

The American Psychiatric Association's policy is to promote an environment of mutual respect, well-being, and collegiality at its meetings. APA values and benefits from the diverse opinions its members

hold on the issues with which the Association and the psychiatric profession are confronted. All individuals at the meeting agree to conduct themselves in a manner appropriate for health care professionals. This includes respect for the intellectual property of others, proper display and use of meeting badges, and the avoidance of aggressive or inappropriate behavior towards others. Individuals participating in APA sponsored meetings agree to listen respectfully to all views presented, be courteous to others regardless of whether you agree or disagree with the views presented, and to exhibit the professionalism and collegiality expected of psychiatrists. If an individual believes that these rules have been violated or acceptable social decorum has otherwise been breached, he or she shall contact APA staff to help with the situation. APA reserves the right to remove meeting access rights of any individual violating this policy and will not provide a refund. By registering for this meeting, you agree to abide by the Participation Policy as described above.

General Information

Scientific Session Capacity Guidelines

If overcrowding occurs in a scientific session, we ask for your assistance in abiding by the following guidelines so that all in attendance can benefit:

- ▶ Take a seat as close to the front of the room as possible.
- ▶ Move to the center of the row and fill all seats so that chairs are available near the aisles for additional attendees.
- ▶ Don't stand or sit in the aisles or lean against walls. The Fire Marshall may shut down an overcrowded session; therefore, please either find a seat or choose another session to attend.

A 2018 meeting badge is required to ride on the courtesy shuttle bus. The Javits Center will serve as the hub for all shuttle bus routes. A detailed shuttle bus schedule will be available onsite and will be posted in the lobbies of participating hotels.

Session Slides

Some presenters have elected to provide their presentation slides to meeting attendees in advance. Should session slides be available, they can be downloaded from the APA Meetings App under the session description. If slides are not available in the app, this means the session presenters did not provide their slides in advance.

Smoking Policy

Smoking is not allowed anywhere in the Javits Center.

Audio and Visual Reproduction Policies

Registrants are not permitted to photograph or video record any session, including presentation slides, as the intrusive nature of recording may be disruptive. This includes photographs taken with cell phone cameras. Audio recording is permitted for personal use only. Registrants are welcome to use their own small, portable audio recorders to record any session except case conferences or unless prohibited by the presenters. Larger professional tape recorders are not permitted except for use by registered members of the working press in accordance with APA press policies. Media will be identified with silver badges, and approved equipment will be identified with APA Newsroom stickers. The APA has authorized a professional taping firm, which will be clearly identified, to record sessions.

Wi-Fi

Attendees will have free wireless access in all public spaces and meeting rooms.

There is also free Wi-Fi in the two APA Recharge Lounges (Exhibit Halls 3A/B, Third Level, open during exhibit hours), with charging stations for laptops, cell phones and other devices.

Disclosure Index

American Psychiatric Association Continuing Medical Education Policy on Full Disclosure

For all program planners and presenters at CME activities, the American Psychiatric Association requires disclosure of all relevant financial relationships with any commercial interest in any amount occurring within the past 12 months, including those of spouse/partner. A commercial interest is an entity producing, marketing, re-selling, or distributing health care goods or services consumed by, or used on, patients. Financial relationships are those relationships in which the individual benefits by receiving a salary, royalty, intellectual property rights, consulting fee, honoraria for promotional speakers' bureau, ownership interest, or other financial benefit. An "affiliation" may include holding a position on an advisory committee, speakers' bureau, or some other role or benefit to a supporting organization.

In compliance with the ACCME's Standards for Commercial Support, the APA has a management of conflict (MCI) process for all CME activities. This process ensures that all conflicts of interest are identified, managed and resolved prior to the educational activity. Additionally, the prospective audience must be informed of the presenters' or program planners' affiliations with every commercial interest by an acknowledgment in the printed program and verbal or visual disclosure to participants at the

session (disclosure by slide is required if audiovisual equipment is used for the presentation). Disclosing to learners the relevant financial relationships that were present and resolved assists learners in assessing the potential for bias in the information that is presented. The APA also requires verbal disclosure of discussion of unlabeled uses of a commercial product or investigational use of a product not yet approved for this purpose.

The presenters and planners on the following pages indicated that either they or a spouse/partner have a financial interest or other affiliation with a commercial entity producing, marketing, re-selling or distributing health care goods or services consumed by or used on patients; the company name and affiliation is also listed. Providers of clinical service directly to patients are not considered to be commercial interests. The second group of presenters and planners indicated neither they nor a spouse/partner have any relationship to disclose.

All presenters and planners must complete a disclosure in order to participate in an APA CME activity. This disclosure listing includes both the presenters and planners of the Scientific Program and New Research Poster Sessions.

Format Descriptions

Advances in Psychiatry

These sessions highlight important new advances occurring in the field of psychiatry. Attendees should expect to cover topics at the intersection of research, clinical care, and other areas of medicine.

Case Conferences

During these 90-minute sessions, clinical material is presented by videotape or the treating therapist. One or more experts then discuss the case. These sessions are open to APA members only.

Courses/Master Courses

Courses are designed to 1) emphasize learning experiences that actively involve participants, 2) include the opportunity for informal exchange with the faculty, and 3) provide a deeper exploration of a topic than would be found in the general meeting program. Offered in four-hour (half-day), six-hour (full-day) and eight-hour (full-day) sessions, courses either review basic concepts in a special subject area or present advanced material on a circumscribed topic. Courses require an additional fee for enrollment.

FOCUS Live

These 90-minute sessions allow participants to test their knowledge using an interactive audience response system (ARS). Experts, who served as guest editors of *FOCUS*, will lead lively multiple-choice question-based discussions, and the audience will enter their answers with their mobile devices. Results are instantly tallied and projected on the screen, providing participants with immediate feedback. Attendees are expected to bring their own devices for use during the session. MOC self-assessment credit (2 credits) is available to participants after the session by reviewing the rationales and references at education.psychiatry.org.

Forums

Forums are flexible 90-minute presentations that afford participants the opportunity to highlight and select timely topics that are of interest to psychiatrists. Speakers and panel members are chosen for their expertise and leadership in the field.

Learning Lab

The Learning Lab introduces an exciting new way to learn at the Annual Meeting. Each session in the Learning Lab transforms learning through collaboration, rich discussion around issues impacting psychiatry and hands-on learning.

Format Descriptions

Lectures

Lectures feature a small number of distinguished speakers discussing scientific and cultural topics, many of which will extend our understanding beyond the usual limits of clinical psychiatry. The Scientific Program Committee invites lecturers. Many award recipients, selected by the various APA award boards, also present lectures at the meeting.

Poster Sessions

This format allows for presentations of very recent findings. Posters are visual, self-explanatory presentations offered in three categories: International, Medical Student/Resident Competition and New Research.

Meet the Author

This small format session allows attendees to interact with authors and editors of APA publications. Participants will discuss their books and engage their audience with clinical case materials or discussion related to their area of expertise.

Symposia

Symposia are three-hour sessions consisting of four to six thematically linked presentations that focus on a specific topic relevant to clinical psychiatry. This format is designed to provide comprehensive treatment of a topic or discussion of the topic from several points of view and stimulate discussion with the audience.

Workshops

Workshops are 90-minute sessions that typically involve brief presentations from individual panel members, followed by the opportunity for lively and informative discussion. This format provides for substantial audience participation and is highly interactive.

Media Workshops

Media Workshops are three-hour sessions in which a feature-length film is shown and discussed.

Learning Labs

The Learning Lab introduces an exciting new way to learn at the APA Annual Meeting. Every session in the Learning Lab transforms learning through collaboration, rich discussion around issues impacting psychiatry, and hands-on learning. Sessions include an improv experiential, debate sessions, a medical history mystery lab, a resident leadership boot camp, and much more.

Attendees who bring their own devices to the Learning Lab will get the most out of this experience. To connect to Learning Lab presentations, click the FXP Touch icon under the session in the APA Meetings App or type the session key, displayed at the top of the screen at the start of each Learning Lab session, into your web browser.

Focus

The Journal of Lifelong Learning in Psychiatry

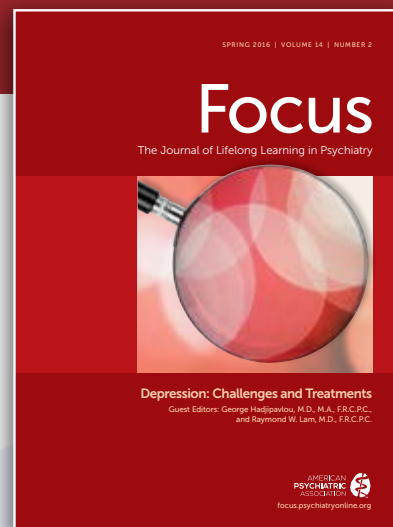

The Best Resource for

- Clinical Synthesis
- Expert Guidance
- Lifelong Learning
- Maintenance of Certification

Focus, APA's quarterly clinical review journal, is designed for practicing psychiatrists to keep abreast of significant clinical knowledge and advances in the field through self-directed lifelong learning. Four issues each year provide comprehensive reviews of major clinical areas of psychiatry. **Focus** also provides an organized learning and self-assessment program with 44 hours of CME each year.

An Annual Subscription to Focus Gives You:

- Reviews of core areas in psychiatry, with each issue overseen by a Guest Editor clinical expert in that area.
- Articles on best practices, new developments and the current state of practice.
- Quizzes that allow you to earn up to five *AMA PRA Category 1 Credits*[™] by completing CME questions for each issue—for a total of up to 20 CME credits per year.
- An annual 120-question **self-assessment exam** for an additional 24 CME credits and APBN MOC self-assessment credits that provides you with a comparison of your result against the group score of your peers.
- Online access to back issues (CME credits for issue quizzes available only for your subscription year).

Dinesh Bhugra, M.D., is emeritus professor of mental health and cultural

diversity at the Institute of Psychiatry, Psychology, and Neuroscience King's College London. He was president

of the World Psychiatric Association from 2014 to 2017 and in 2017 became president-elect of the British Medical Association. Dinesh Bhugra's research interests are in cultural psychiatry, sexual dysfunction, and service development. He is the recipient of over 10 honorary degrees. He has authored/co-authored over 400 scientific papers and 30 books and is the editor of three journals (*International Journal of Social Psychiatry*, *International Review of Psychiatry*, and *International Journal of Culture and Mental Health*). Previously, he was the dean (2003–2008) and then president (2008–2011) of the Royal College of Psychiatrists in the UK, where he led major policy initiatives on psychiatry's contract with society and the role of the psychiatrist.

Juan Bustillo, M.D., graduated from medical school at the Colegio Mayor

de Nuestra Señora del Rosario in Bogota, Colombia, in 1985 and completed psychiatry residency at the University

of Texas Medical Branch in Galveston in 1991. He then trained in schizophrenia research under Dr. Will Carpenter at the Maryland Psychiatric Research Center (1993–1996). He joined the faculty at the University of New Mexico (UNM) department of psychiatry in 1996 and is currently professor of psychiatry and neurosciences. He holds the endowed Uhlenhuth Family Professorship of Research at UNM. Dr. Bustillo is a member of the American College of Neuropsychopharmacology, was chair of the NIH Scientific Review Group on Interventions Committee for Adult Disorders, was a member of the Psychosis Work Group for the *DSM-5* and was awarded the UNM Earl Walker Neuroscience Research Award in 2017.

Jack Drescher, M.D., is a distinguished life fellow of the APA and past

president of the New York County Psychiatric Society. He chaired the APA's Committee on GLB Issues and served on the

DSM-5 Workgroup on Sexual and Gender Identity Disorders. He is clinical professor of psychiatry at Columbia University College of Physicians and Surgeons, faculty member at Columbia Center for Psychoanalytic Training and Research, adjunct professor at New York Medical College, clinical supervisor and adjunct professor at New York University, and training and supervising analyst at the William A. White Institute. He is past president of the Group for Advancement of Psychiatry and a member of the World Health Organization's Working Group on the Classification of Sexual Disorders and Sexual Health revising ICD-11. He is author of *Psychoanalytic Therapy and the Gay Man* (Routledge) and emeritus editor of the *Journal of Gay and Lesbian Mental Health*. Dr. Drescher is an expert media spokesperson on issues related to gender and sexuality and frequently speaks for the APA.

Benjamin Druss, M.D., as the first Rosalynn Carter Chair in Mental Health at

Emory University, is working to build linkages between mental health, physical health, and public health. At Emory, he

works closely with the Carter Center Mental Program, where he is a member of the Mental Health Taskforce and Journalism Advisory Board. Dr. Druss serves on the editorial boards of *JAMA Psychiatry*, the *American Journal of Psychiatry*, and *General Hospital Psychiatry* and edits *Psychiatric Services'* Integrated Care Column. He is a member of NIMH's National Advisory Mental Health Council.

Leslie Gise, M.D., is clinical professor of psychiatry at the John A. Burns School

of Medicine of the University of Hawaii in Honolulu, Hawaii. She had been interested in gender differences throughout

her career. She was in private practice for 30 years and did consultation-liaison psychiatry at Mount Sinai in NYC for 20 years with a lot in OBGYN and women's mental health. She did community psychiatry for 20 years in Hawaii in a CMHC and focused on substance use disorders in women, including forced detentions, incarcerations, and treatment of pregnant women with substance use disorders. She is a past president of the North American Society for Psychosocial Obstetrics and Gynecology, past chair of the APA Committee on Women, and long-time assembly rep from Hawaii. She is the Hawaii contact person for the Physicians for a National Health Program.

Ain Gordon is a three-time Obie Award-winning writer/director/actor,

a two-time NYFA recipient, and a Guggenheim Fellow in Playwriting. Gordon's work focuses on marginalized

or forgotten histories and the invisible players inhabiting that space. Recent Projects include *Radicals In Miniature*; a series of requiems to personal icons premiered May 2017 at Baryshnikov Arts Center and Vermont Performance Lab plus upcoming touring to International Festival of Arts and Ideas, Quick Center, Connecticut College (all CT), plus Williams College and The Yard (both MA); *217 Boxes of Dr. Henry Anonymous* culminating a two-year residency at the Historic Society of Pennsylvania funded by the Pew Center for Arts and Heritage focused on the papers of Dr. John Fryer who, disguised as Dr. Anonymous, faced the American Psychiatric Association in 1973 opposing the classification of homosexuality as a disease—premiered Painted Bride Arts Center (PA) May 2015; *Not What Happened*, an examination of the politics of historical reenactment via a contrapuntal duet for two people that never meet: the historical reenactor and the woman she portrays—BAM Next Wave Festival September 2013, Krannert Center (IL), Flynn Center (VT), etc; and *If She Stood*, inspired by the Philadelphia Female Antislavery Society, a multi-racial collective that almost accidentally discovered feminism—May 2012 Painted Bride (PA). Gordon is a former Core Writer of the Playwright's Center (MN), was the inaugural Visiting Artist at the Pew Center for Arts and Heritage (PA), a 2014 Artist-In-Residence at NYU Tisch School of The Arts, and Resident Artist at The Hermitage (FL). Joshua A. Gordon, M.D., Ph.D., is the director of the National Institute

of Mental Health (NIMH). Dr. Gordon pursued a combined M.D./Ph.D. degree at UCSF in psychiatry and neurosci-

ence. Upon completion of the dual degree program, Dr. Gordon went to Columbia University for his psychiatry residency and research fellowship because of the breadth and depth of the research opportunities there. He joined the Columbia faculty in 2004 as an assistant professor in the department of psychiatry. Dr. Gordon's work has been recognized by several prestigious awards, including the Brain and Behavior Research Foundation – NARSAD Young Investigator Award.

Susan Greenfield, C.B.E., is a British scientist, writer, broadcaster, and

member of the House of Lords. Specializing in the physiology of the brain, Susan researches the impact of 21st century

technologies on the mind, how the brain generates consciousness, and novel approaches to neurodegenerative diseases such as Alzheimer's and Parkinson's. Susan has written a range of non-specialist books on issues relating to the mind and brain for the general reader. She appears regularly on radio and television and frequently gives talks to the public and private sector.

Geetha Jayaram, M.D., is a faculty member in the Departments of

Psychiatry, the School of Health Policy and Management, and The Armstrong Institute for Patient Safety and the

School of Nursing at Johns Hopkins University School of Medicine in Baltimore, Maryland. Her vast experience as an administrator and clinician include directing both outpatient and inpatient services, a private practice, and outreach programs as a community psychiatrist, and spearheading a complex risk management and patient safety program for two decades. As a highly respected clinician leader and administrator, she has developed and directed a quality assurance/patient safety program that is unique in psychiatry and teaches nationally and internationally. As a leader in patient safety, she has been invited to lecture, consult and lead faculty practice at several medical schools, has chaired the Patient Safety Committee for the American Psychiatric Association for several years, and published the book *Practicing Patient Safety in Psychiatry* and at least 50 papers on the topic of safety and care quality for the severely mentally ill.

Darrell G. Kirch, M.D., is president and CEO of the Association of American

Medical Colleges (AAMC), which represents the nation's medical schools, teaching hospitals, and academic medical societ-

ies. A distinguished physician, educator, and medical scientist, Dr. Kirch speaks and publishes widely on the need for transformation in the nation's health care system and how academic medicine can lead change across medical education, biomedical research, and patient care. Prior to becoming AAMC president in 2006, Dr. Kirch served as the dean and academic health system leader of two institutions: the Medical College of Georgia and the Penn State Milton S. Hershey Medical Center. A psychiatrist and clinical neuroscientist by training, Dr. Kirch began his career at the National Institute of Mental Health, becoming the acting scientific director in 1993 and receiving the Outstanding Service Medal of the U.S. Public Health Service.

Patricia A. Newton, M.D., M.P.H., M.A., is the chief executive officer and medi-

cal director of the Black Psychiatrists of America and a former president of the association as well. She is a graduate

of Washington University School of Medicine (St. Louis, Mo.), where she completed a psychiatric residency and served as a chief resident and clinical instructor. She is a former APA-NIMH Fellow. She has a Master's in Public Health degree from Johns Hopkins University School of Public Health and served on the faculty of its medical school as an assistant professor in the department of psychiatry (Baltimore, Md.). Dr. Newton completed her undergraduate studies at the University of Arkansas (Pine Bluff, Ark.) and a master's degree in molecular biology from Peabody College (Vanderbilt University) in Nashville, Tenn.

Norman Sartorius, M.D., D.P.M., Ph.D., M.A., was the first director of the

Division of Mental Health of the WHO until 1993. Subsequently he was the president of the World Psychiatric

Association and president of the Association of European Psychiatrists. He is now the president of the Association for the Improvement of Mental Health Programmes, a member of the Board of the Geneva Prize Foundation, and holds professorial appointments at universities in China, the UK, the U.S., and elsewhere. He has published more than 400 articles in peer-reviewed journals and authored or co-authored and edited more than 100 books. He is an honorary fellow of the American Psychiatric Association and of numerous professional associations and has received honorary doctorates from universities in the Czech Republic, Denmark, Romania, Sweden, and the UK. He is also an honorary member of the Medical Academies in Croatia, Mexico, Peru, and Spain and a corresponding member of the Croatian Academy of Arts.

Introduction of Lt. Gen. Mark Hertling
Anita Everett, M.D.

Special Lecture by Lt. Gen. Mark Hertling (Ret.)

Leaving his beloved US Army in January 2013, Lieutenant General (retired) Mark Hertling is now leading programs for Global Partnering, Leadership Development and Health Performance Strategies at the innovative Florida Hospital in Orlando.

Prior to joining Florida Hospital, Mark served for almost four decades in the US Army. At the time of his retirement, he was Commanding General of US Army Europe, where he led over 50,000 soldiers, cared for over 100,000 family members, and partnered with the armies of 50 countries in the European theater. During his military career, Lt. Gen. Hertling commanded training organizations at the Army's National Training Center (Ft. Irwin, California) and the Joint Multi-National Training Center (Grafenwoehr, Germany). He was an assistant Division Commander in Baghdad in 2003-4, and later commanded the Army's 1st Armored Division (1AD) in Germany and in Northern Iraq during the surge. Hertling spent over 36 months in combat.

Receiving a Bachelor of Science from the U.S. Military Academy in 1975, Lt. Gen. Hertling is a graduate of the Army's Staff College, the School of Advanced Military Studies, and the National War College. He also holds Masters Degrees in History and International Relations from these institutions, and he also earned a Master's Degree in Exercise Physiology from Indiana University. He is currently pursuing an Executive Doctorate in Business Administration from the Crummer School at Rollins College.

During his time in the Army, Mark received many military honors including three awards of the Distinguished Service Medal, six awards of the Legion of Merit, five Bronze Stars, a Purple Heart, and the Army Commendation Medal for Valor. He also received the Gold Cross of Honor of the German Army, the Romanian Land Forces Emblem of Honor, and the Polish Soldier's Medal of Honor. He is a life member of the Purple Heart Association, Phi Kappa Phi, and he is a Distinguished Eagle Scout. In 2015, he received the Dwight D. Eisenhower Award from the US Sports Academy.

In addition to working with Florida Hospital, Mark was appointed by President Obama and served for four years as one of 25 members of the President's Council on Fitness, Sport and Nutrition. He is an adjunct scholar at West Point's Modern War Institute, and he also serves as a military analyst for CNN. Mark speaks and acts passionately on the subjects of leadership, national security, and health trends. His book, *Growing Physician Leaders*, was published in May 2016.

Mark is married to his best friend, Sue. They have two sons, and four grandsons. He loves being with family, reading history, bicycling, and any form of athletic activity.

MONDAY, MAY 7

Antonia L. Baum, M.D., graduated from Brown University (AB Biology, MD, psychiatry residency). She completed fellowships in eating disorders and reproductive psychiatry (University of

British Columbia) and consultation-liaison psychiatry (Georgetown). She is the immediate past president of the International Society for Sport Psychiatry and specializes in treating athletes and eating disorders in her general adolescent and adult practice (Chevy Chase, MD). She is on faculty at George Washington University and teaches for the oral psychiatry boards. Dr. Baum is a consultant to MLB, the NFL, and the IOC, and has been on a working group for the USOC. She became a distinguished fellow of the APA in 2009.

Wendy Burn became a consultant old age psychiatrist in Leeds in West Yorkshire in the UK in 1990 and currently works in a community post. She has been involved in the organization and

delivery of postgraduate training since she started as a consultant. She has held many roles in education, including college tutor, training program director, director of postgraduate medical education, chair of specialty training committee, and associate medical director for doctors in training. She set up the Yorkshire School of Psychiatry and was the first head of school. On behalf of the Royal College of Psychiatrists, she has been an examiner, a senior organizer of clinical examinations, a deputy convenor, regional coordinator for CPD, and the deputy lead for national recruitment. She was College dean from 2011 to 2016. She is currently the president of the College and the co-chair of the Gatsby Wellcome Neuroscience Project.

Amit Etkin, M.D., Ph.D., is an associate professor in the department of psychiatry and behavioral sciences at Stanford, a member of the Stanford Neurosciences Institute, and an investigator

at the Palo Alto VA. He is trained as both as a neuroscientist and psychiatrist. The overarching aim of the Etkin lab is to understand the neural basis of emotional disorders and their treatment and to leverage this knowledge to better understand how the brain works and to develop novel treatment interventions. In support of this goal, Dr. Etkin also collaborates with neuroscientists, engineers, psychologists, physicians, and others to establish a new intellectual, scientific, and clinical paradigm for understanding and manipulating human brain circuits in healthy individuals and for treating psychiatric disease.

Devon E. Hinton, M.D., Ph.D., is an anthropologist and psychiatrist and an associate professor of psychiatry at Massachusetts General Hospital, Harvard Medical School, and the Department of Global Health and Social

Medicine. He has researched culturally specific presentations of somatic symptoms, panic attacks, panic disorder, and PTSD among Southeast Asian populations, particularly Cambodian and Vietnamese refugees, and among Latino populations. He and his team have written extensively on treatment adaptation for these cultural groups, particularly traumatized refugees.

Fructuoso Irigoyen, M.D., P.A., is the physician advocate administrator at Behavioral Hospital at Renaissance in Edinburg, Texas, and also in private practice leading The Center, Comprehensive Mental Health in McAllen, Texas.

Dr. Irigoyen was born in Chihuahua, Mexico, in 1949. He obtained his medical degree from Universidad Autónoma de Chihuahua in 1974. He practiced medicine among the Tarahumara Indians for nine years. From 1983 to 1987, he completed residency training in psychiatry at the University of New Mexico. In 1987, he received the Senescu Memorial Award. Dr. Irigoyen has been committed to IMG causes in the APA, first as a member of the IMG Committee and then in the IMG Caucus, having been deputy rep, rep, and president of the Caucus (2 times). During this time, he participated in MUR, Area 5, and Assembly functions.

Nyapati Rao, M.D., graduated from the Kurnool Medical College, Vijayawada University of Health Sciences, Kurnool, Andhra Pradesh, India, in 1976. He works in East Meadow, New York, and

one other location and specializes in psychiatry and geriatric psychiatry. Dr. Rao is affiliated with Nassau University Medical Center.

Bios

Alan F. Schatzberg, M.D., is the Kenneth T. Norris, Jr. Professor of Psychiatry and Behavioral Sciences at Stanford University, where he is also director of the Mood Disorders Center and past

chair of the department. Previously, he was professor of psychiatry at Harvard Medical School. He received his medical degree from New York University School of Medicine. He completed his residency in psychiatry at Massachusetts Mental Health Center, Boston, MA, and a clinical fellowship in psychiatry at Harvard Medical School. He has authored over 700 publications and abstracts on the pathophysiology, diagnosis, and somatic and psychosocial treatment of mood disorders. He has received numerous honors and awards, including recently the Julius Axelrod Mentorship Award of the American College of Neuropsychopharmacology, the Gold Medal from the Society of Biological Psychiatry, and the Kraepelin Gold Medal from the Max Planck Institute of Psychiatry. He is a member of the National Academy of Medicine.

Wendy Whelan began her dance training at the age of 3 and went on to spend 30 years with New York City Ballet, 23 of those years as principal dancer. She has danced virtually every

major Balanchine role and worked closely with Jerome Robbins on many of his ballets. She originated leading roles in works by such notable choreographers as William Forsythe, Twyla Tharp, Alexei Ratmansky, and Christopher Wheeldon. Whelan has been a guest artist with The Royal Ballet and the Kirov Ballet and has performed on nearly every major stage across the globe. She received the Dance Magazine Award in 2007, and in 2009 was given a Doctorate of Arts, honoris causa, from Bellarmine University. In 2011, she received both The Jerome Robbins Award and a Bessie Award for her Sustained Achievement in Performance. Since 2013, Wendy has been developing her own independent projects, including, *Restless Creature* and *Some of a Thousand Words*, both co-produced by The Joyce Theater Productions and Whelan/Watson Other Stories, co-produced by London's Royal Opera House and Hago-romo, self-produced for the 2015 BAM Next Wave Festival. In the summer of 2017, a documentary, entitled *Restless Creature: Wendy Whelan*, was released in theaters across the country. It was awarded the 2017 Chita Rivera Award for Best Dance Documentary and is now available on iTunes, Netflix and Amazon

The William C. Menninger Memorial Convocation Lecture

Established in 1972, this lecture honors the late William C. Menninger, M.D., President of APA 1948–49, who brought to the association a formalized Convocation of Fellows, first held in 1956.

Elinore McCance-Katz, M.D., Ph.D.

Elinore McCance-Katz, M.D., Ph.D., is the first assistant secretary for mental health and substance use at the Substance Abuse and Mental Health Services Administration (SAMHSA). She obtained her Ph.D. from Yale University with a specialty in infectious disease epidemiology and is a graduate of the University of Connecticut School of Medicine. She is board certified in general psychiatry and addiction psychiatry. She is a distinguished fellow of the American Academy of Addiction Psychiatry with more than 25 years as a clinician, teacher, and clinical researcher. Most recently, she served as the chief medical officer for the Rhode Island Department of Behavioral Healthcare, Developmental Disabilities and Hospitals, and as the chief medical officer for the Eleanor Slater Hospital system, which is Rhode Island's state resource for patients with the most serious mental illnesses and medical illnesses requiring long-term, inpatient care. She was also professor of psychiatry and human behavior at Brown University. Previously, she served as the first chief medical officer for SAMHSA. Prior to coming to SAMHSA, she served at the University of California, San Francisco, as a professor of psychiatry, as the medical director for the California Department of Alcohol and Drug Programs, and as the medical director of SAMHSA's Clinical Support Systems for Buprenorphine (PCSS-B) and Opioids (PCSS-O).

Dr. McCance-Katz has published extensively in the areas of clinical pharmacology, medications development for substance use disorders, drug-drug interactions, addiction psychiatry, and treatment of HIV infection in drug users. She served on the World Health Organization (WHO) committee that developed guidelines on the treatment of drug users living with HIV/AIDS. She has been a national leader in addressing the overprescribing of opioid analgesics and in providing consultation on management of patients with chronic pain and opioid overuse. She was a participant in the development of SAMHSA TIP 40, which provided the initial guidance to physicians utilizing buprenorphine in the treatment of opioid use disorder, contributed to the development and maintenance of the legislatively required eight hours of physician training for prescribing buprenorphine products, and has continued to be actively involved in the development and delivery of physician training on office-based treatment of opioid use disorders. She has been one of the architects of Rhode Island's plan for addressing the opioid epidemic, including new approaches to treatment in the form of a statewide system of centers of excellence in the treatment of opioid use disorder; new approaches to training in the utilization of the Drug Abuse Treatment Act of 2000 (DATA 2000) to bring DATA waiver training to medical students and, going forward, nurse practitioner and physician assistant students; and legislative/regulatory work addressing safe use of opioids in acute pain.

Dr. McCance-Katz lives in Cranston, Rhode Island, with her husband. She has three grown children and one grandchild.

Wade Berrettini, M.D., Ph.D., is the Karl E. Rickels Professor of Psychiatry at the University of Pennsylvania Perelman School of Medicine. He earned his M.D. (1977) and Ph.D. (Pharmacology, 1979) degrees from Thomas Jefferson University (TJU). After completing residency training in psychiatry, he studied genetics of behavioral disorders at the National Institute of Mental Health for ten years. Since 1997, Dr. Berrettini has served as the director of the Center for Neurobiology and Behavior, a group of interdisciplinary scientists studying genetic and biologic influences on brain disorders and behavior. The author of more than 400 scientific publications, his research interests include genetics and pharmacogenetics of addictions, mood disorders, schizophrenia, and epilepsy.

Wilson M. Compton, M.D., is deputy director of the National Institute on Drug Abuse (NIDA) of the National Institutes of Health. NIDA supports most of the world's research on health aspects

of drug abuse and addiction related to preventing drug abuse, treating addiction, and addressing serious health consequences of drug abuse. Dr. Compton received his undergraduate education at Amherst College and his medical education at Washington University in St. Louis. Over his 25+ year career, Dr. Compton has achieved multiple scientific accomplishments. He is author of more than 150 articles, including widely cited papers on the opioid crisis; an invited speaker at multiple high-impact venues; and recipient of multiple awards. Of note, Dr. Compton received the APA Senior Scholar Health Services Research Award in 2008; the Health and Human Services Secretary's Awards for Meritorious Service in 2013 and Distinguished Service in 2014; and awards from the FDA in 2012, 2013, and 2017.

Thomas R. Insel, M.D., a psychiatrist and neuroscientist, is a co-founder and president of Mindstrong Health. From 2002 to 2015, Dr. Insel served as director of the National Institute of Mental

Health (NIMH), the component of the National Institutes of Health (NIH) committed to research on mental disorders. Prior to serving as NIMH director, Dr. Insel was professor of psychiatry at Emory University, where he was founding director of the Center for Behavioral Neuroscience in Atlanta. Most recently (2015–2017), he led the Mental Health Team at Verily (formerly Google Life Sciences) in South San Francisco, CA. Dr. Insel is a member of the National Academy of Medicine and has received numerous national and international awards, including honorary degrees in the U.S. and Europe.

Maria Oquendo, M.D., Ph.D., is professor and chairman of psychiatry at the

University of Pennsylvania. She attended the College of Physicians and Surgeons, Columbia University, and completed

residency at Payne Whitney Clinic, New York Hospital Cornell. Until 2016, she was professor of psychiatry and vice chairman for education at Columbia. In 2017, she was elected to the National Academy of Medicine, one of the highest honors in medicine. Dr. Oquendo has used positron emission tomography and magnetic resonance imaging to map brain abnormalities in mood disorders and suicidal behavior. Her expertise ranges from psychopharmacology to global mental health. She has over 350 peer-reviewed publications. Dr. Oquendo is past president of the American Psychiatric Association and the International Academy of Suicide Research, vice president of the American Foundation for Suicide Prevention's Board of Directors, and sits on the National Institute of Mental Health's Advisory Council.

Nora D. Volkow, M.D., became director of the National Institute on Drug

Abuse (NIDA) at the National Institutes of Health in May 2003. NIDA supports most of the world's research on the health

aspects of drug abuse and addiction. Dr. Volkow's work has been instrumental in demonstrating that drug addiction is a disease of the human brain. As a research psychiatrist and scientist, Dr. Volkow pioneered the use of brain imaging to investigate the toxic effects and addictive properties of abusable drugs. Her studies have documented changes in the dopamine system affecting, among others, the functions of frontal brain regions involved with motivation, drive, and pleasure in addiction. She has also made important contributions to the neurobiology of obesity, ADHD, and aging. Dr. Volkow has published more than 600 peer-reviewed articles, written more than 95 book chapters and non-peer-reviewed manuscripts, and edited three books on neuroimaging for mental and addictive disorders.

David Amodio, Ph.D., is an associate professor of psychology and neural science at New York University, where he directs the NYU Social Neuroscience Laboratory. His research examines the neural and psychological mechanisms that drive social behavior, with a focus on implicit bias and self-regulation in intergroup contexts. Dr. Amodio also studies the impact of prejudice on the mental and biological health of minority group members, with the broad goal of addressing racial disparities in health and education. Dr. Amodio served as the associate editor at the *Journal of Personality and Social Psychology* and co-founded the Social and Affective Neuroscience Society. His scientific contributions have been recognized by awards from the White House, American Psychological Association, Association for Psychological Science, Society for Personality and Social Psychology, and the International Social Cognition Network.

Let's Build a Mentally Healthy Nation for All.

As the charitable foundation of the APA, the APA Foundation works to:

- Raise awareness and overcome barriers
- Invest in the future leaders of psychiatry
- Support research and training to improve mental health care
- Lead partnerships to address public challenges in mental health

Amplify your impact in the field of mental health by supporting the Foundation during the Annual Meeting:

1. Visit our booths (see times below)
2. Don't miss our glamorous Annual Benefit on Saturday, May 5 from 6:00 - 9:00 p.m. at The Broadway Lounge at the Marriott Marquis. Enjoy cocktails, hors d'oeuvres, dessert, music, raffle prizes and more, all with stunning views of Times Square. Purchase tickets at our booths or apafdn.org/benefit
3. Bring your running shoes and see more of the city at the 4th Annual 5K Fun Run on Tuesday, May 8 from 7:00 - 8:00 a.m. Meet by the Intrepid for an easy morning run along the Hudson River Greenway. Contact lciffin@psych.org with questions.
4. Look for details in the APA Meetings App.

Come see us at our booths!

The Sunshine Act and How It Affects You

The Physician Payment Sunshine Act is a federal law that requires pharmaceutical and device manufacturers under certain circumstances to publicly report any complimentary gift, food, beverage, non-CME certified education or other item of value given to physicians. Some of the food, product theaters and trinkets that may be available to you at this meeting have been sponsored by companies that may be required to report your receipt of that gift. The APA recommends that you ask the person providing the complimentary item whether your name will be reported under the Act before accepting complimentary products or food so that you can make an independent and educated decision to accept or not accept it.

Product Theaters

! Eleven Product Theaters, supported by pharmaceutical companies exhibiting at the meeting, will be held this year. These promotional programs are being held as an extension of the Exhibit Hall. Seating is limited to 250, on a first-come basis. They are 60-minute promotional programs, and CME credit is not provided. The programs will be held in a theater in Exhibit Halls 3A/B, Third Level, Javits Center from Sunday to Tuesday with four programs each day at 11:00 a.m., Noon, 1:00 p.m., and 2:00 p.m. Boxed Lunches are provided. Look for signs announcing the presenters and topics in the Convention Center, Exhibit Hall and outside the product theater in the Exhibit Hall. Supporters of these sessions include Alkermes, Allergan, Janssen Pharmaceuticals, Inc., Neurocrine Biosciences, NeuroStar/Neuronetics, Inc., Sage Therapeutics, and Sunovion Pharmaceuticals Inc.

These sessions are covered by the Physician Payment Sunshine Act, and physicians attending will be required to provide their identifying information for public reports.

Your voice is needed.

APA Congressional Advocacy Network (CAN)

Mental health is in the headlines every day—but when policymakers don't understand psychiatry's role and importance, they risk passing laws and regulations that hurt your patients and your practice.

APA CAN empowers member psychiatrists to connect with members of Congress and speak on behalf of the APA on mental health issues.

You are psychiatry's best advocate for parity enforcement, fair reimbursement, and a health care system that values mental health. Your voice is needed in these debates. You'll be provided the resources and guidance you need to be effective.

Are you in?

APA Members can visit us at our booth in **APA Central** in the Exhibit Hall, and at [psychiatry.org/advocacy](https://www.psychiatry.org/advocacy).

Pick Up Performance Co(s) production of

217 Boxes of Dr. Henry Anonymous

a play written and directed by Obie-Award winner

Ain Gordon

During the week of APA's Annual Meeting

In conjunction with the 2018 Annual Meeting of the American Psychiatric Association, we honor the 45th anniversary of the declassification of homosexuality as a mental illness with a play about Dr. John Fryer, the man who helped end lobotomies, chemical castration, electric shock therapy and mental institutionalization and whose remarkable courage transformed the LGBT civil rights movement. Nightly talkbacks follow each performance.

PARKINSON'S DISEASE-RELATED HALLUCINATIONS AND DELUSIONS DISTORT WHAT IS REAL¹

HELP RESTORE REALITY WITH NUPLAZID^{2,3}

NUPLAZID[®] (pimavanserin) remarkably reduces the frequency and/or severity of Parkinson's disease psychosis with no impact on motor function^{2,3}

**Experience the virtual reality world of patients
with Parkinson's disease psychosis at Booth #1237.**

Indication

NUPLAZID is an atypical antipsychotic indicated for the treatment of hallucinations and delusions associated with Parkinson's disease psychosis.

Important Safety Information for NUPLAZID (pimavanserin) 17-mg Tablets

WARNING: INCREASED MORTALITY IN ELDERLY PATIENTS WITH DEMENTIA- RELATED PSYCHOSIS

Elderly patients with dementia-related psychosis treated with antipsychotic drugs are at an increased risk of death. NUPLAZID is not approved for the treatment of patients with dementia-related psychosis unrelated to the hallucinations and delusions associated with Parkinson's disease psychosis.

Contraindication: NUPLAZID is contraindicated in patients with a history of a hypersensitivity reaction to pimavanserin or any of its components. Rash, urticaria, and reactions consistent with angioedema (e.g., tongue swelling, circumoral edema, throat tightness, and dyspnea) have been reported.

QT Interval Prolongation: NUPLAZID prolongs the QT interval. The use of NUPLAZID should be avoided in patients with known QT prolongation or in combination with other drugs known to prolong QT interval including Class 1A antiarrhythmics or Class 3 antiarrhythmics, certain antipsychotic medications, and certain antibiotics. NUPLAZID should also be avoided in patients with a history of cardiac arrhythmias, as well as other circumstances that may increase the risk of the occurrence of torsade de pointes and/or sudden death, including symptomatic bradycardia, hypokalemia or hypomagnesemia, and presence of congenital prolongation of the QT interval.

Adverse Reactions: The most common adverse reactions ($\geq 2\%$ for NUPLAZID and greater than placebo) were peripheral edema (7% vs 2%), nausea (7% vs 4%), confusional state (6% vs 3%), hallucination (5% vs 3%), constipation (4% vs 3%), and gait disturbance (2% vs <1%).

Drug Interactions: Strong CYP3A4 inhibitors (eg, ketoconazole) increase NUPLAZID concentrations. Reduce the NUPLAZID dose by one-half. Strong CYP3A4 inducers may reduce NUPLAZID exposure, monitor for reduced efficacy. Increase in NUPLAZID dosage may be needed.

Pregnancy: Use of NUPLAZID in pregnant women has not been evaluated and should therefore be used in pregnancy only if the potential benefit justifies the potential risk to the mother and fetus.

Pediatric Use: Safety and efficacy have not been established in pediatric patients.

Dosage and Administration

Recommended dose: 34 mg per day, taken orally as two 17-mg tablets once daily, without titration.

WARNING: INCREASED MORTALITY IN ELDERLY PATIENTS WITH DEMENTIA-RELATED PSYCHOSIS

- **Elderly patients with dementia-related psychosis treated with antipsychotic drugs are at an increased risk of death.**
- **NUPLAZID is not approved for the treatment of patients with dementia-related psychosis unrelated to the hallucinations and delusions associated with Parkinson's disease psychosis.**

1 INDICATIONS AND USAGE

NUPLAZID is an atypical antipsychotic indicated for the treatment of hallucinations and delusions associated with Parkinson's disease psychosis.

2 DOSAGE AND ADMINISTRATION

The recommended dose of NUPLAZID is 34 mg, taken orally as two 17-mg strength tablets once daily, without titration.

• **Coadministration with Strong CYP3A4 Inhibitors**

The recommended dose of NUPLAZID when coadministered with strong CYP3A4 inhibitors (e.g., ketoconazole) is 17 mg, taken orally as one tablet once daily.

• **Coadministration with Strong CYP3A4 Inducers**

Monitor patients for reduced efficacy if NUPLAZID is used concomitantly with strong CYP3A4 inducers; an increase in NUPLAZID dosage may be needed.

4 CONTRAINDICATIONS

Contraindicated in patients with a history of a hypersensitivity reaction to pimavanserin or any of its components. Rash, urticaria, and reactions consistent with angioedema (e.g., tongue swelling, circumoral edema, throat tightness, and dyspnea) have been reported.

5 WARNINGS AND PRECAUTIONS

Increased Mortality in Elderly Patients with Dementia-Related Psychosis

Antipsychotic drugs increase the all-cause risk of death in elderly patients with dementia-related psychosis. Analyses of 17 dementia-related psychosis placebo-controlled trials (modal duration of 10 weeks and largely in patients taking atypical antipsychotic drugs) revealed a risk of death in the drug-treated patients of between 1.6- to 1.7-times that in placebo-treated patients. Over the course of a typical 10-week controlled trial, the rate of death in drug-treated patients was about 4.5%, compared to a rate of about 2.6% in placebo-treated patients.

Although the causes of death were varied, most of the deaths appeared to be either cardiovascular (e.g., heart failure, sudden death) or infectious (e.g., pneumonia) in nature. NUPLAZID is not approved for the treatment of patients with dementia related

psychosis unrelated to the hallucinations and delusions associated with Parkinson's disease psychosis.

QT Interval Prolongation

NUPLAZID prolongs the QT interval. The use of NUPLAZID should be avoided in patients with known QT prolongation or in combination with other drugs known to prolong QT interval including Class 1A antiarrhythmics (e.g., quinidine, procainamide) or Class 3 antiarrhythmics (e.g., amiodarone, sotalol), certain antipsychotic medications (e.g., ziprasidone, chlorpromazine, thioridazine), and certain antibiotics (e.g., gatifloxacin, moxifloxacin). NUPLAZID should also be avoided in patients with a history of cardiac arrhythmias, as well as other circumstances that may increase the risk of the occurrence of torsade de pointes and/or sudden death, including symptomatic bradycardia, hypokalemia or hypomagnesemia, and the presence of congenital prolongation of the QT interval.

6 ADVERSE REACTIONS

The following serious adverse reactions are discussed elsewhere in the labeling:

- Increased Mortality in Elderly Patients with Dementia-Related Psychosis
- QT Interval Prolongation

Clinical Trial Experience

The clinical trial database for NUPLAZID consists of over 1200 subjects and patients exposed to one or more doses of NUPLAZID.

Adverse reactions that occurred in 6-week, placebo-controlled studies and that were reported at an incidence of $\geq 2\%$ and $>$ placebo are presented in the following table.

Adverse Reactions ($\geq 2\%$ and $>$Placebo)		
Preferred Term	NUPLAZID 34 mg	Placebo
	N = 202	N = 231
Nausea	7%	4%
Peripheral edema	7%	2%
Confusional state	6%	3%
Hallucination	5%	3%
Constipation	4%	3%
Gait disturbance	2%	<1%

Postmarketing Experience

The following adverse reactions have been identified during postapproval use of NUPLAZID. Because these reactions are reported voluntarily from a population of uncertain size, it is not always possible to reliably estimate their frequency or establish a causal relationship to drug exposure. These reactions include somnolence, rash, urticaria, and reactions consistent with angioedema (e.g., tongue swelling, circumoral edema, throat tightness, and dyspnea).

7 DRUG INTERACTIONS

QT Interval Prolongation

Concomitant use of drugs that prolong the QT interval may add to the QT effects of NUPLAZID and increase the risk of cardiac arrhythmia. Avoid the use of NUPLAZID in combination with other drugs known to prolong QT interval.

Strong CYP3A4 Inhibitors

Concomitant use of NUPLAZID with a strong CYP3A4 inhibitor increases pimavanserin exposure. If NUPLAZID is used with a strong CYP3A4 inhibitor, reduce the dosage of NUPLAZID.

Strong CYP3A4 Inducers

Concomitant use of a strong CYP3A4 inducer may reduce pimavanserin exposure resulting in a potential decrease in efficacy. Patients should be monitored for reduced efficacy and an increase in dosage may be needed if NUPLAZID is used concomitantly with strong CYP3A4 inducers.

8 USE IN SPECIFIC POPULATIONS

Pregnancy

There are no data on NUPLAZID use in pregnant women that would allow assessment of the drug-associated risk of major congenital malformations or miscarriage. In animal reproduction studies, no adverse developmental effects were seen when pimavanserin was administered orally to rats or rabbits during the period of organogenesis at doses up to 10- or 12-times the maximum recommended human dose (MRHD) of 34 mg/day, respectively. Administration of pimavanserin to pregnant rats during pregnancy and lactation resulted in maternal toxicity and lower pup survival and body weight at doses which are 2-times the MRHD of 34 mg/day.

Lactation

There is no information regarding the presence of pimavanserin in human milk, the effects on the breastfed infant, or the effects on milk production. The developmental and health benefits of breastfeeding should be considered along with the mother's clinical need for NUPLAZID and any potential adverse effects on the breastfed infant from NUPLAZID or from the underlying maternal condition.

Pediatric Use

Safety and effectiveness of NUPLAZID have not been established in pediatric patients.

Geriatric Use

No dose adjustment is required for elderly patients. Parkinson's disease is a disorder occurring primarily in individuals over 55 years of age. The mean age of patients enrolled in the 6-week clinical studies with NUPLAZID was 71 years, with 49% 65-75 years old and 31% >75 years old. In the pooled population of patients enrolled in 6-week, placebo-controlled studies (N=614), 27% had MMSE scores from 21 to 24 compared to 73% with scores ≥ 25 . No clinically meaningful differences in safety or effectiveness were noted between these two groups.

Renal Impairment

No dosage adjustment for NUPLAZID is needed in

patients with mild to severe renal impairment or end stage renal disease (ESRD); however, increased exposure (C_{max} and AUC) to NUPLAZID occurred in patients with severe renal impairment (CrCL <30 mL/min, Cockcroft-Gault) in a renal impairment study. NUPLAZID should be used with caution in patients with severe renal impairment and end stage renal disease. In a renal impairment study, dialysis did not appear to significantly affect the concentrations of NUPLAZID.

Hepatic Impairment

No dosage adjustment for NUPLAZID is recommended in patients with hepatic impairment based on the exposure differences observed in patients with and without hepatic impairment in a hepatic impairment study.

9 DRUG ABUSE AND DEPENDENCE

Controlled Substance

NUPLAZID is not a controlled substance.

Abuse

NUPLAZID has not been systematically studied in humans for its potential for abuse, tolerance, or physical dependence. While short-term, placebo-controlled and long-term, open-label clinical trials did not reveal increases in drug-seeking behavior, the limited experience from the clinical trials do not predict the extent to which a CNS-active drug will be misused, diverted, and/or abused once marketed.

10 OVERDOSAGE

Human Experience

The pre-marketing clinical trials involving NUPLAZID in approximately 1200 subjects and patients do not provide information regarding symptoms with overdose. In healthy subject studies, dose limiting nausea and vomiting were observed.

Management of Overdose

There are no known specific antidotes for NUPLAZID. In managing overdose, cardiovascular monitoring should commence immediately and should include continuous ECG monitoring to detect possible arrhythmias. If antiarrhythmic therapy is administered, disopyramide, procainamide, and quinidine should not be used, as they have the potential for QT-prolonging effects that might be additive to those of NUPLAZID. Consider the long plasma half-life of pimavanserin (about 57 hours) and the possibility of multiple drug involvement.

17 PATIENT COUNSELING INFORMATION

Concomitant Medication

Advise patients to inform their healthcare providers if there are any changes to their current prescription or over-the-counter medications, since there is a potential for drug interactions.

CAUTION: Federal law prohibits dispensing without prescription.

All Women Psychiatrists Welcome APA Women's Brown Bag Lunch

Sunday, May 6, 2018

11:30 a.m. - 1:30 p.m.

Empire East Room, Second Floor
Sheraton New York Times Square

Join us at the Women's Brown Bag Lunch
at the Annual Meeting in New York City.

All women psychiatrists attending the APA
Annual Meeting are cordially invited to join with
other women for fellowship and conversation.

Meet a wonderful group of colleagues from around
the world and at all career stages for relaxed
conversation and discussion, support, mentoring,
brainstorming, and networking resources.

Women are welcome to talk informally among
themselves or speak with renowned women
psychiatrists and APA leaders representing a
variety of subspecialties and career interests to talk
about professional and personal development.

**Come to the Sheraton on Sunday and enjoy
some down time with other colleagues
during this important year for women.**

Be sure to bring your lunch!
